1. Introduction

Handover and Delegation are critical functions that enable an Operations User Maker to either Handover (permanently) or Delegate (temporarily) a set of Leads, Prospects or Customers to a Relationship Manager (RM) to manage. In case a new RM joins, or an old RM leaves, or the Customer requests for an RM change, Handover can be used to transfer the Leads, Prospects and Customers. In case an RM's move is temporary in nature, then Delegation is used. Hence, these functions are extremely vital as they formalize the set of Customers/Prospects/Leads that the RM has to manage on a day to day basis

2. Prerequisites

S No	Process	Reference Document
1	Customer Onboarding	Journey of Lead to Prospect and Prospect to Customer
2	Prospect Onboarding	Journey of Lead to Prospect and Prospect to Customer
3	Lead Onboarding	Journey of Lead to Prospect and Prospect to Customer
4	User Maintenance	Journey of Defining Maintenance

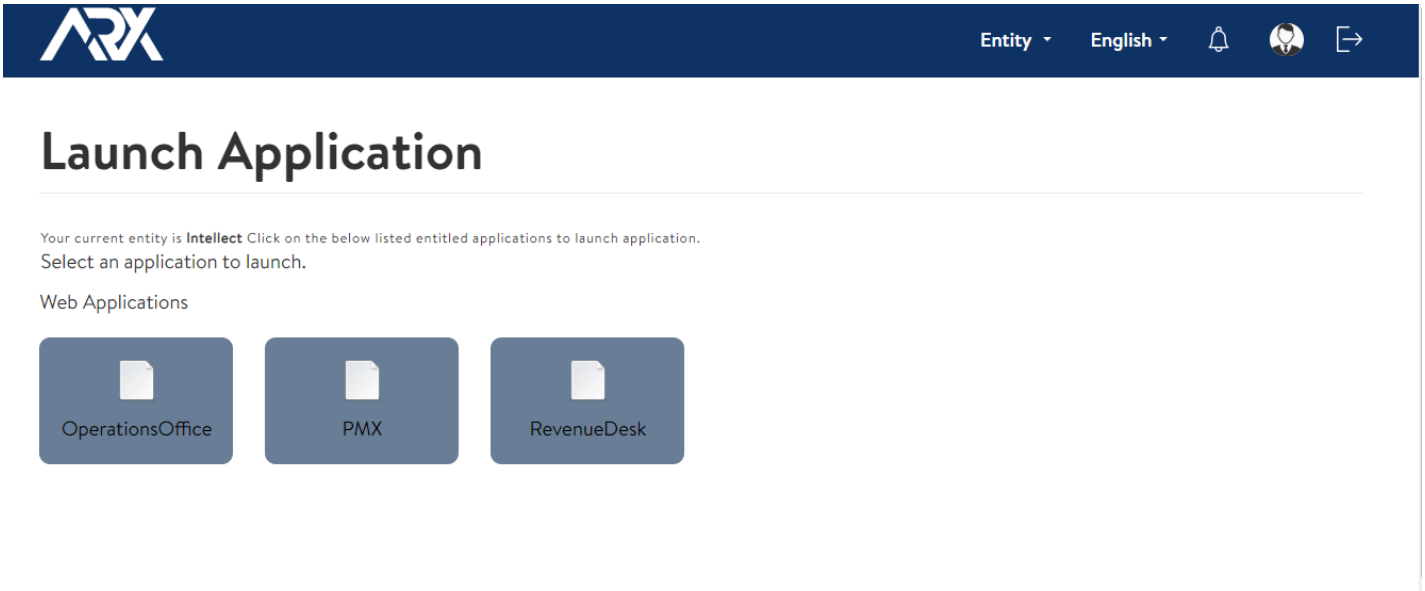
4. Process Description

4.1 Login

1. The Operation User Maker enters their credentials and logs into the application

Screen: Launch the application

2. Once logged in, the Operation User Maker clicks on "Operations Office"

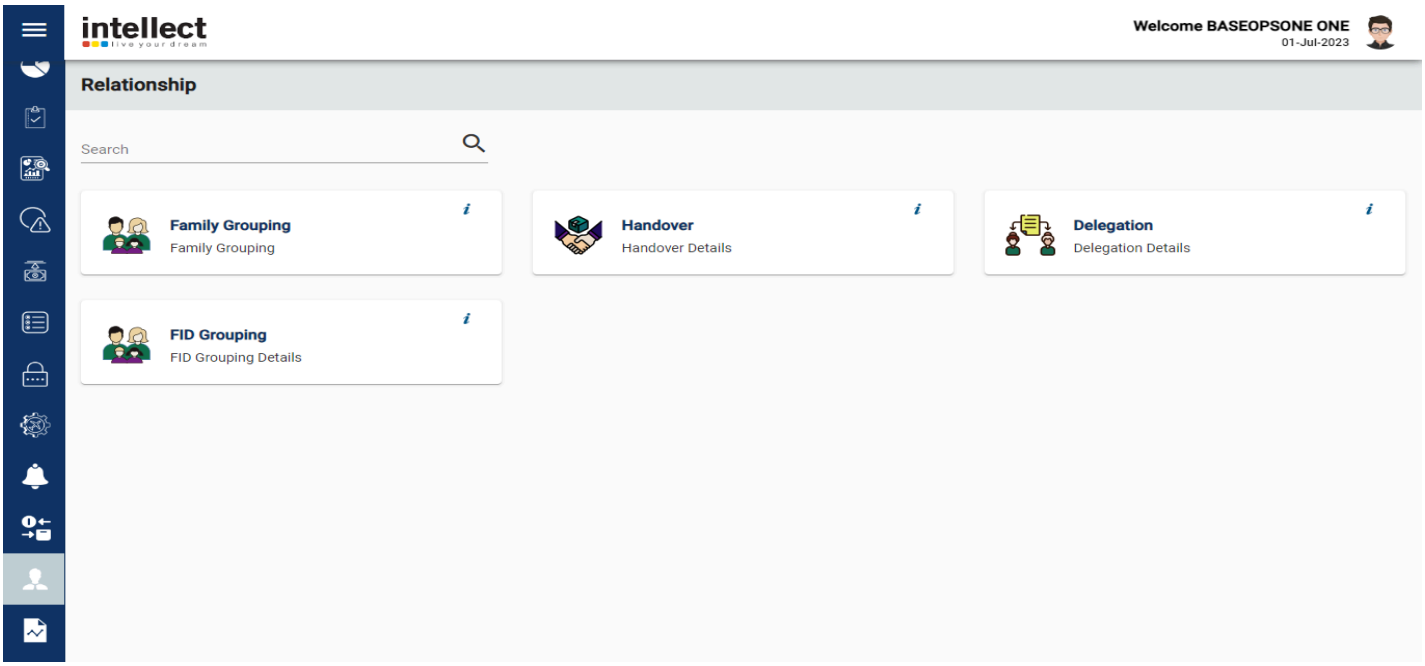


Screen: Select Operations Office

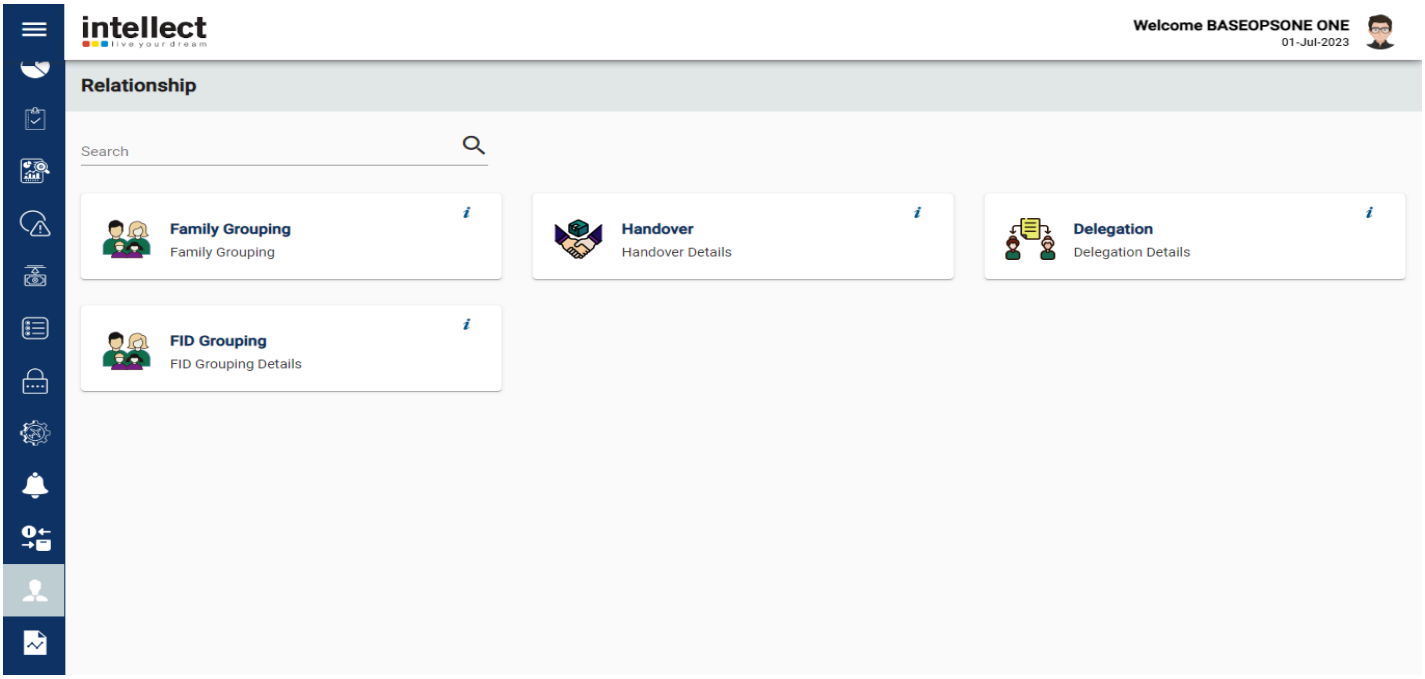
4.2 Handover

Handover can be used by Operation User to permanently assign/reassign Leads, Prospects and Customers from one RM to another. This functionality is generally used if the RM is exiting from the organization (or) customers have placed a request for change of RM for their relationship

1. After logging into Operations Office, the Operation Maker User hovers over the "Relationship" in Menu, and selects "Handover" from the Relationship Handover screen

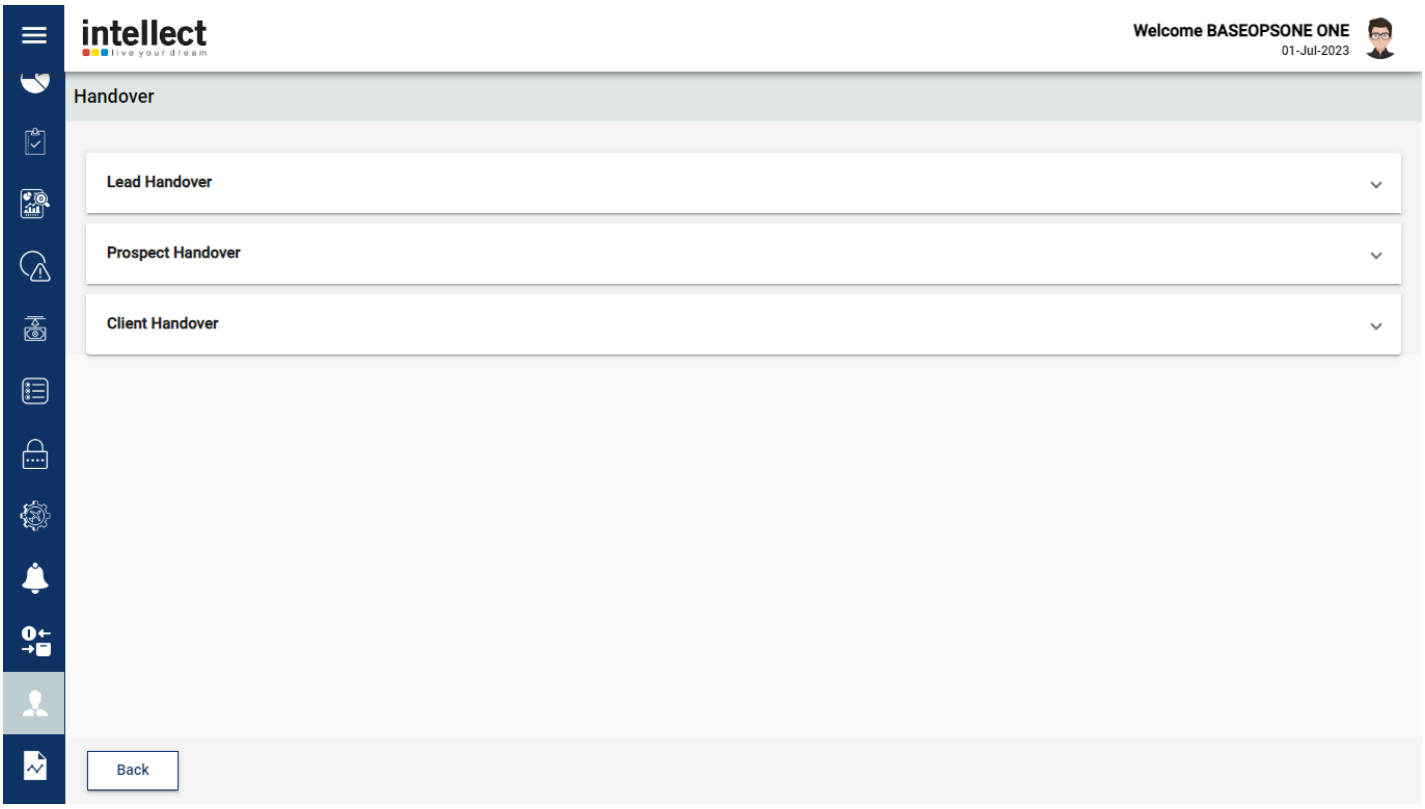


Screen: Select Relationship



Screen: Select Handover from Relationship screen

2. In the Handover screen, the Operation User Maker can view the following tabs:
    a. Lead Handover
    b. Prospect Handover
    c. Client Handover

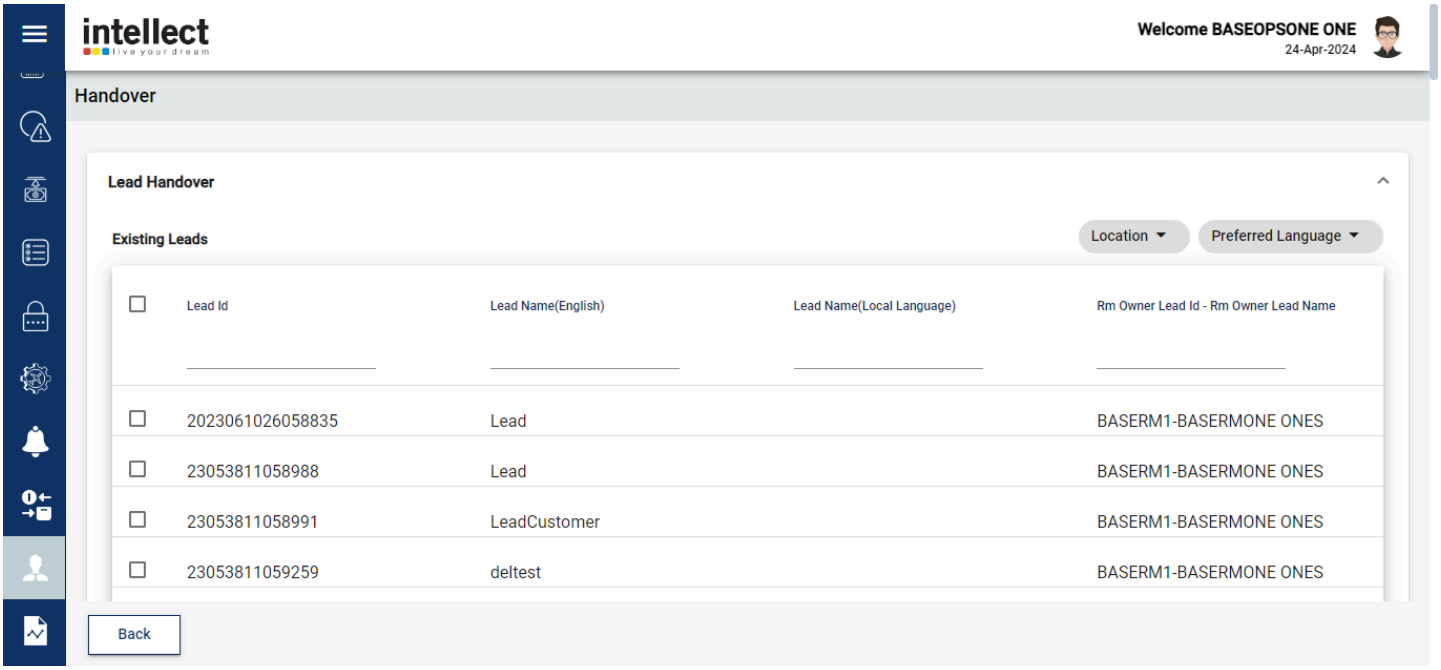


Screen: Handover screen

4.2.1 Lead Handover

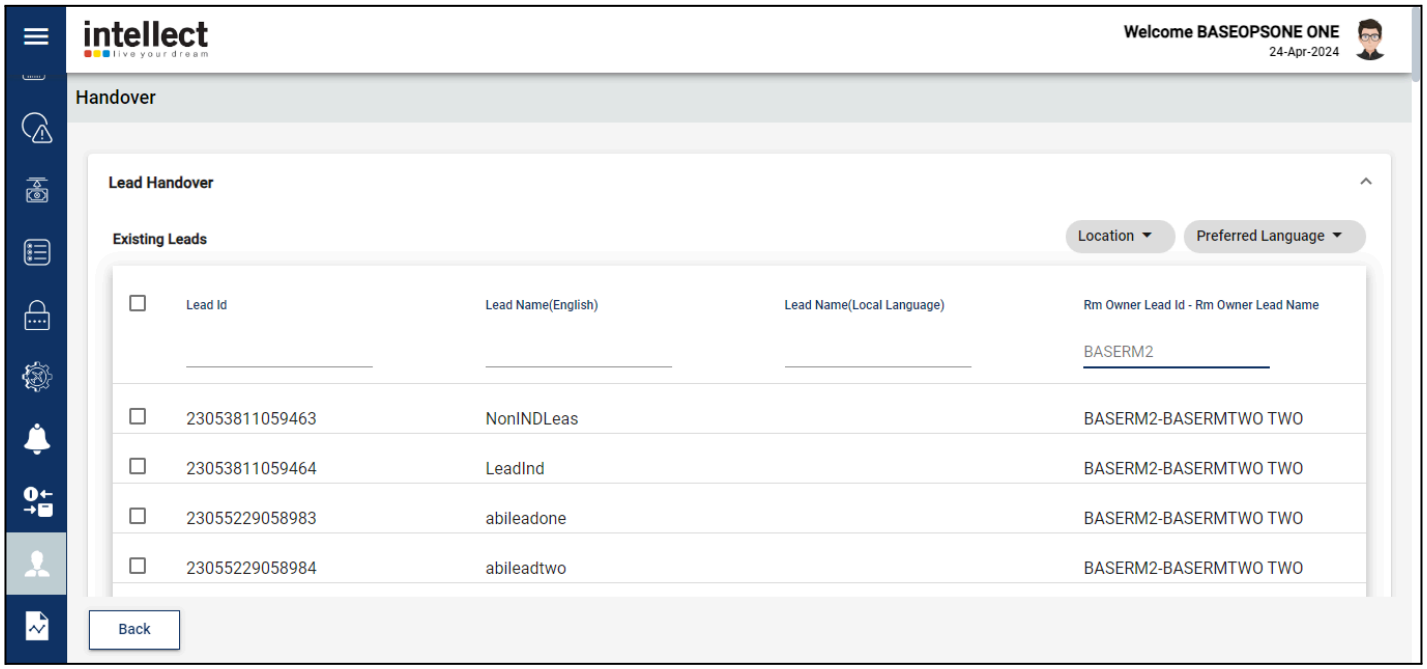
1. After selecting "Handover" from the Relationship screen, the system navigates the Operation User Maker to the Handover screen. The Operation User Maker expands Lead Handover by clicking on that section.

2. In the Lead Handover tab, the screen is divided into 3 sections:
    a. **Existing Leads** – The List of Leads that are available for assignment/re-assignment (includes active Leads for the RMs)
    b. **Selected Lead List** – The Leads selected for Handover
    c. **Incoming RM/SRM Details** – Select the Incoming RM/SRM

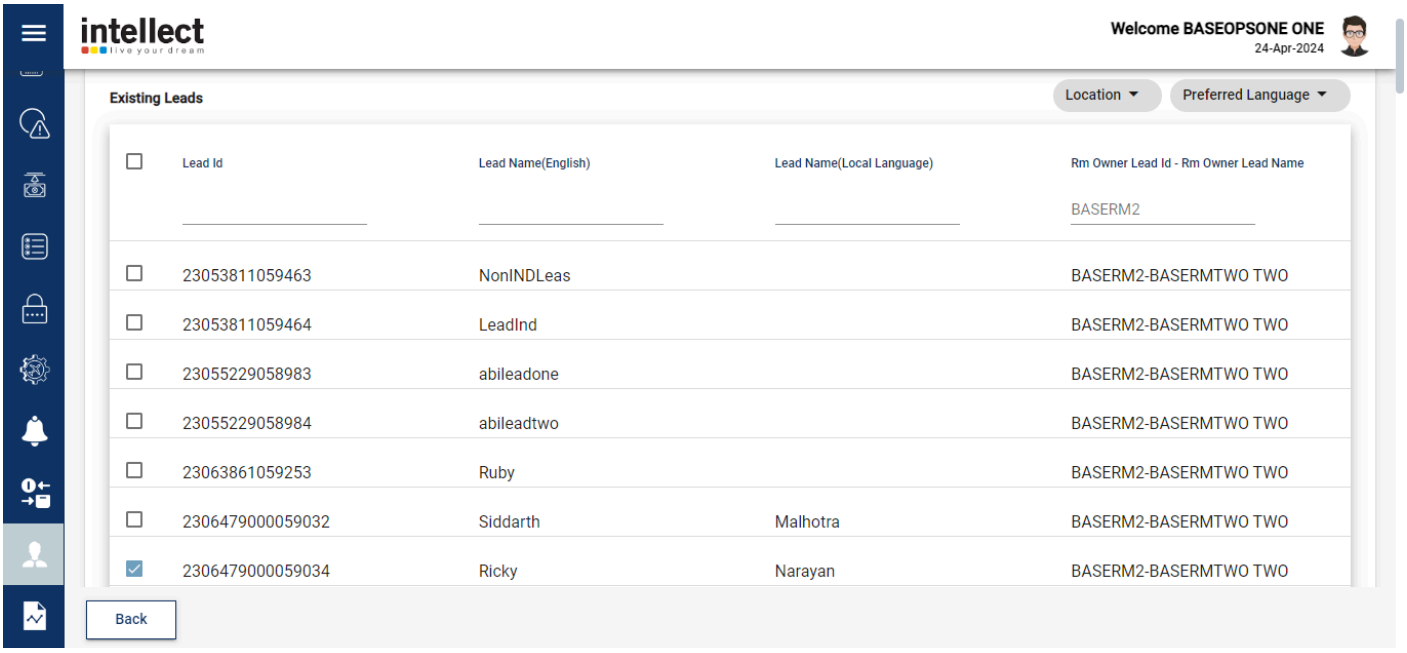


Screen: Lead Handover

3. The Operation User Maker can filter out and select multiple Leads at once in the Existing Leads section. All columns in this section are filterable. This can be done by entering the desired value in the box just below the column heading

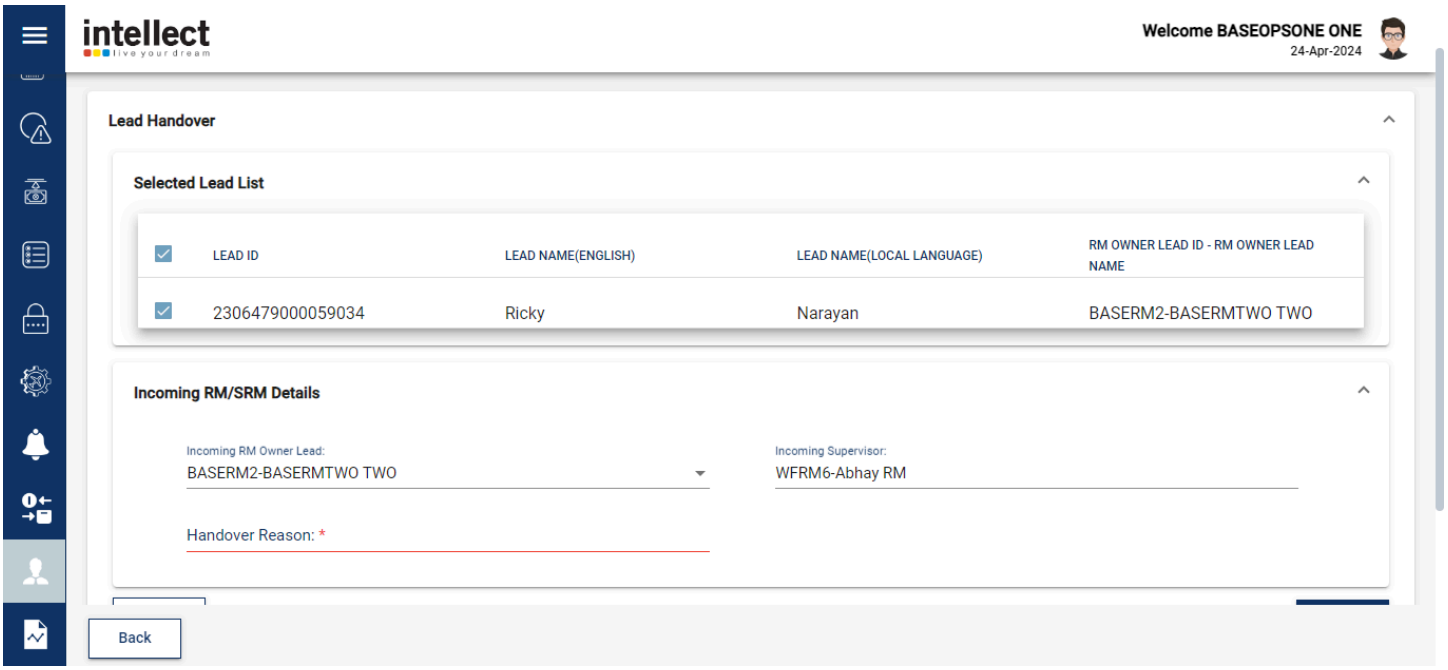


Screen: Filter out desired Leads



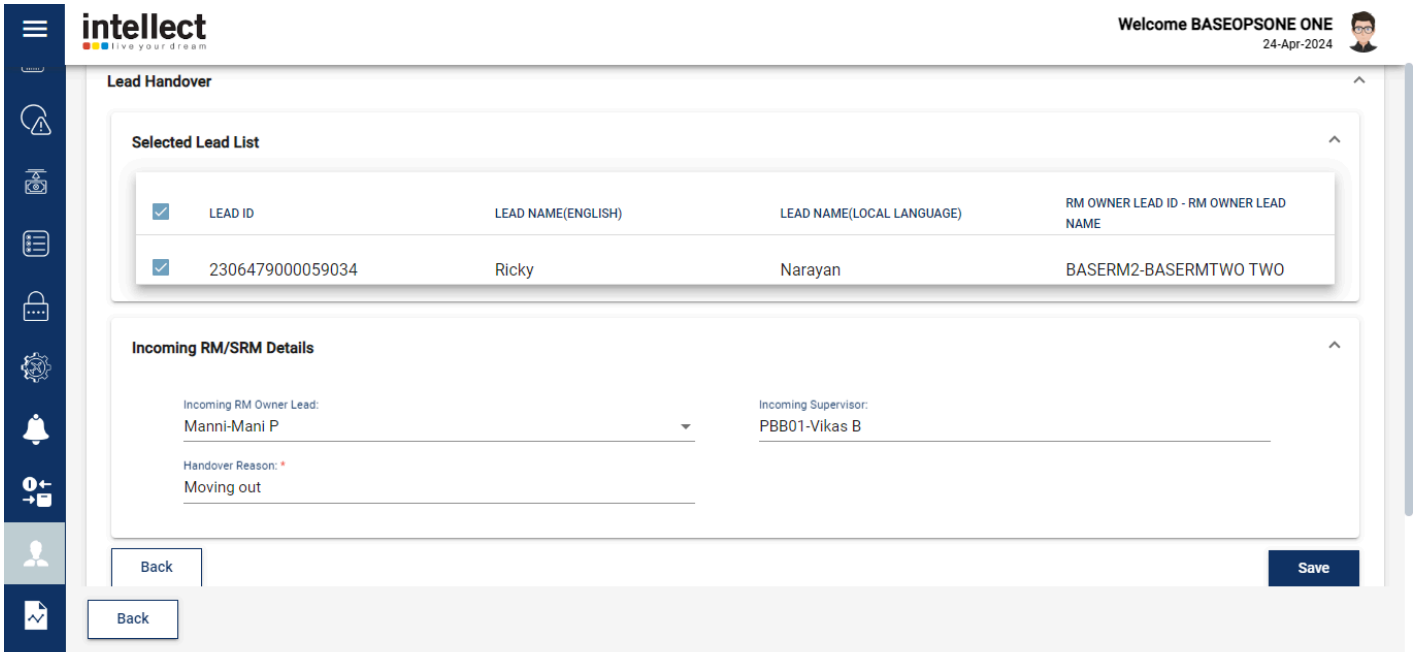
Screen: Select desired Leads

4. After selecting the desired Lead(s), the Operation User Maker can Select Leads are into the Selected Lead List section



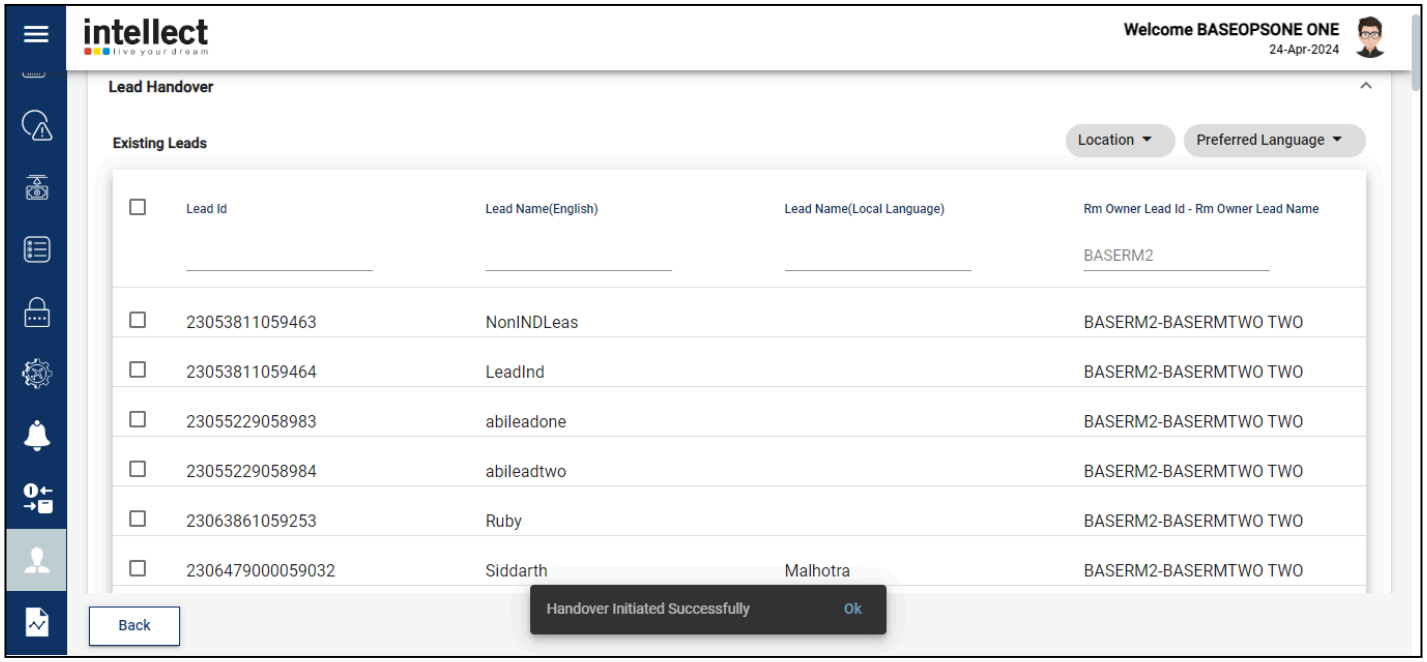
Screen: Selected Leads into the Selected Lead List Section

5. Having dropping the desired set of Leads into the Selected Lead List section, the Operation User Maker can then fill the details in the Incoming RM/SRM Details section, and enter “HandOver Reason” for Handover



Screen: Enter Incoming RM/SRM Details and HandOver Reason

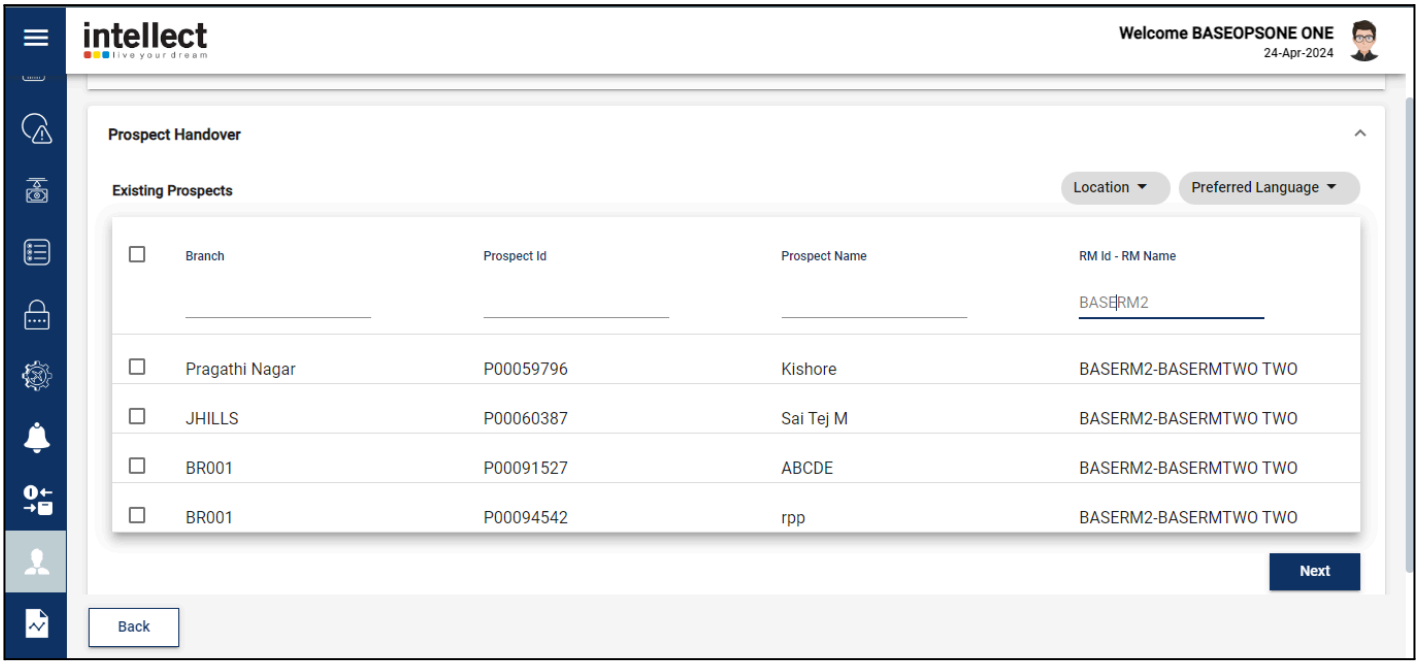
6. The Operation User Maker can then click on the “Save” button and subsequently confirm to initiate the Handover process. This is now sent for Authorization.



Screen: Save

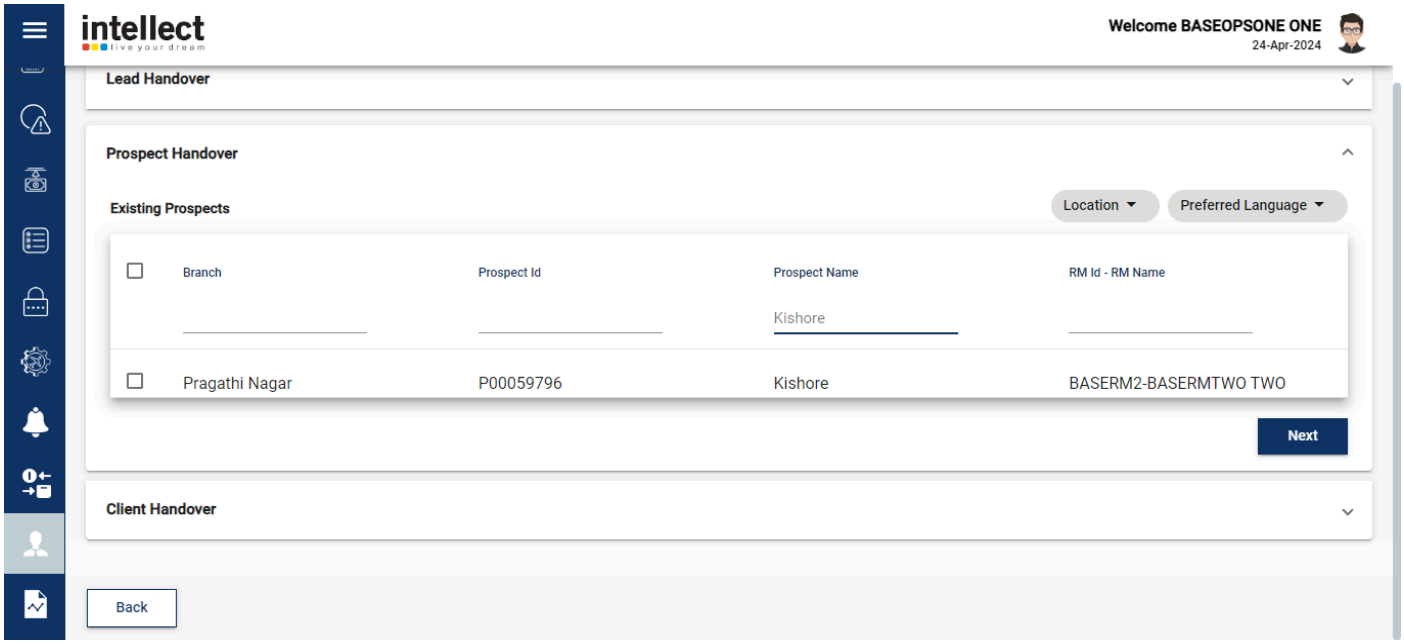
4.2.2 Prospect Handover

1. After selecting the "Handover" from the Relationship screen, the system navigates the Operation User Maker to the Handover screen. The Operation User Maker Expands the Prospect Handover tab
2. In the Prospect Handover tab, the screen is divided into 3 sections:
   a. **Existing Prospects** – The List of Prospects that are available for assignment/re-assignment
   b. **Selected Prospects List** – The Prospect selected for Handover
   c. **Incoming RM/SRM Details** – Select the Incoming RM/SRM



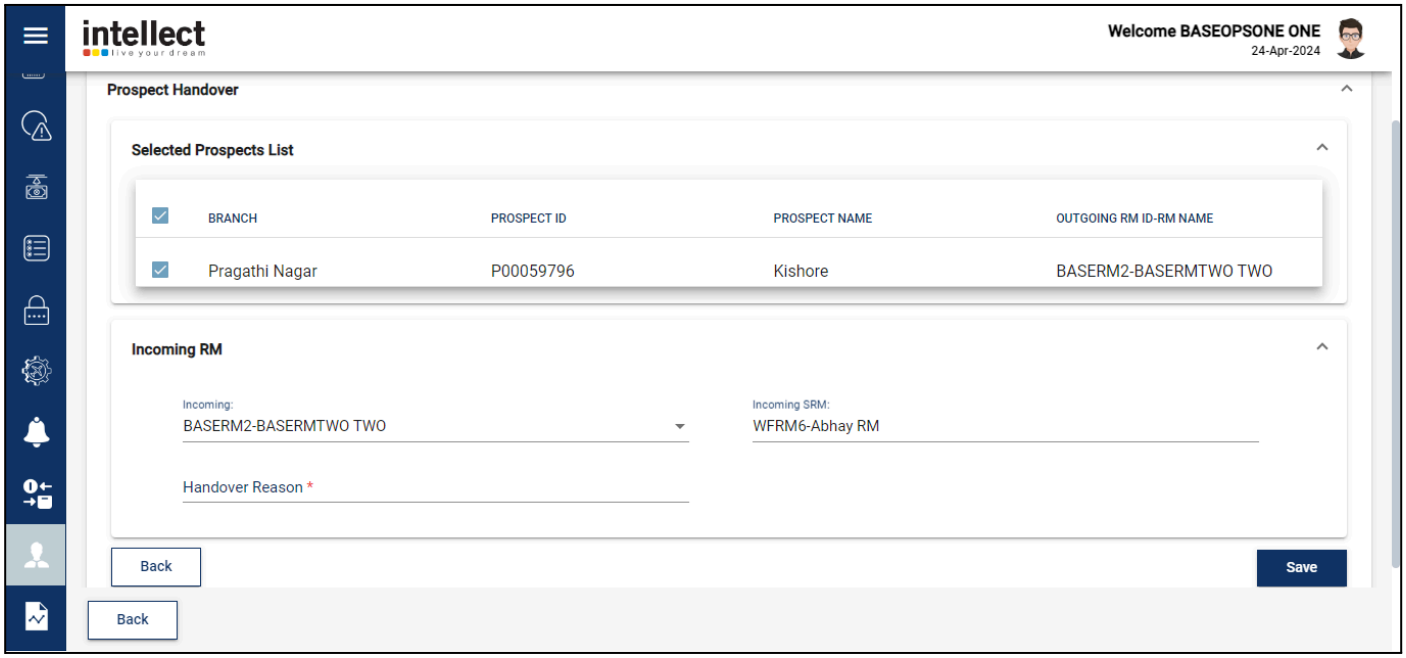
Screen: Prospect Handover

3. The Operation User Maker can filter out Prospects in the Existing Prospects section. All columns in this section are filterable (Refer to the 3rd point in Section 4.2.1 Lead Handover for details)



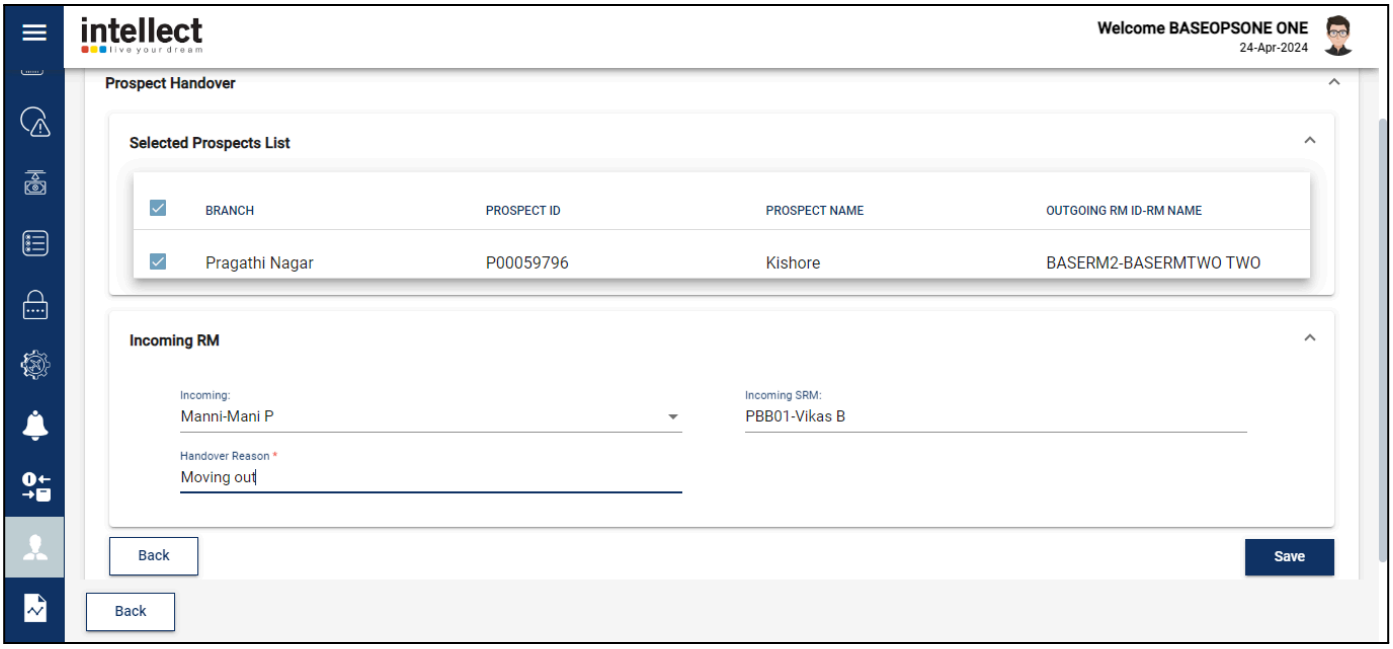
Screen: Select desired Prospect

4. After filtering out the desired Prospect, the Operation User Maker can select Prospect, selected Prospects into the Selected Prospects List section



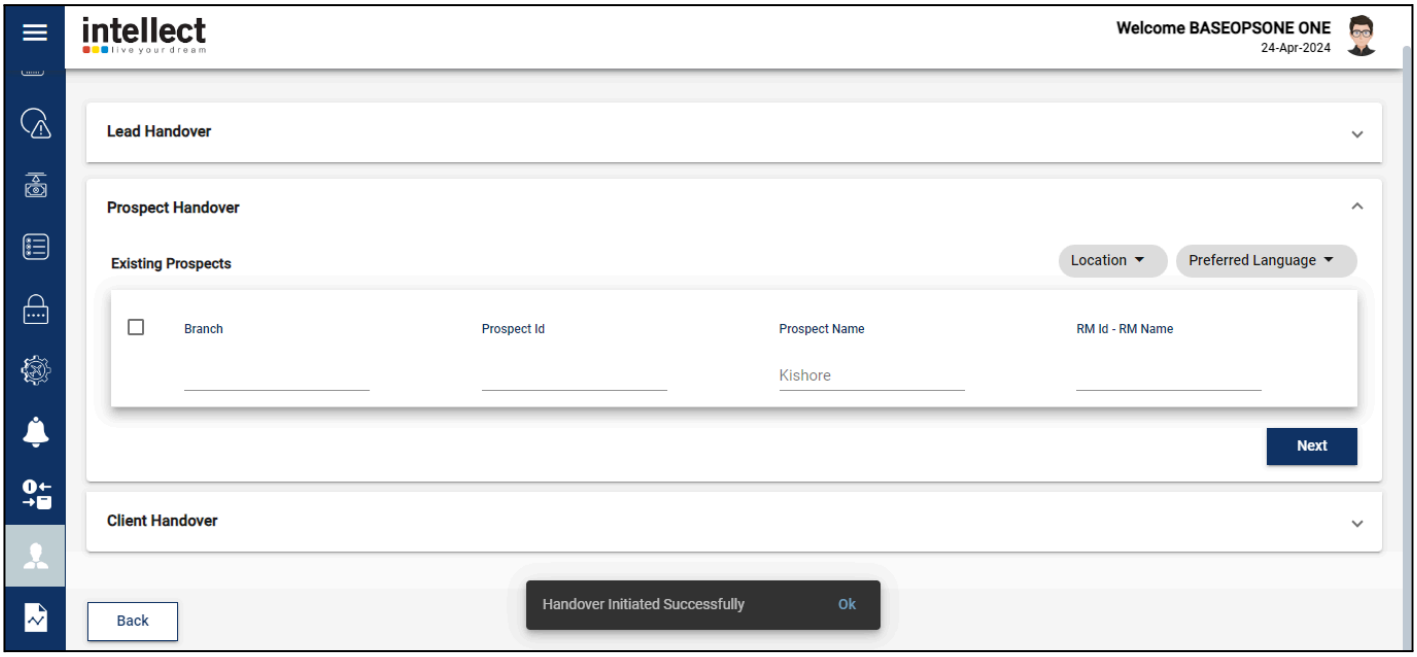
Screen: Select Prospects into the Selected Prospects List Section

5. Having the desired Prospect into the Selected Prospect List section, the Operation User Maker can then fill the details in the Incoming RM section, and click on the “HandOver Reason” button to capture the reason for Handover



Screen: Enter Incoming RM Details and Capture Handover Reason

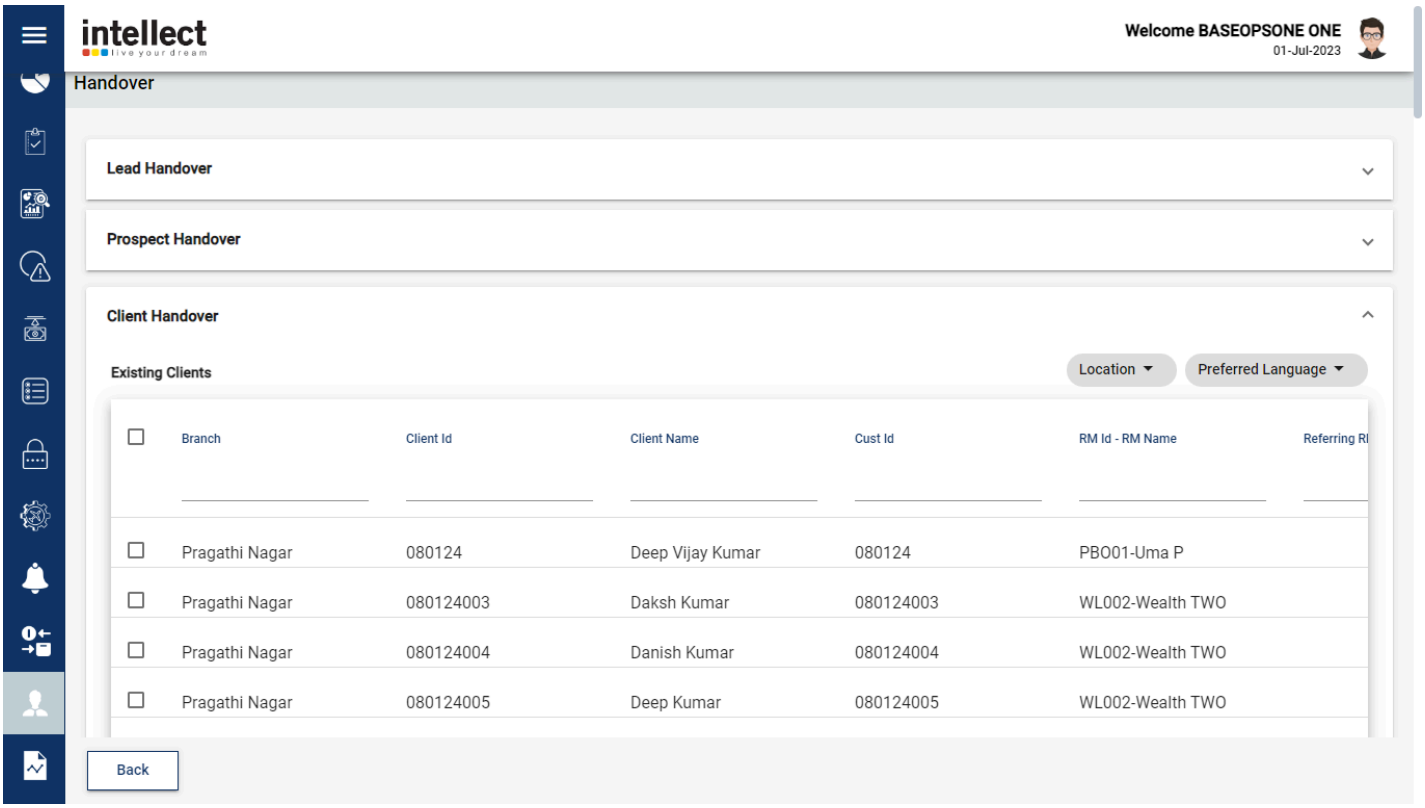
6. The Operation User Maker can then click on the "Save" button and subsequently confirm to initiate the Handover process. This is now sent for Authorization.



Screen: Save

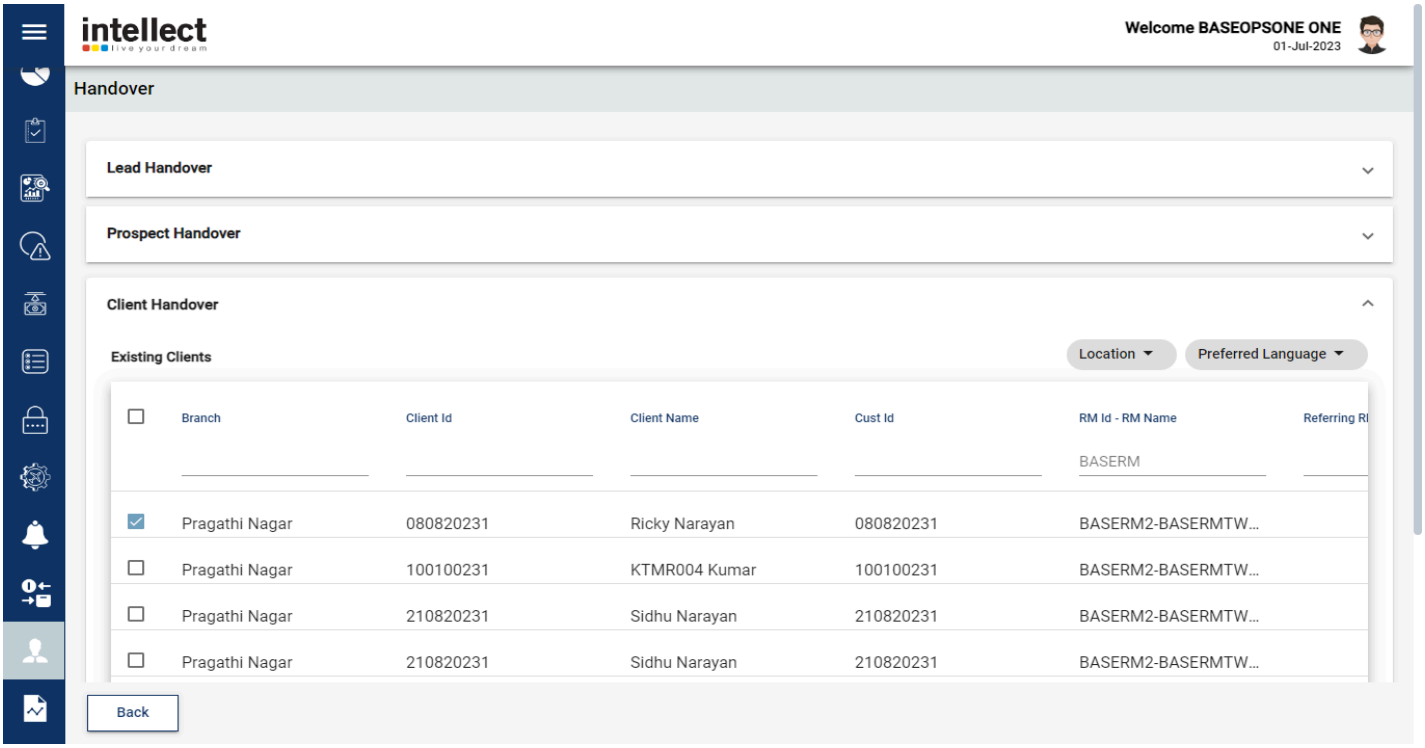
4.2.3 Client Handover

1. After selecting the "Handover" from the Relationship screen, the system navigates the Operation User Maker to the Handover screen. The Operation User Maker Expands the Client Handover tab
2. In the Client Handover tab, the screen is divided into 4 sections:
   a. **Existing Clients** – The List of Clients that are available for assignment/re-assignment
   b. **Selected Clients List** – The Client selected for Handover
   c. **Incoming RM/SRM Details** – Select the Incoming RM/SRM
   d. **Scrutiny Checklist** – Update the Status and add remarks for the Checklist



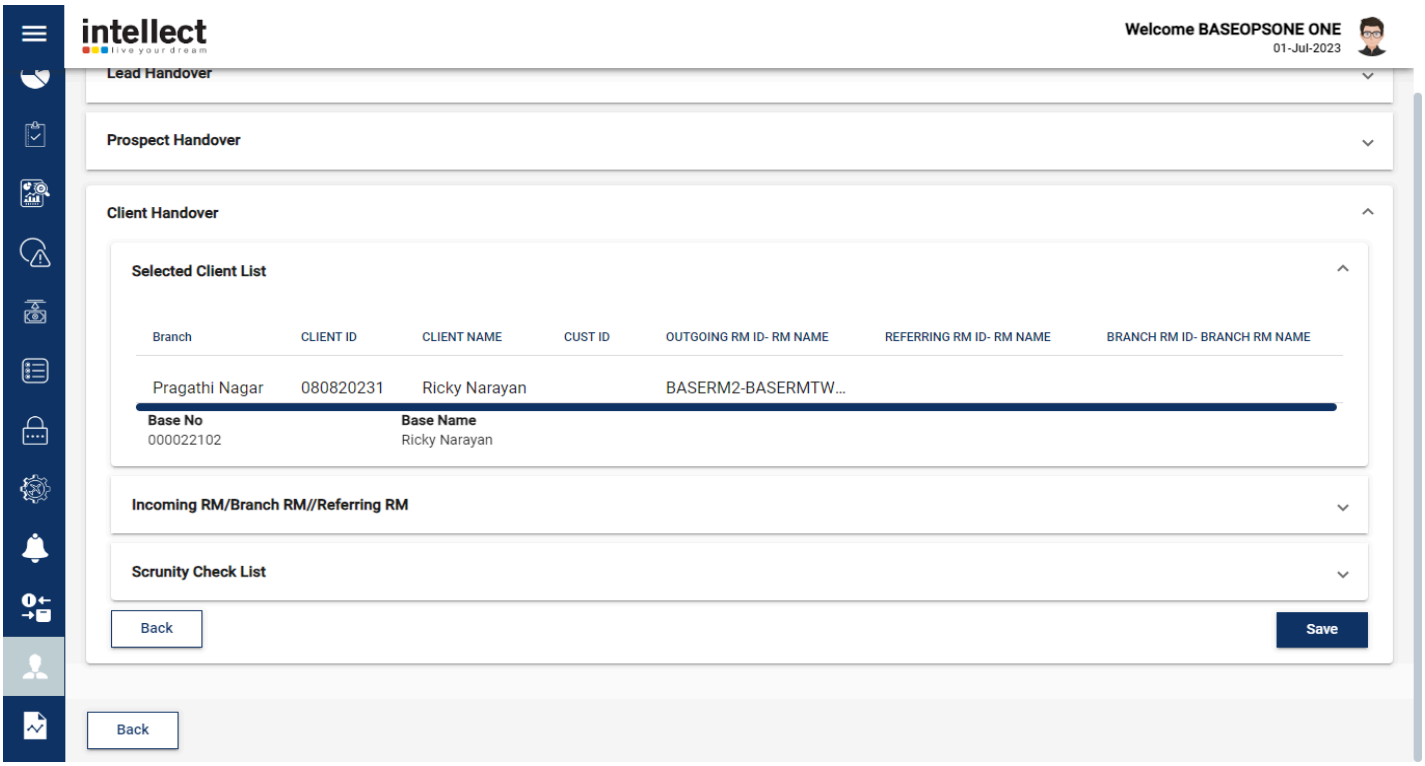
Screen: Client Handover

3. The Operation User Maker can filter out Clients in the Existing Clients section. All columns in this section are filterable (Refer to the 3rd point in Section 4.2.1 Lead Handover)



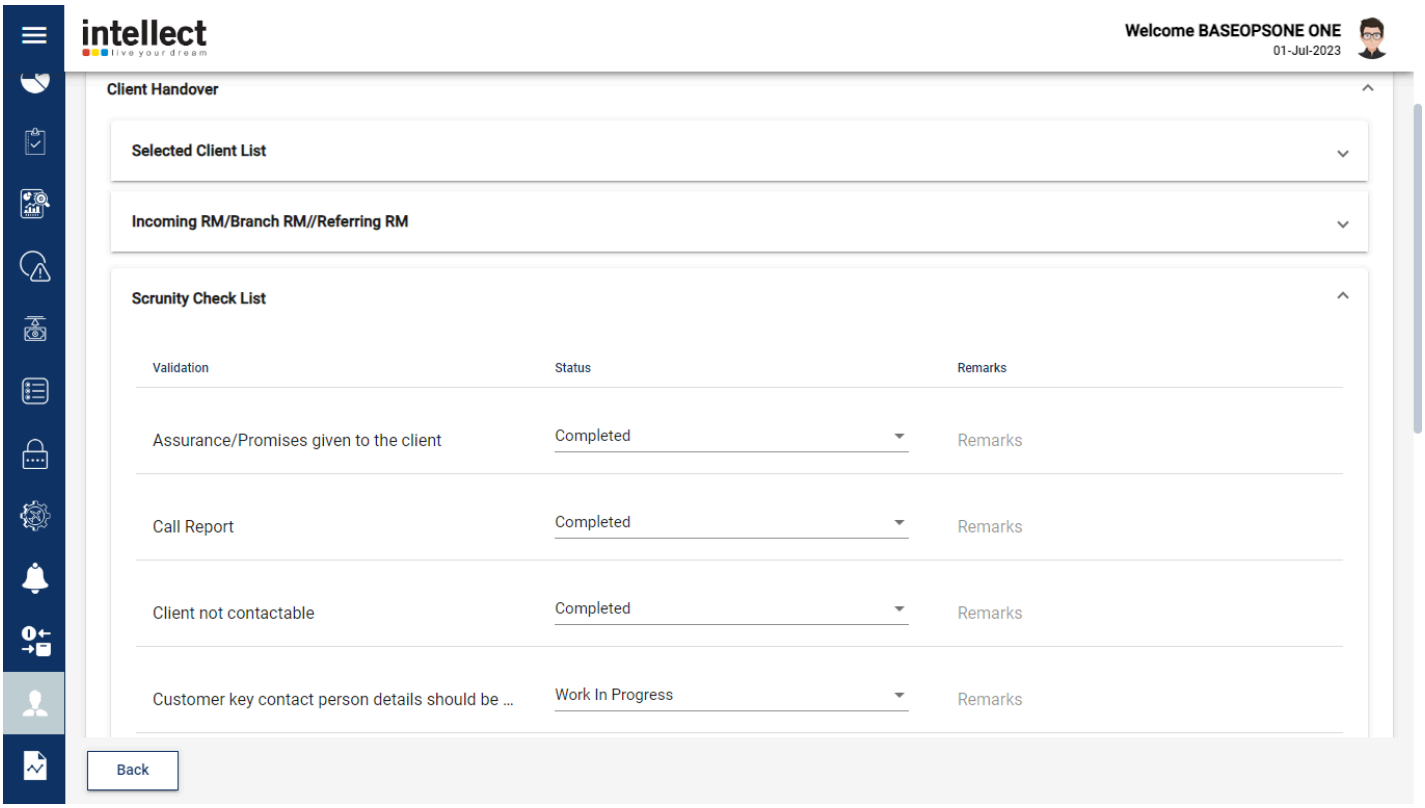
Screen: Select desired Client

4. After filtering out the desired Client, the Operation User Maker can select it, and select client into the Selected Clients List section



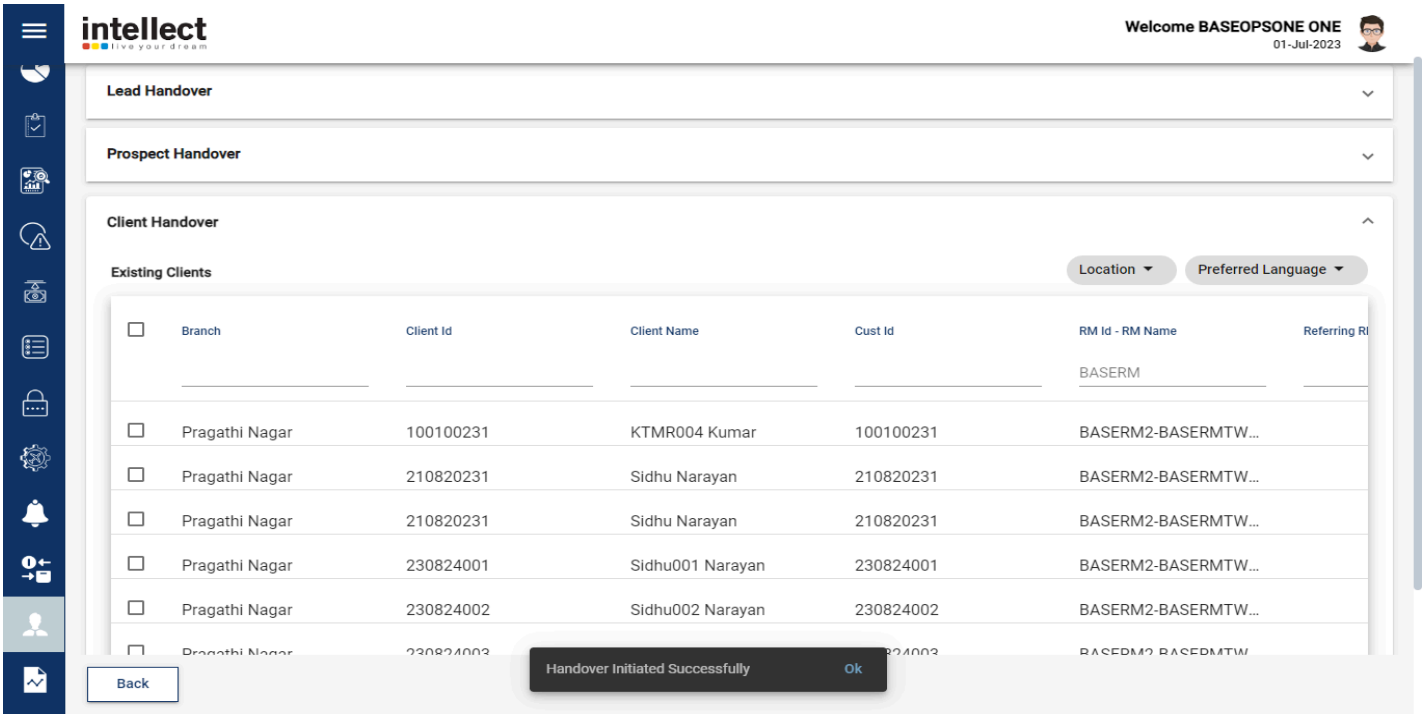
Screen: Selected Clients into the Selected Clients List Section

5. Having the desired Client into the Selected Client List section, the Operation User Maker can then fill the details in the Incoming RM/SRM Details section, enter Handover reason
6. The Operation User Maker then selects and fills details in the Scrutiny Checklist section like status and remarks for the checklist before hand over



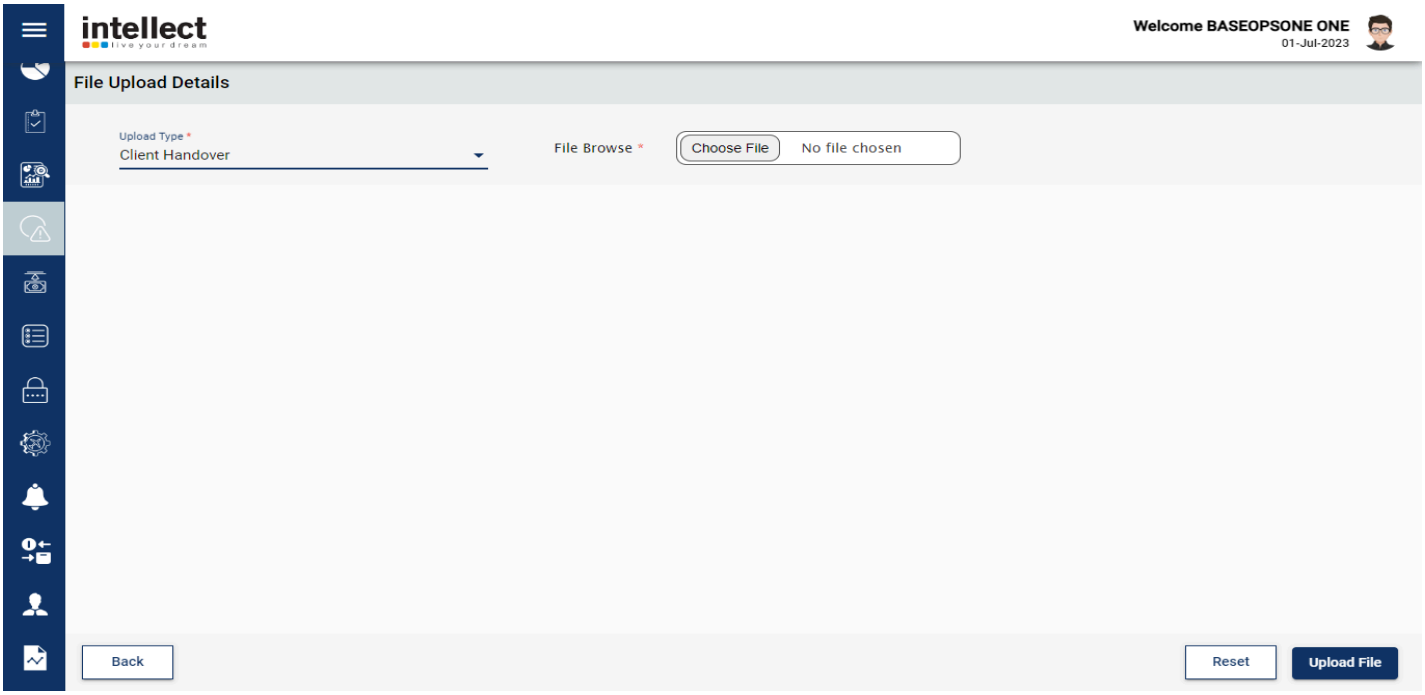
Screen: Enter Incoming RM/SRM - Details and complete Scrutiny Checklist

7. The Operation User Maker can then click on the “Save” button and subsequently confirm to initiate the Handover process. This is now sent for Authorization.



Screen: Save

7. Bulk Client Handover can be done through file upload. The user can select File Upload from Relationship menu and select upload type as Client HandOver and upload file. Once successfully uploaded, this can be viewed in the error log. Uploads don't require authorization

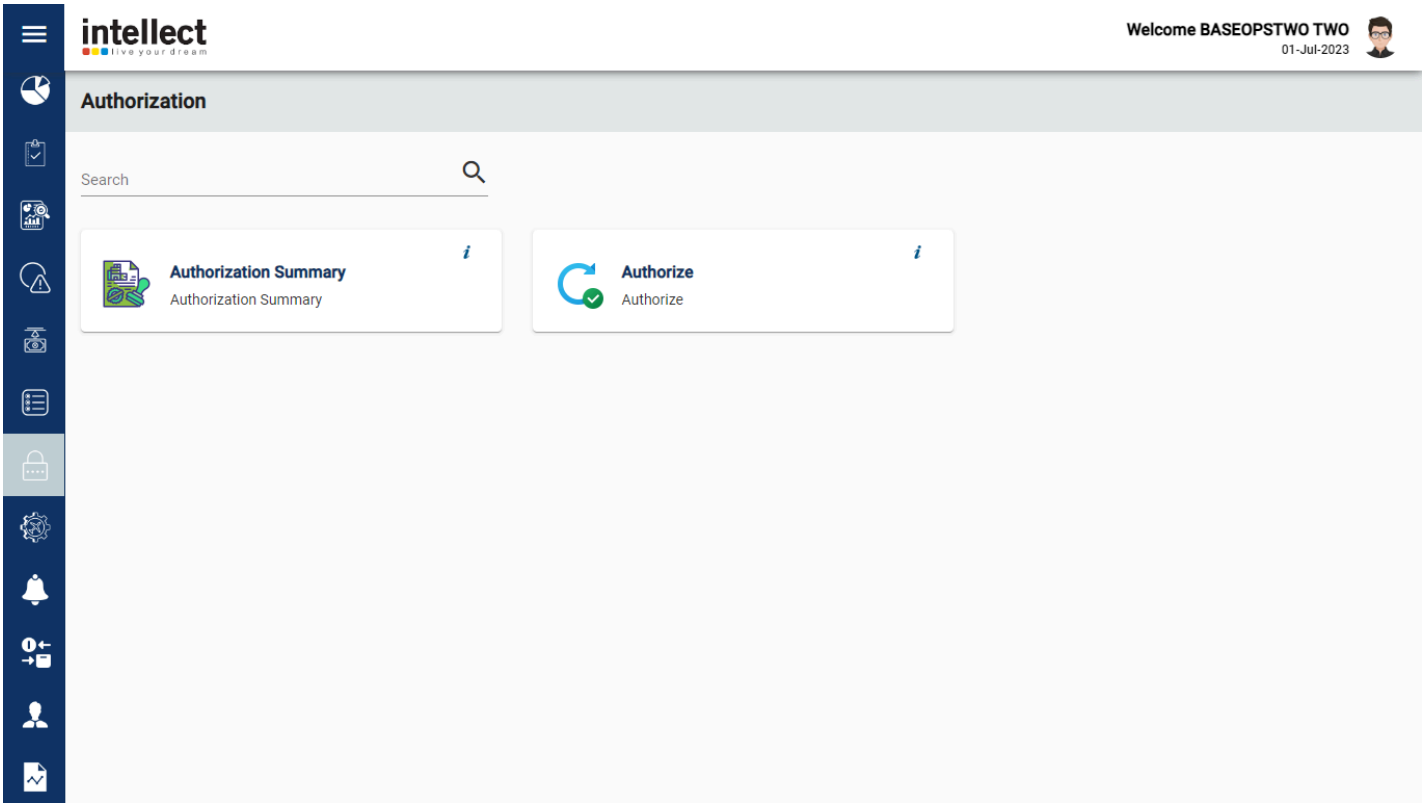


Screen: File Upload- Client HandOver

4.2.4 Authorization

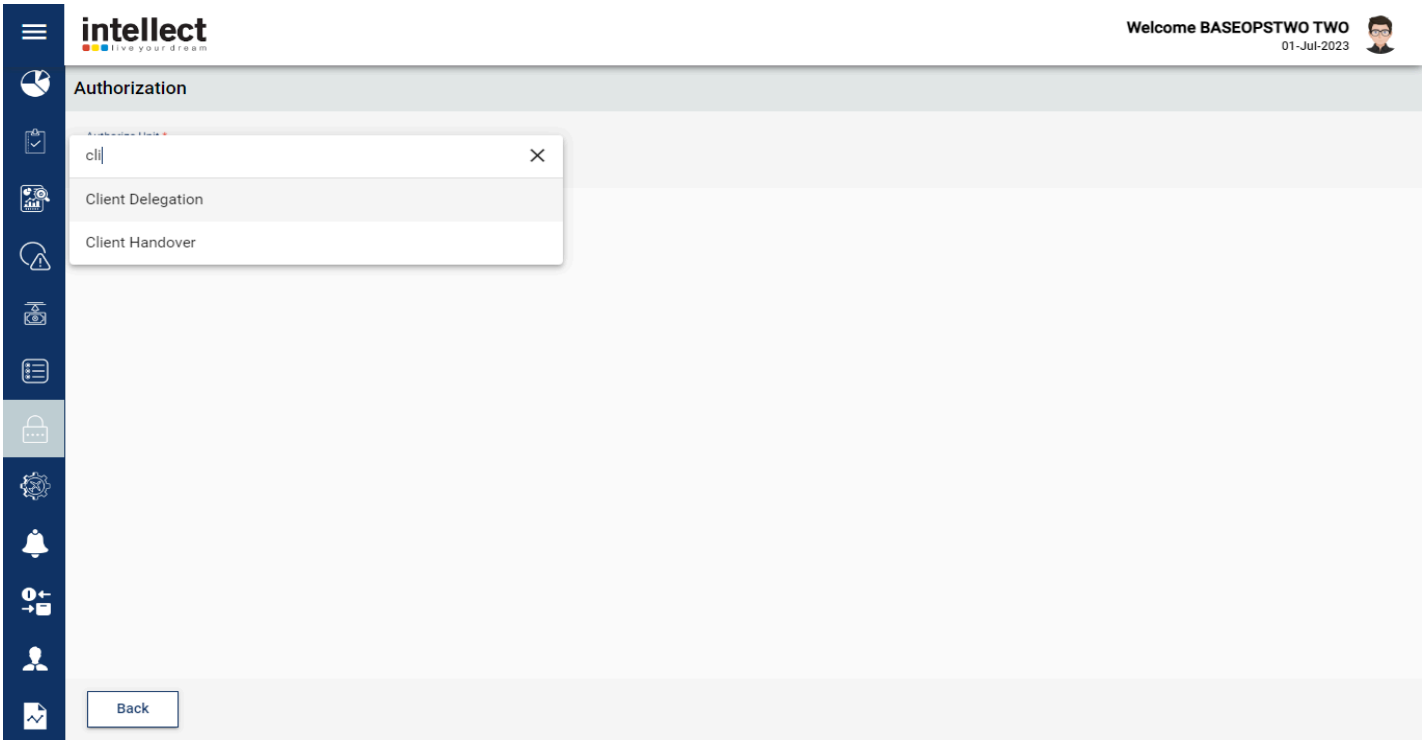
Authorization for the Handover of Lead(s)/Prospect(s)/Client is a 1 step process. All Handovers that have been initiated by the Operation User Maker would have to be approved/authorized by the Operation User Checker.

1. The Operation User Checker logs into Operation Office and clicks on the “Authorization” menu and selects the “Authorize”



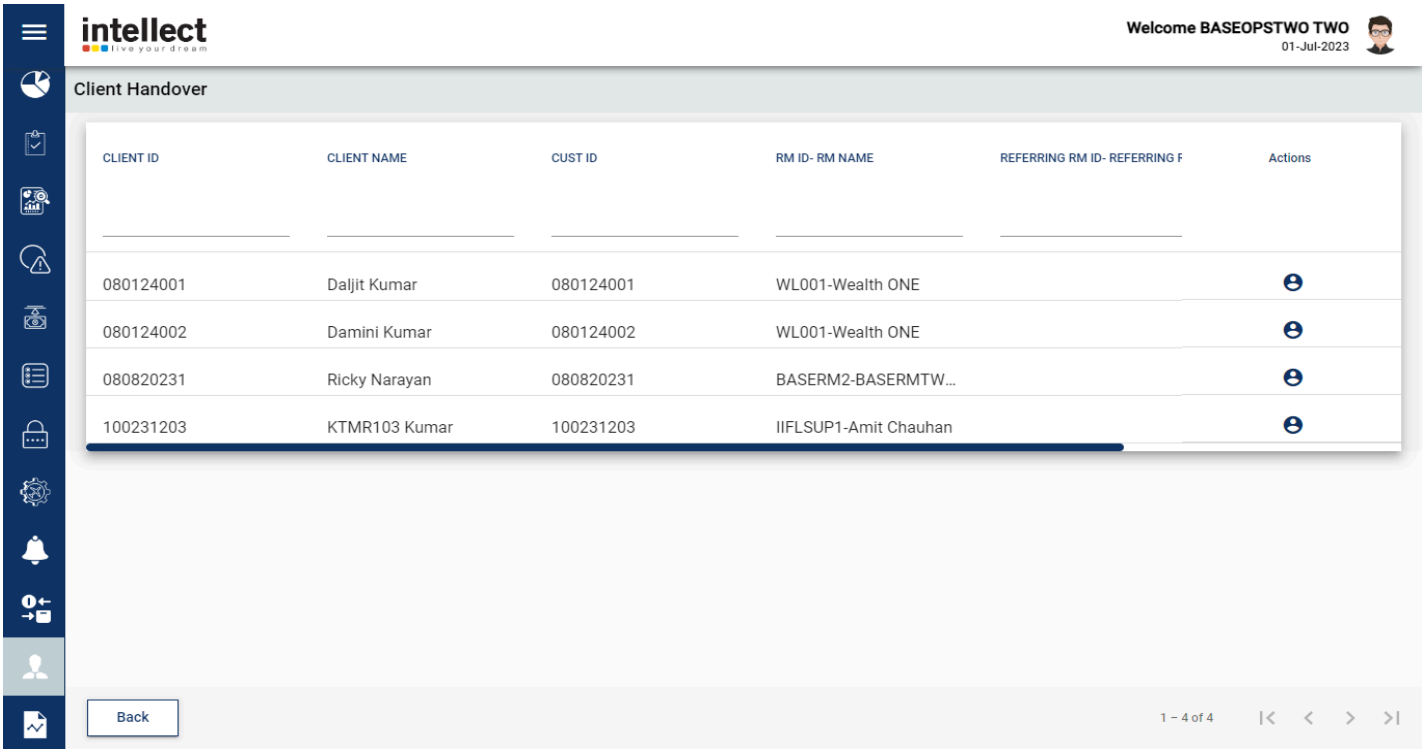
Screen: Select Authorize from the Authorization screen

2. The Operation User checker then selects the “Client Handover” option from the Authorize Unit to navigate to the Client Handover Authorize/Reject screen



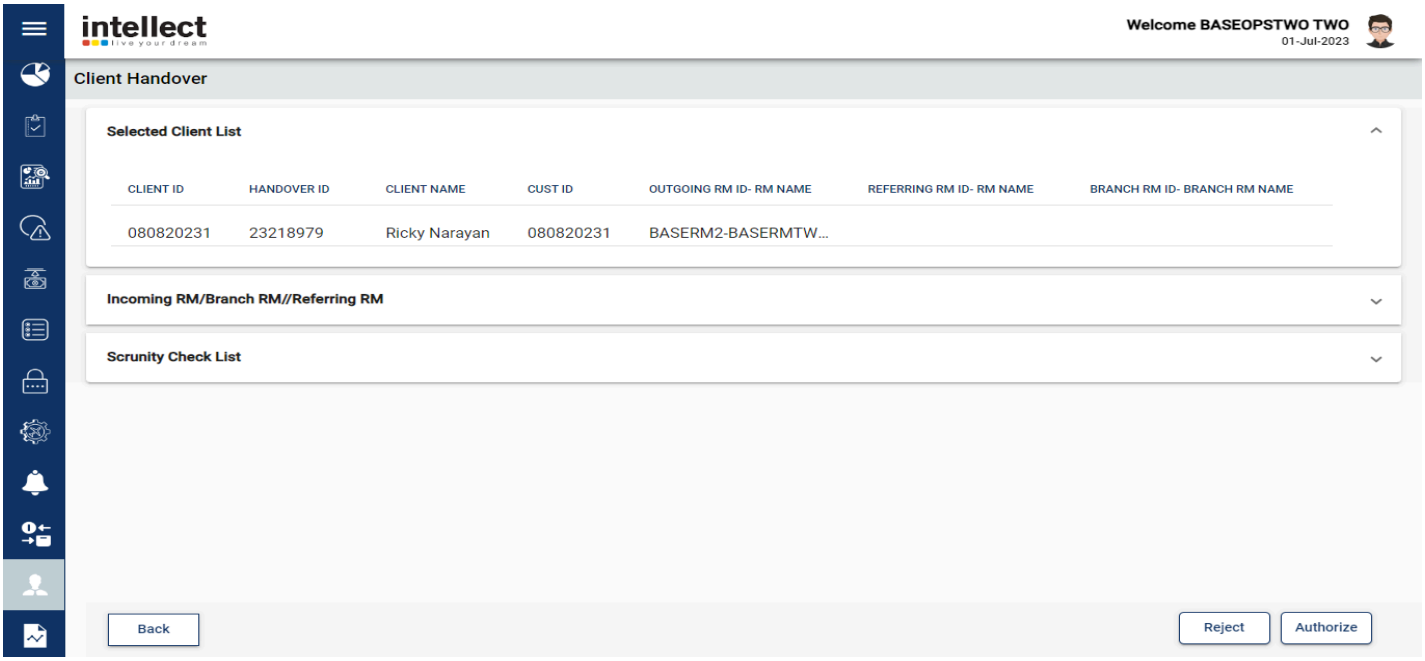
Screen: Select Client Handover

3. In the Authorize Client Handover screen, the Operation User checker can click on Authorize/Reject for the specific record that they wish to

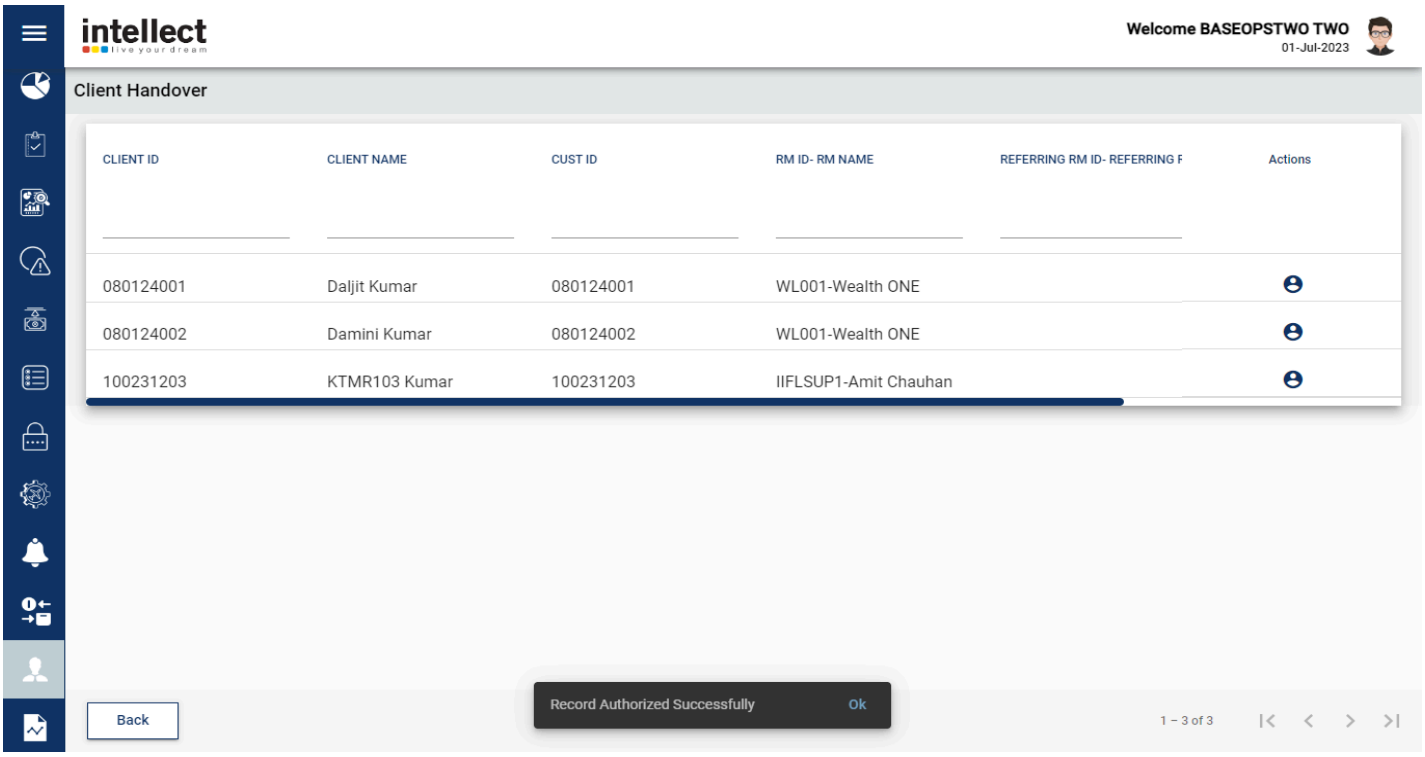


Screen: Click on Authorize/Reject for the desired record

4. The Operation User checker can now view the details of the Handover, and click on the “Authorize” button to successfully authorize the record once they are satisfied

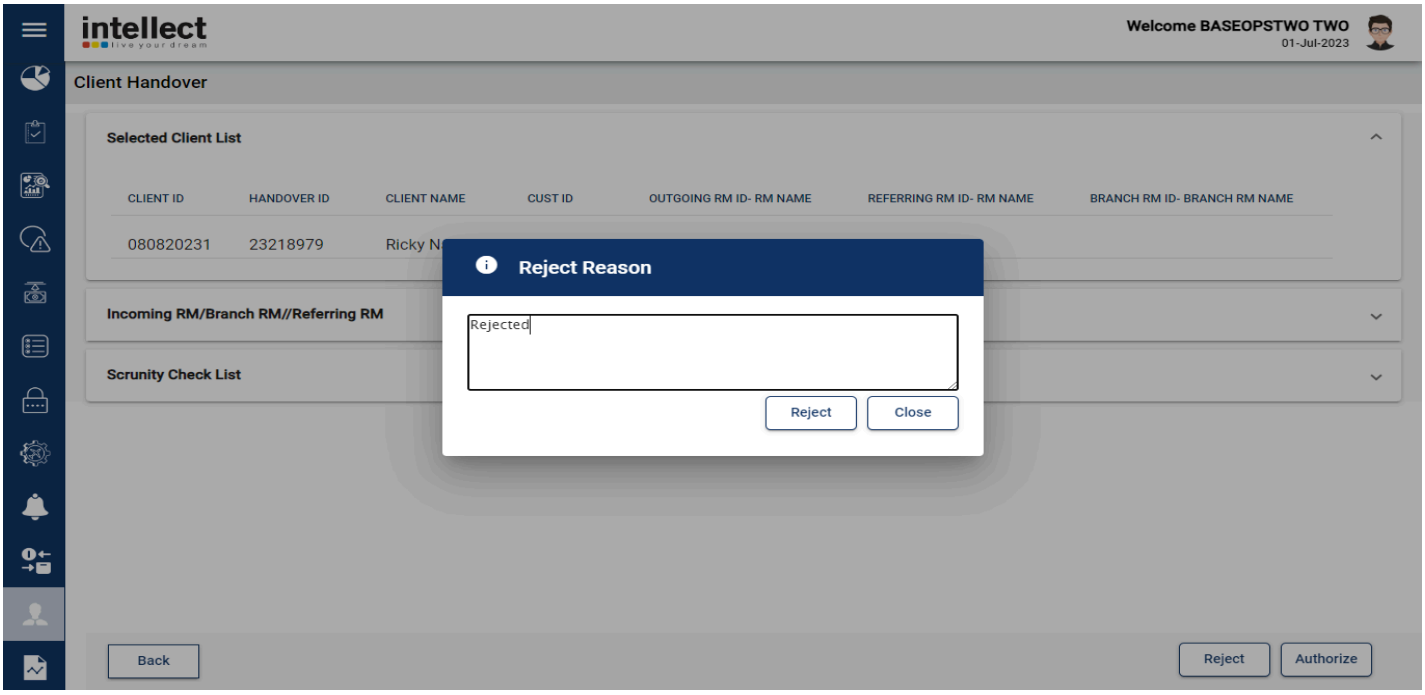


Screen: Click on Authorize



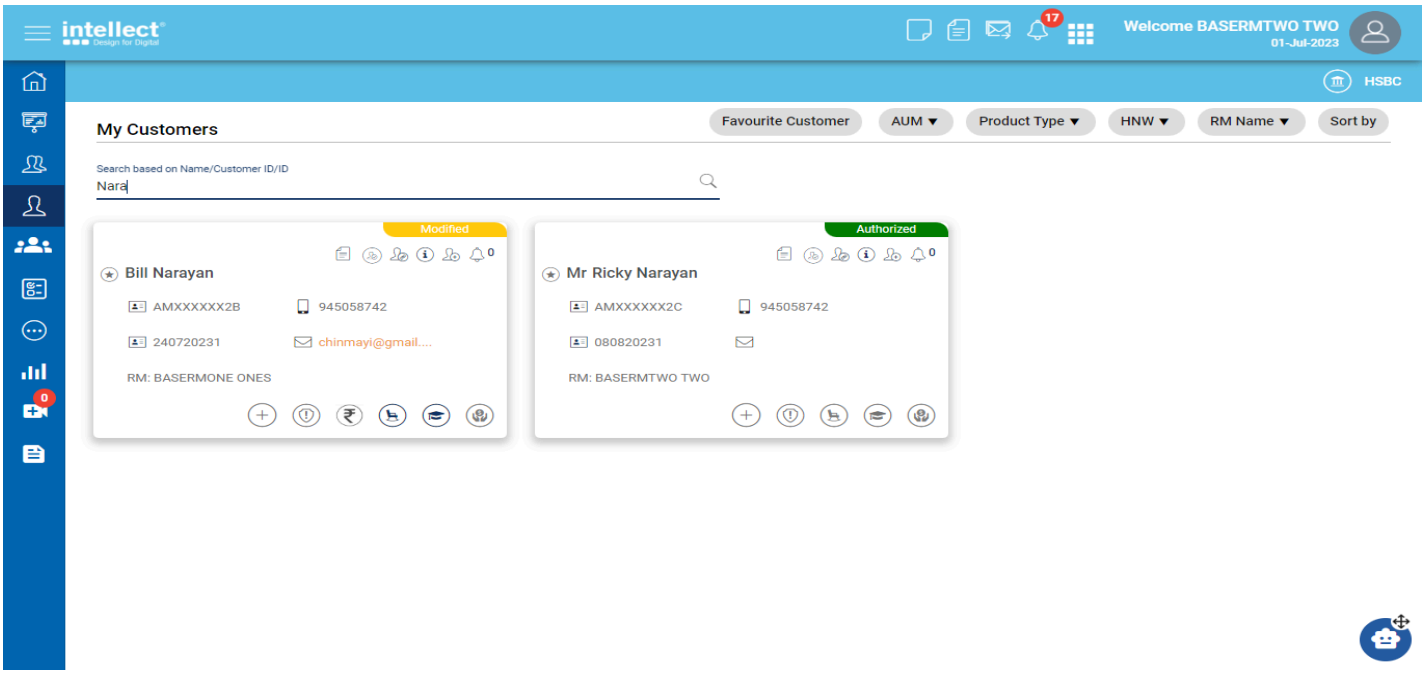
Screen: Record Authorized Successfully

5. In case the Operation User checker wants to reject the record, they can do so by clicking on the “Reject” button, providing the Reject Reason in the subsequent overlay, and then clicking on the “Reject” button on the overlay



Screen: Reject Record

6. The Handover process is now complete, and the Incoming RM can view the Handed over clients in their list of customers in My Customers/Customer Workspace



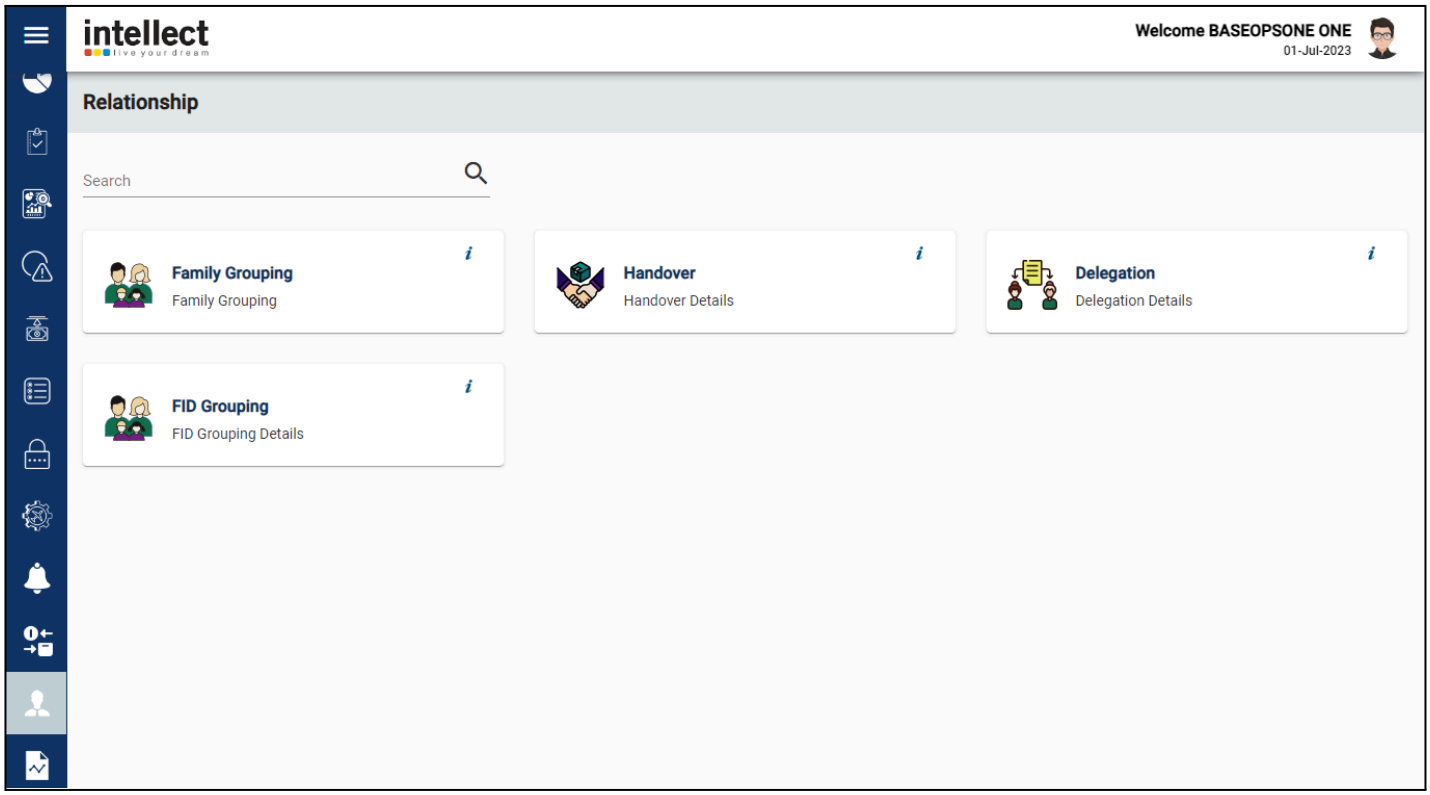
Screen: View the Handed over Customer in My Customers/Customer Workspace

Note: The Handover Approval Process for Leads and Prospects works in the exact same way as Client Handover. They both would have to select the Lead Handover and Prospect Handover options from the Authorize screen to Authorize Leads and Prospects respectively. The rest of the process is the same as the Approval for Handover of Clients as illustrated above

4.3 Delegation

Delegation can be used by Operation User Maker to temporarily assign/reassign Leads, Prospects and Customers from one RM to another, both of whom report to the same Operation User Maker. This functionality is generally used if the RM is going on a vacation and would need another RM to continue the relationship with customers. **Delegations are auto-authorized in the system**

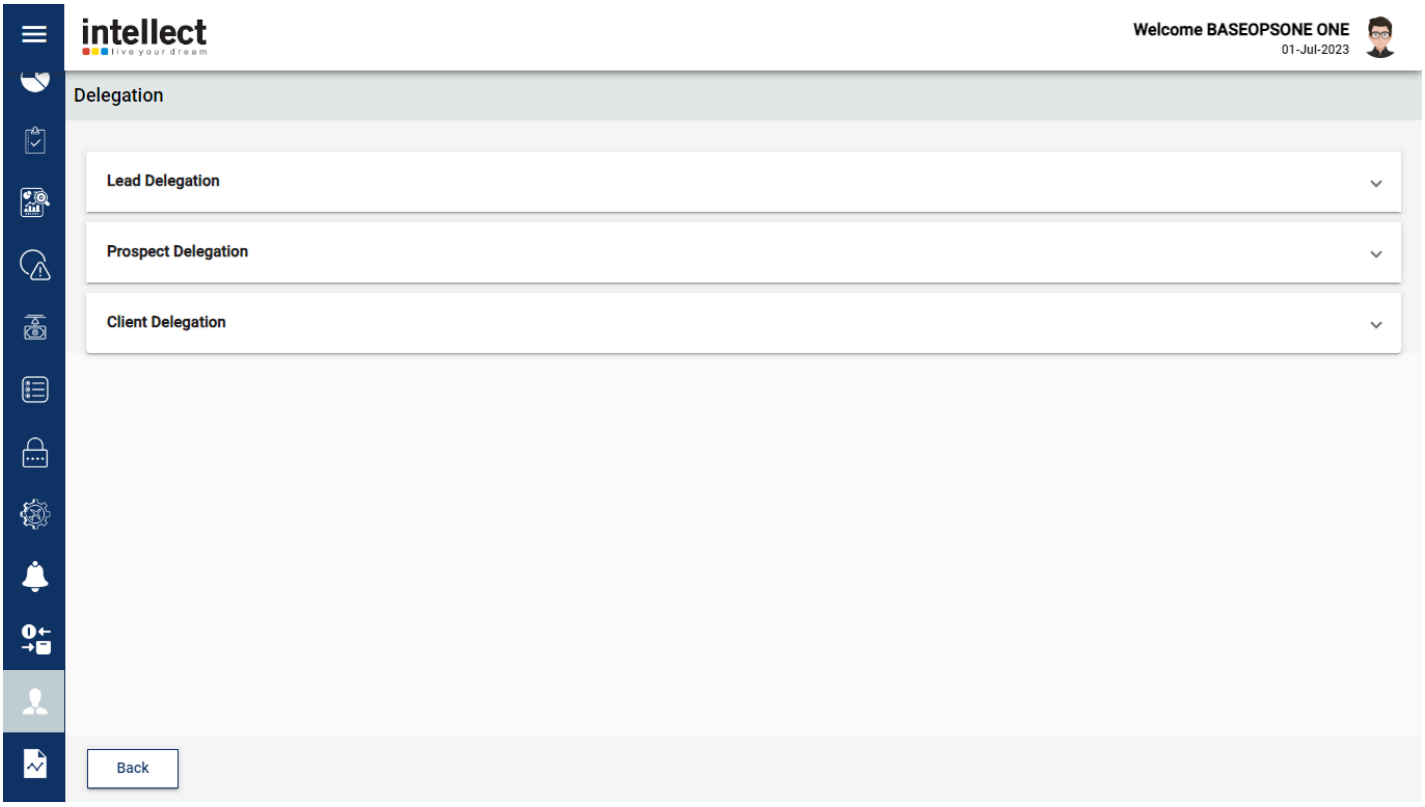
1. After logging into Operations Office, the Operation User Maker hovers over the "Relationship" menu option, and selects "Delegation" to navigate to the Delegation screen



Screen: Select Delegation

2. In the Delegation screen, the Operation User Maker can view the following tabs:

   a. Lead Delegation
   b. Prospect Delegation
   c. Client Delegation

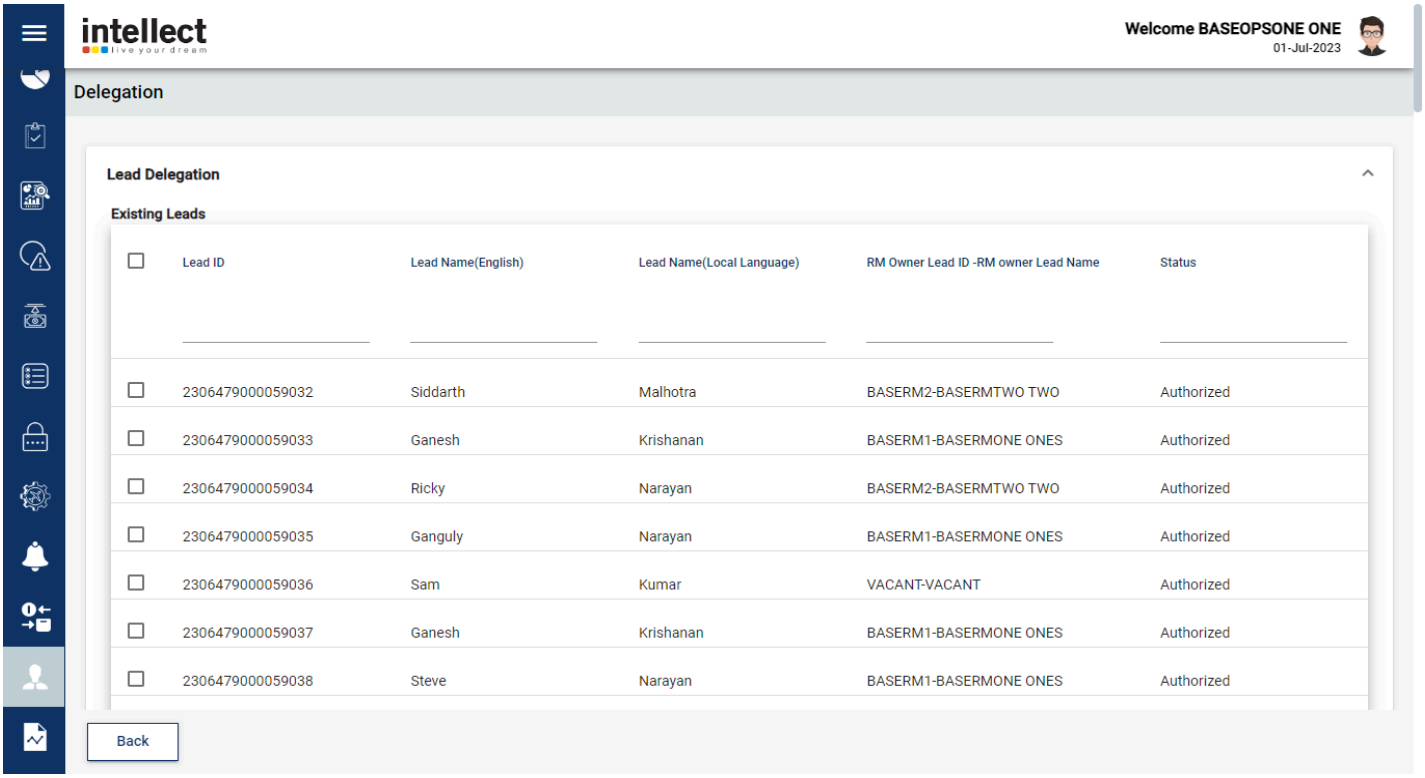


Screen: Delegation screen

4.3.1 Lead Delegation

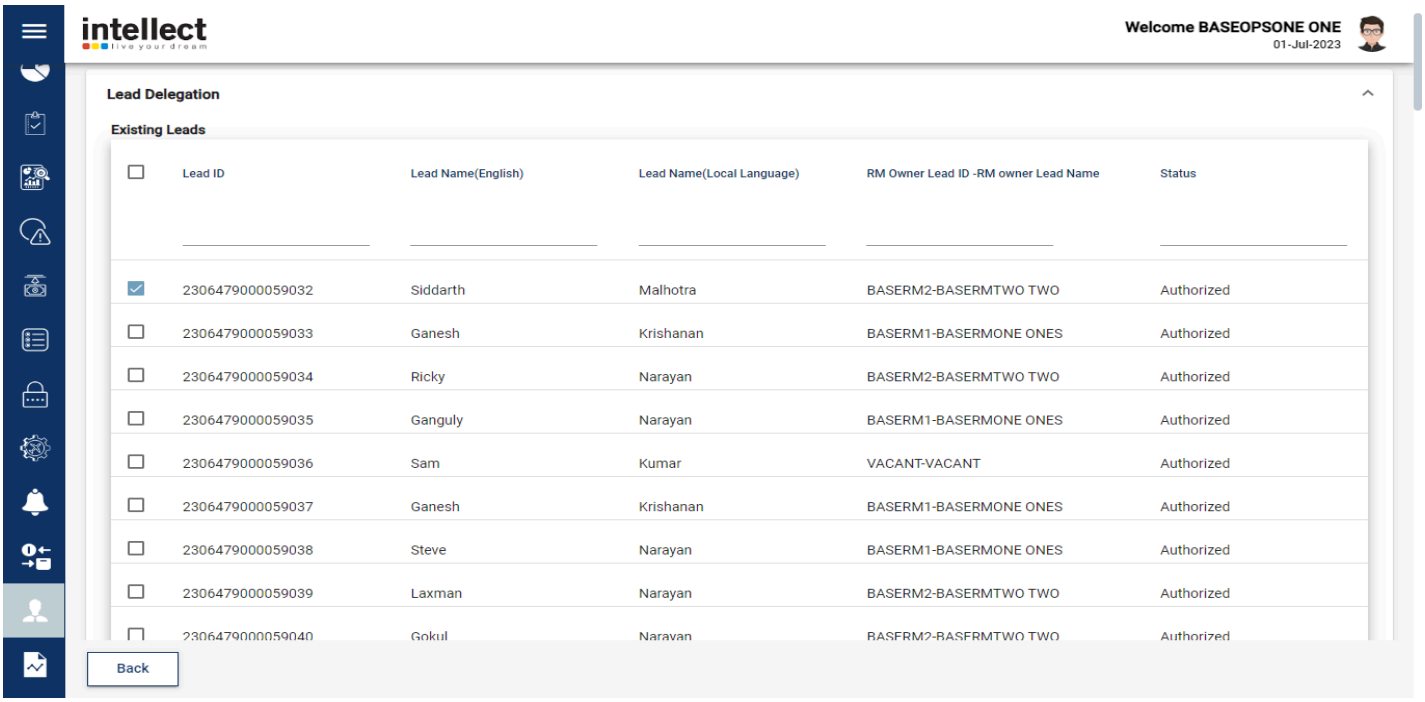
1. After selecting the "Delegation" option from the dropdown, the system navigates the Operation User Maker to the Delegation screen. The user can expand the Lead Delegation section by clicking on it
2. In the Lead Delegation tab, the screen is divided into 3 sections:

    a. **Existing Leads** – The List of Leads that are available for assignment/re-assignment (includes active Leads for the RMs)
    b. **Selected Lead List** – The Leads selected for Delegation
    c. **Delegation Details** – Enter Delegation Details



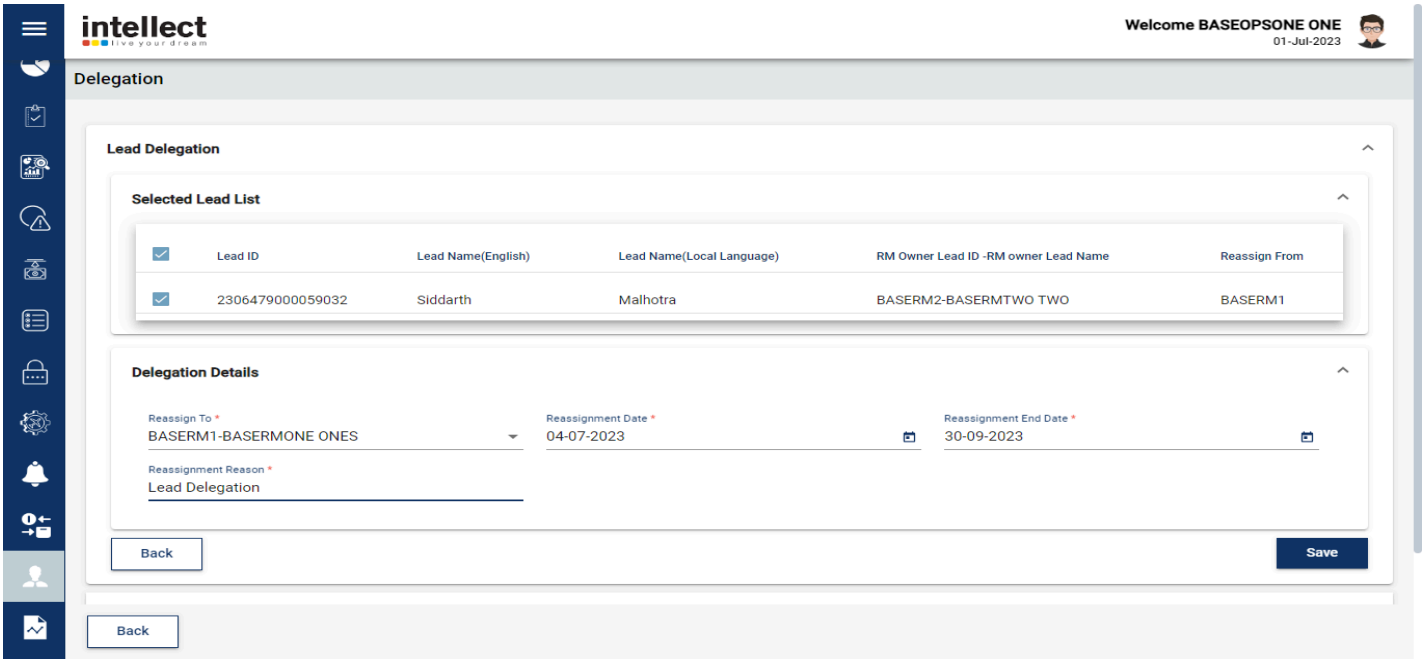
Screen: Lead Delegation

3. The Operation User Maker can filter out and select multiple Leads at once in the Existing Leads section. All columns in this section are filterable (Refer to the 3rd point in section 4.2.1 Lead Handover)



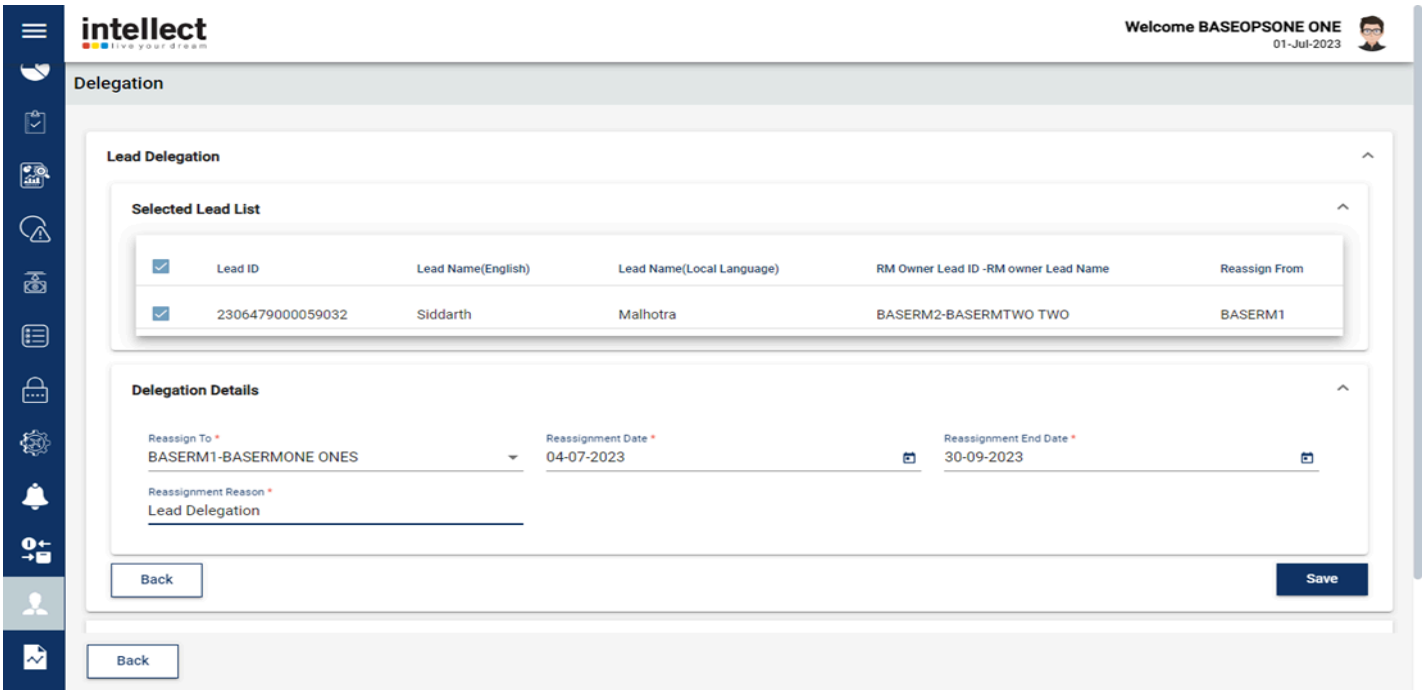
Screen: Filter and select desired Leads

4. After selecting the desired Lead(s), the Operation User Maker can click on next and the selected leads will reflect in the Selected Lead List section



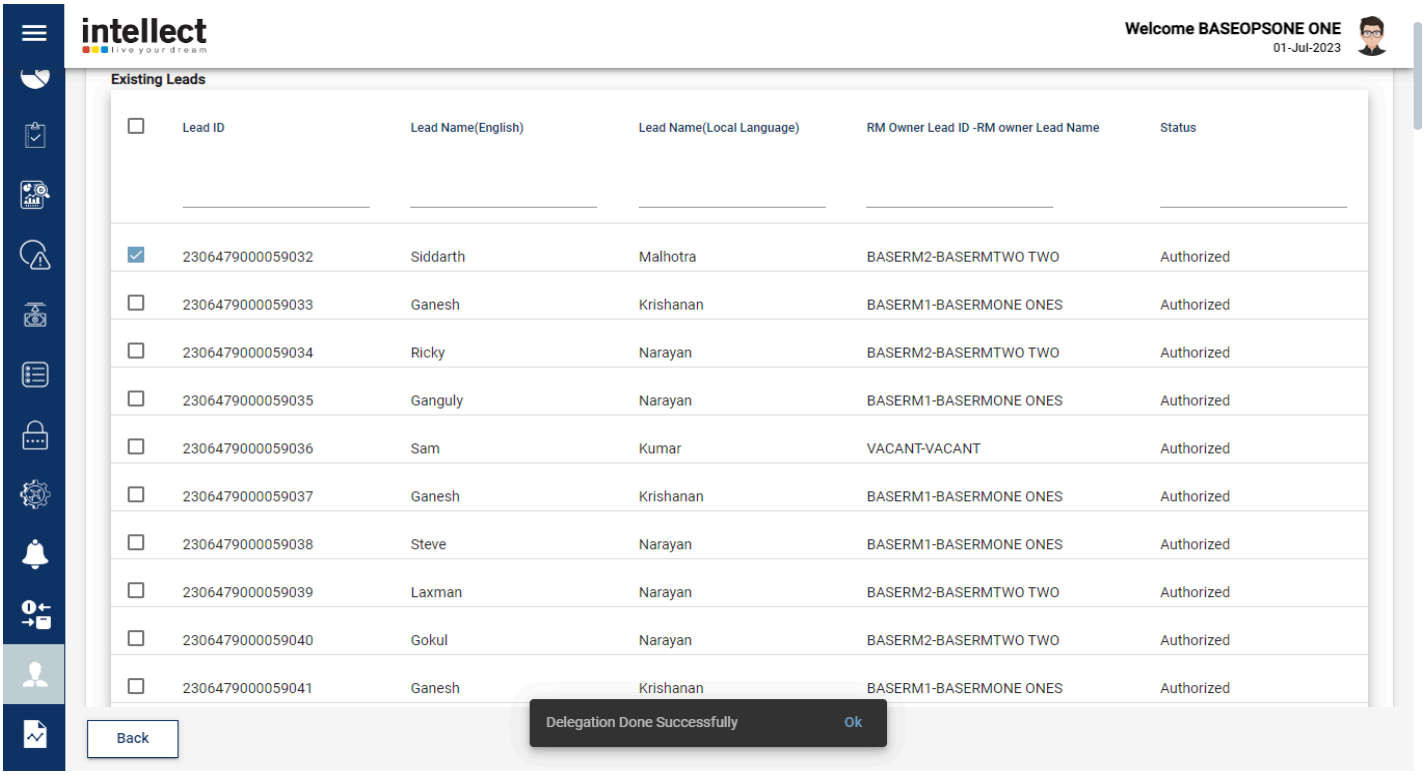
Screen: Selected Lead List Section

5. The Operation User Maker can then fill the details in the Delegation Details section, and input on the "Reassignment Reason" to capture the reason for Delegation. Reassignment date and end dates are respectively the start and end dates for the delegation



Screen: Delegation Details and capture Reason

6. The Operation User Maker can then click on the “Save” button to complete the Delegation process

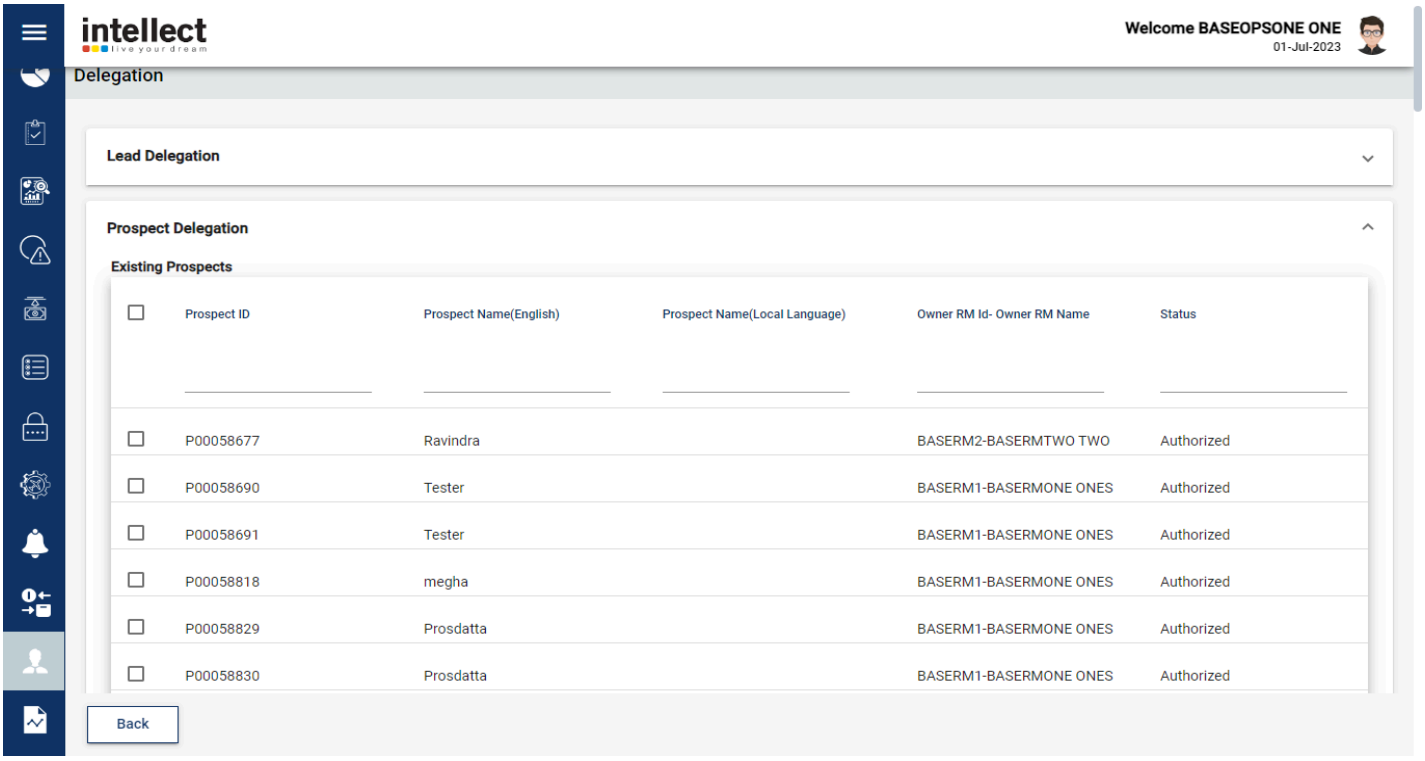


Screen: Save

4.3.2 Prospect Delegation

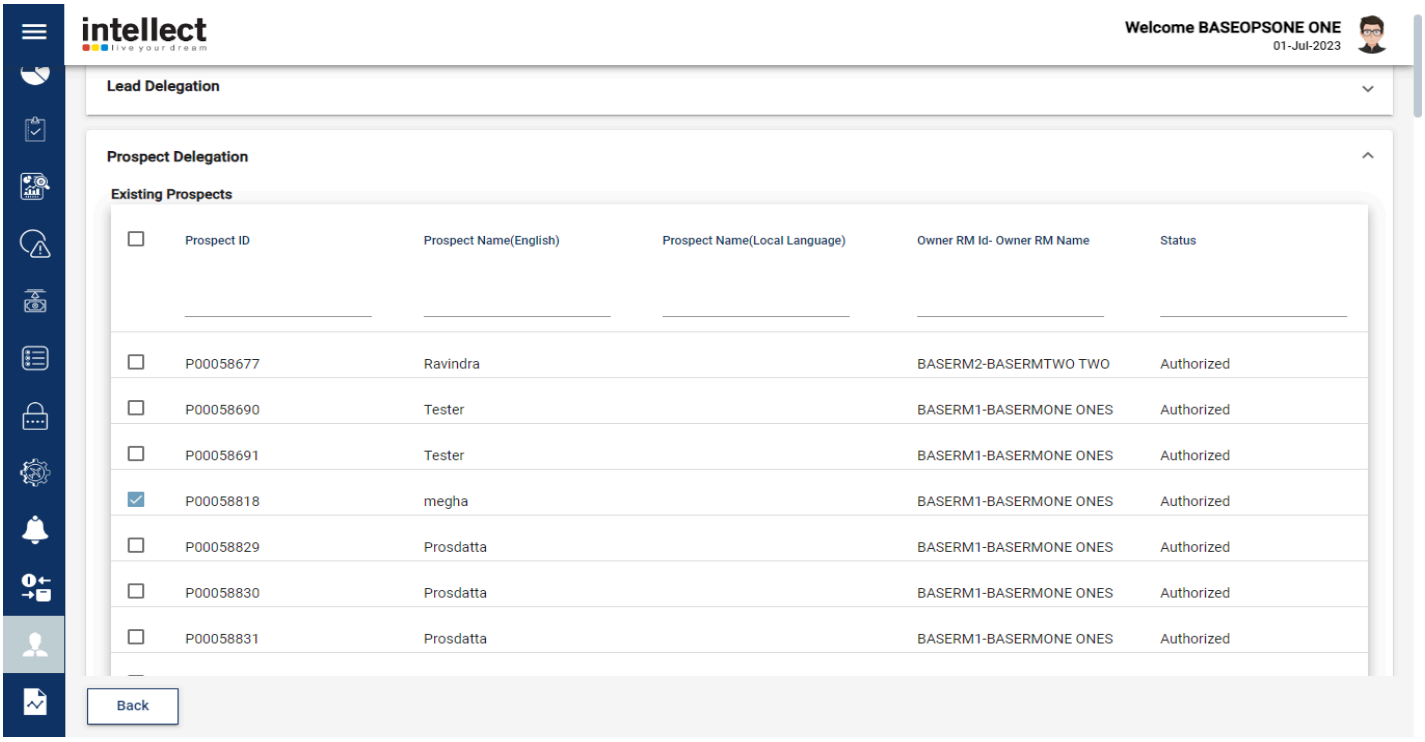
1. After selecting the “Delegation” option, the system navigates the Operation User Maker to the Delegation screen. The Operation User Maker clicks on the Prospect Delegation tab
2. In the Prospect Delegation tab, the screen is divided into 3 sections:

   a. **Existing Prospects** – The List of Prospects that are available for assignment/re-assignment
   b. **Selected Prospects List** – The Prospect selected for Delegation
   c. **Delegation Details** – Enter Delegation Details



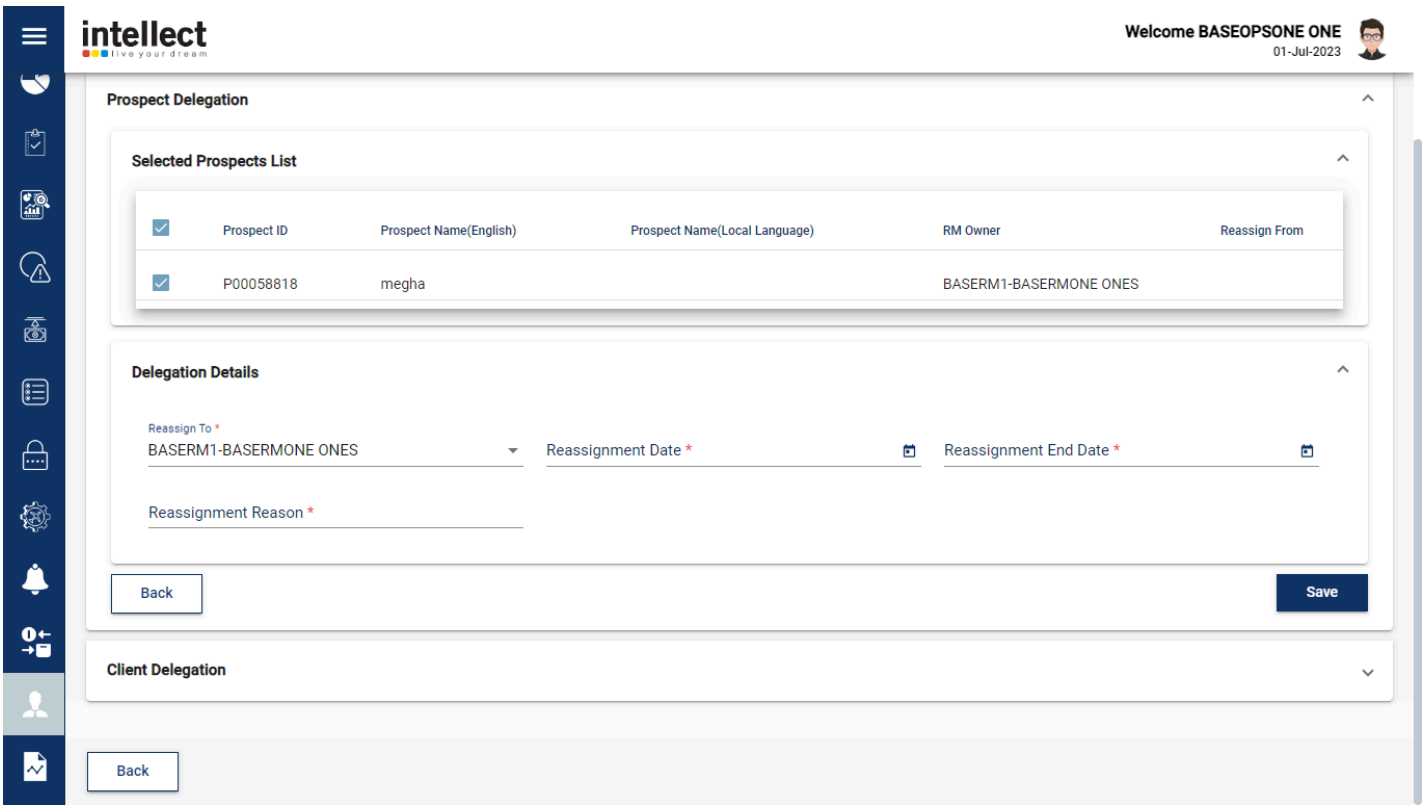
Screen: Prospect Delegation

3. The Operation User Maker can filter out and select multiple Prospects at once in the Existing Prospects section. All columns in this section are filterable (Refer to the 3rd point in section 4.2.1 Lead Handover)



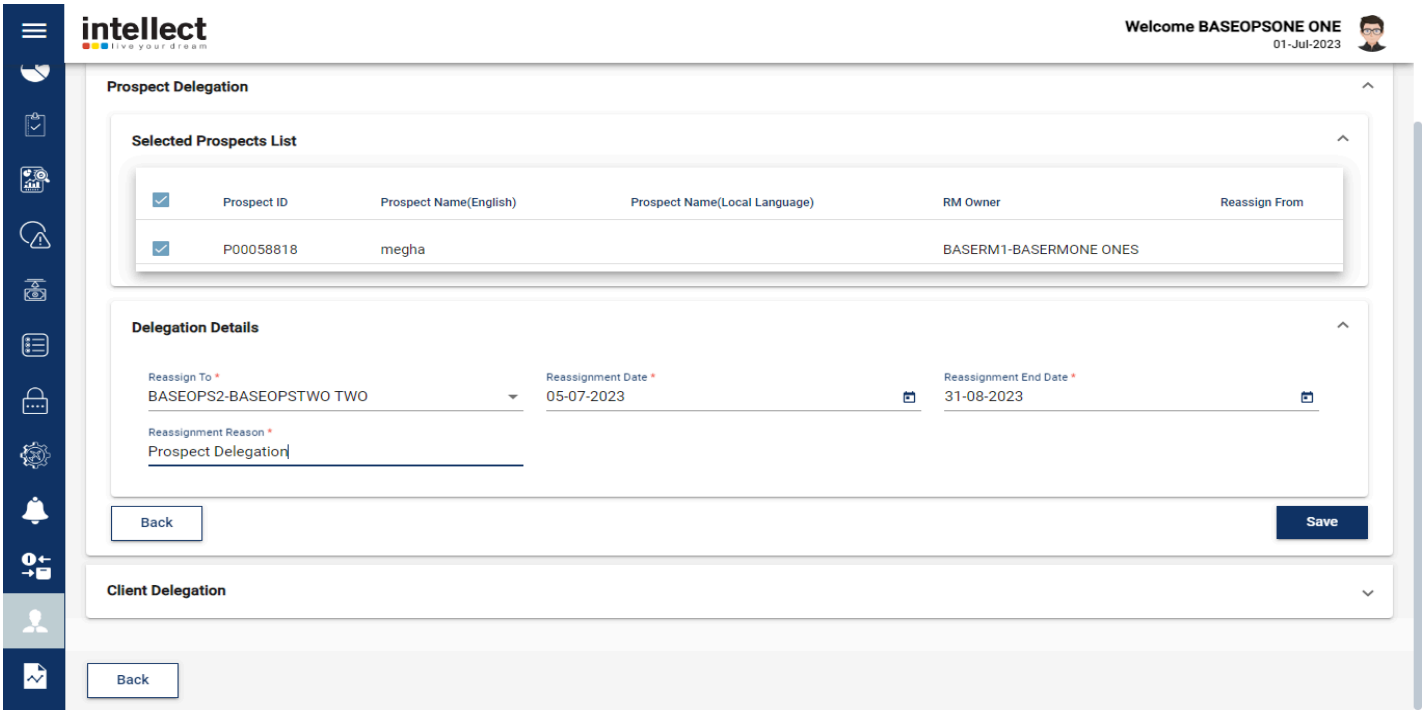
Screen: Select desired Prospect

4. After filtering out and selecting the desired Prospect(s), the Operation User Maker can Select the Prospect and click on next. The selected Prospects are reflected in Selected Prospects List section



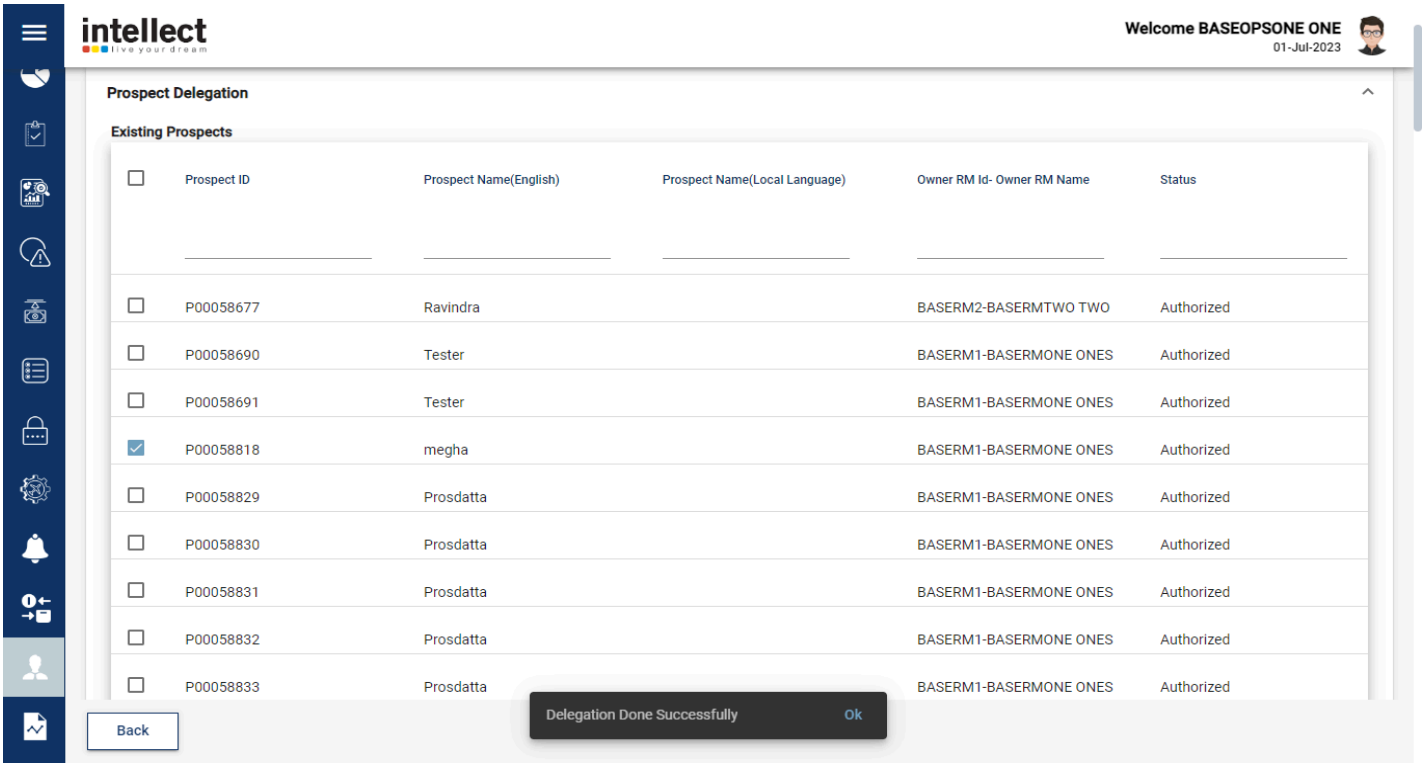
Screen: Selected Prospects List Section

5. Having selected the desired Prospect(s), the Operation User Maker can then fill the details in the Delegation Details section, and input the “Reassignment Reason” to capture the reason for Delegation. Reassignment date and end dates are respectively the start and end dates for the delegation



Screen: Delegation Details and Capture Reason

6. The Operation User Maker can then click on the "Save" button to complete the Delegation process

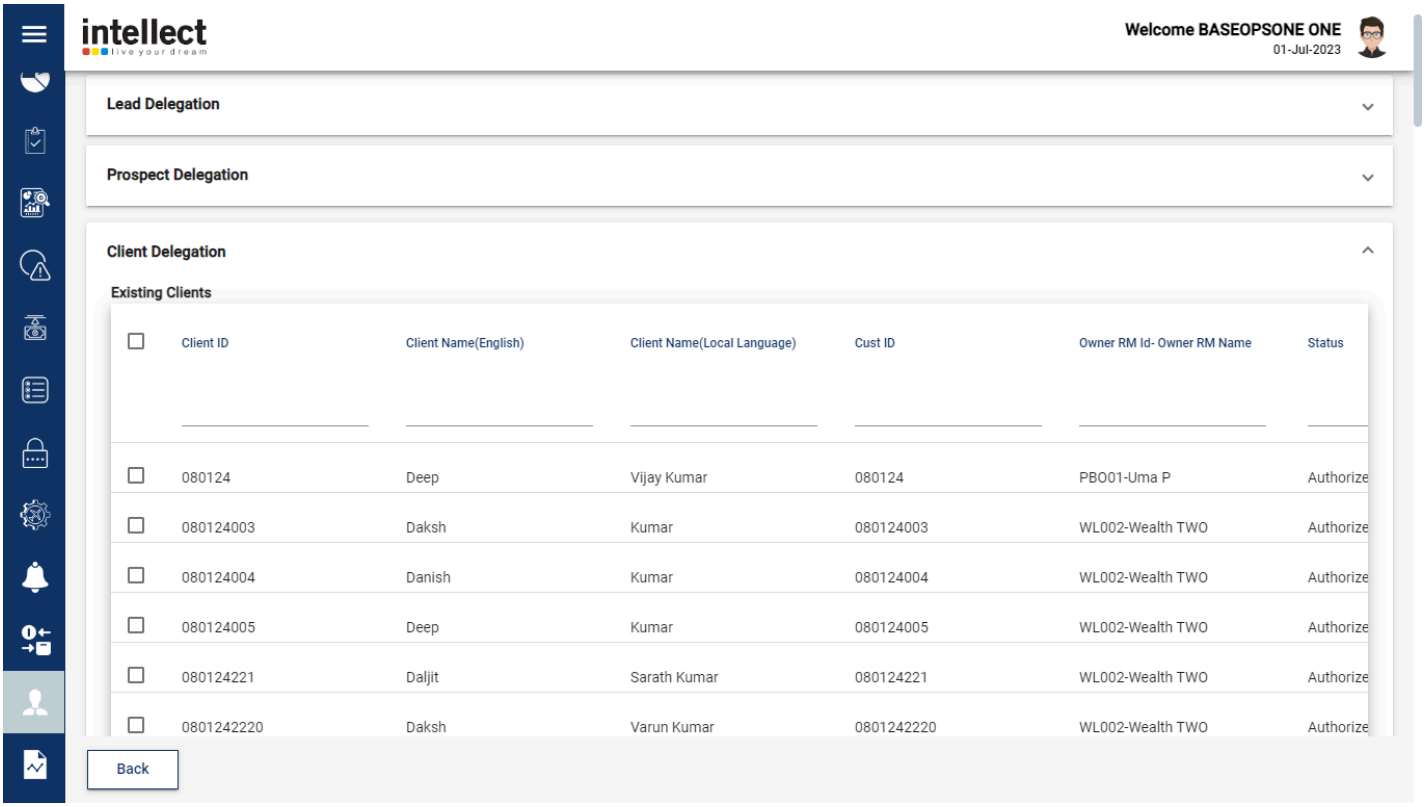


Screen: Save

4.3.3 Client Delegation

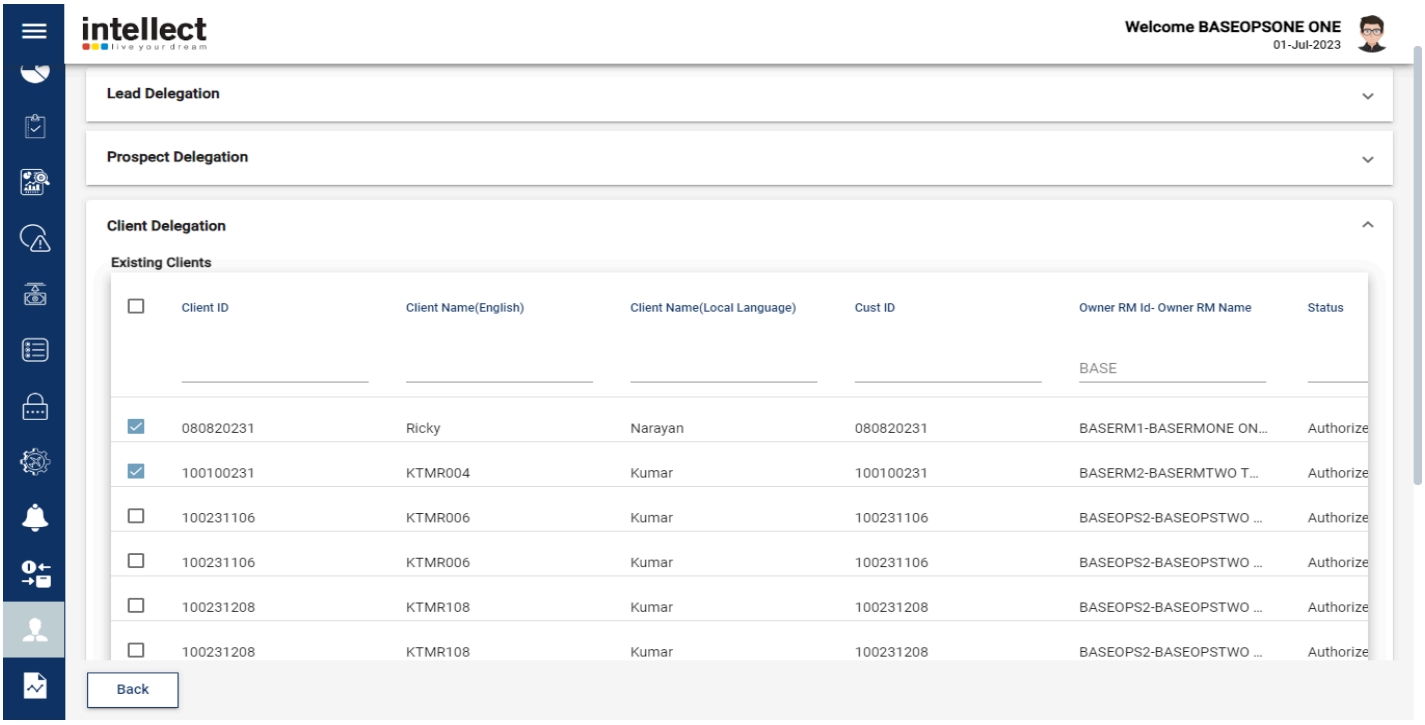
1. After selecting the "Delegation" option, the system navigates the Operation User Maker to the Delegation screen. The Operation User Maker clicks on the Client Delegation tab
2. In the Client Delegation tab, the screen is divided into 3 sections:

   a. **Existing Clients** – The List of Clients that are available for assignment/re-assignment
   b. **Selected Clients List** – The Client selected for Delegation
   c. **Delegation Details** – Enter Delegation Details



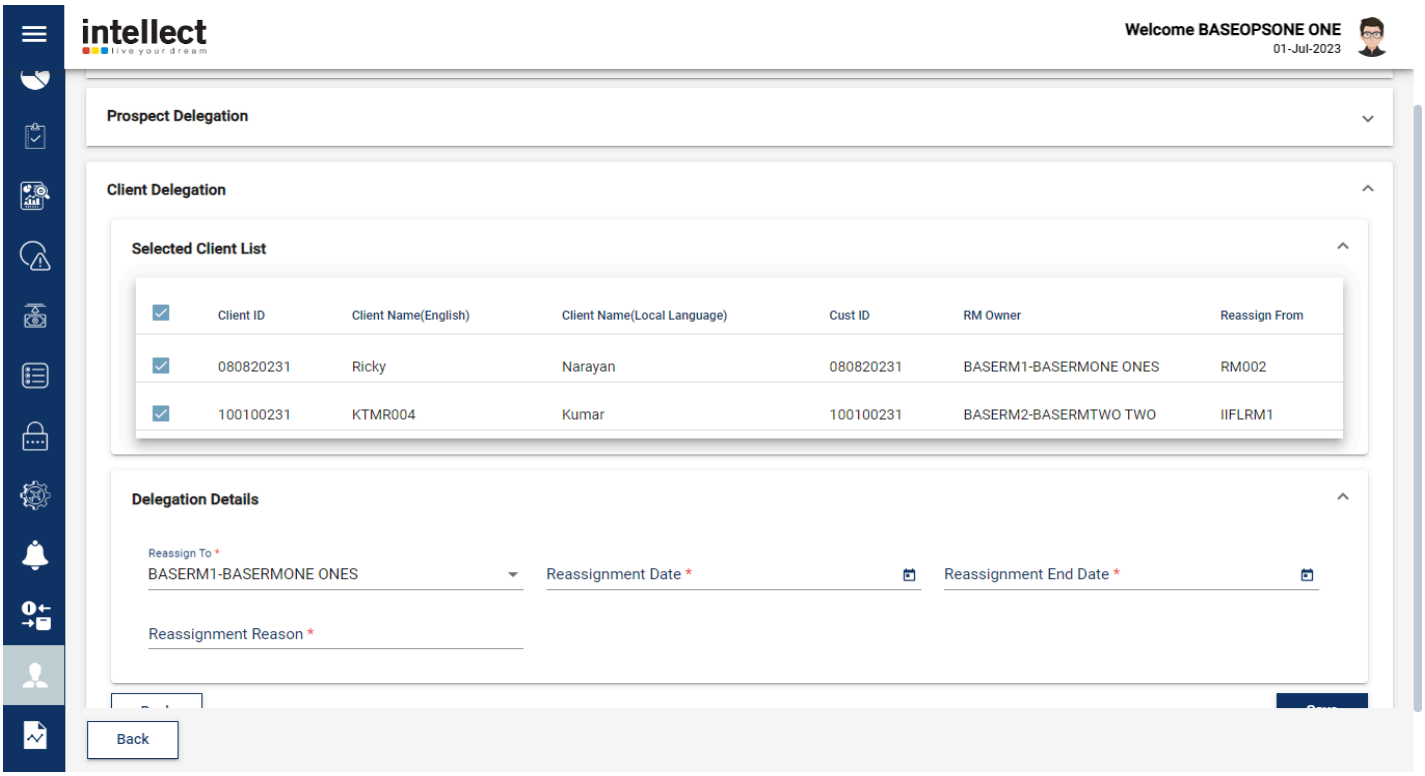
Screen: Client Delegation

3. The Operation User Maker can filter out and select multiple Clients at once in the Existing Clients section. All columns in this section are filterable (Refer to the 3rd point in section 4.2.1 Lead Handover)



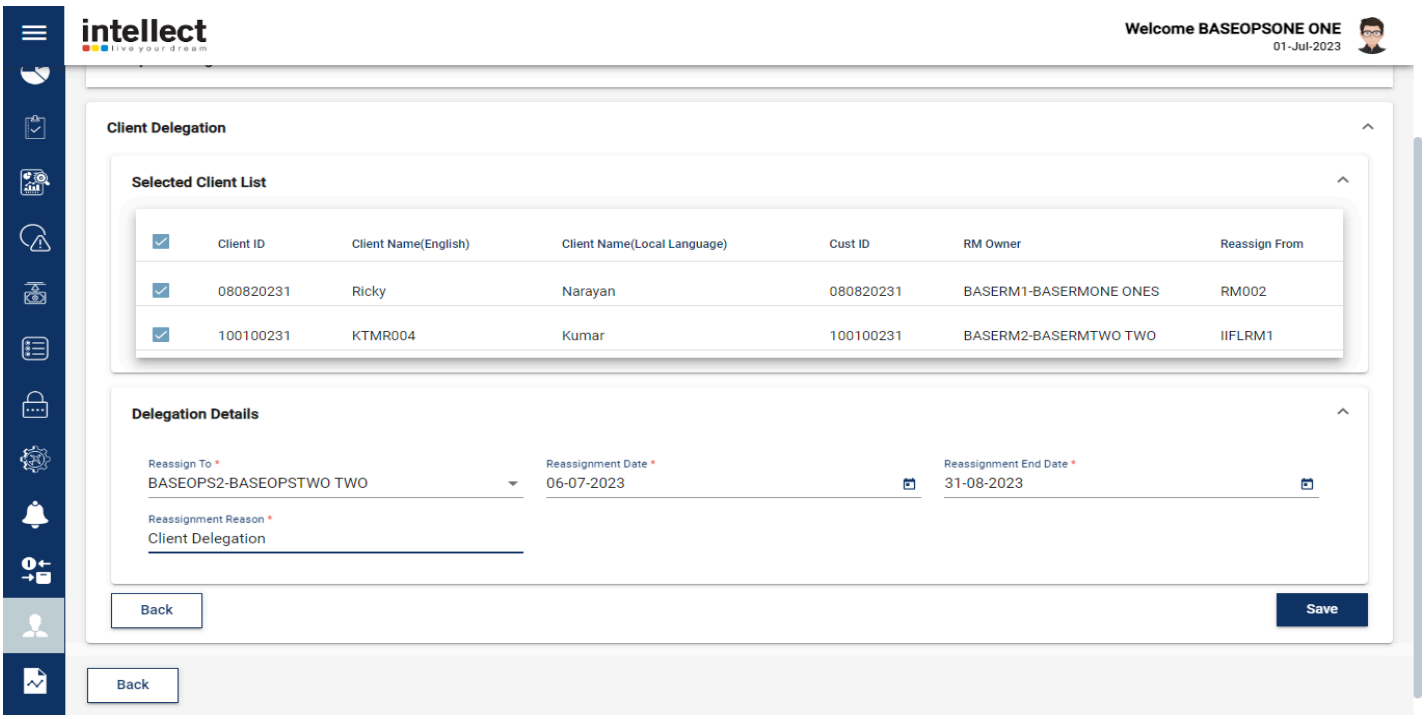
Screen: Select desired Client

4. After filtering out and selecting the desired Client(s), the Operation User Maker can select Clients and clients are reflected in Selected Clients List section



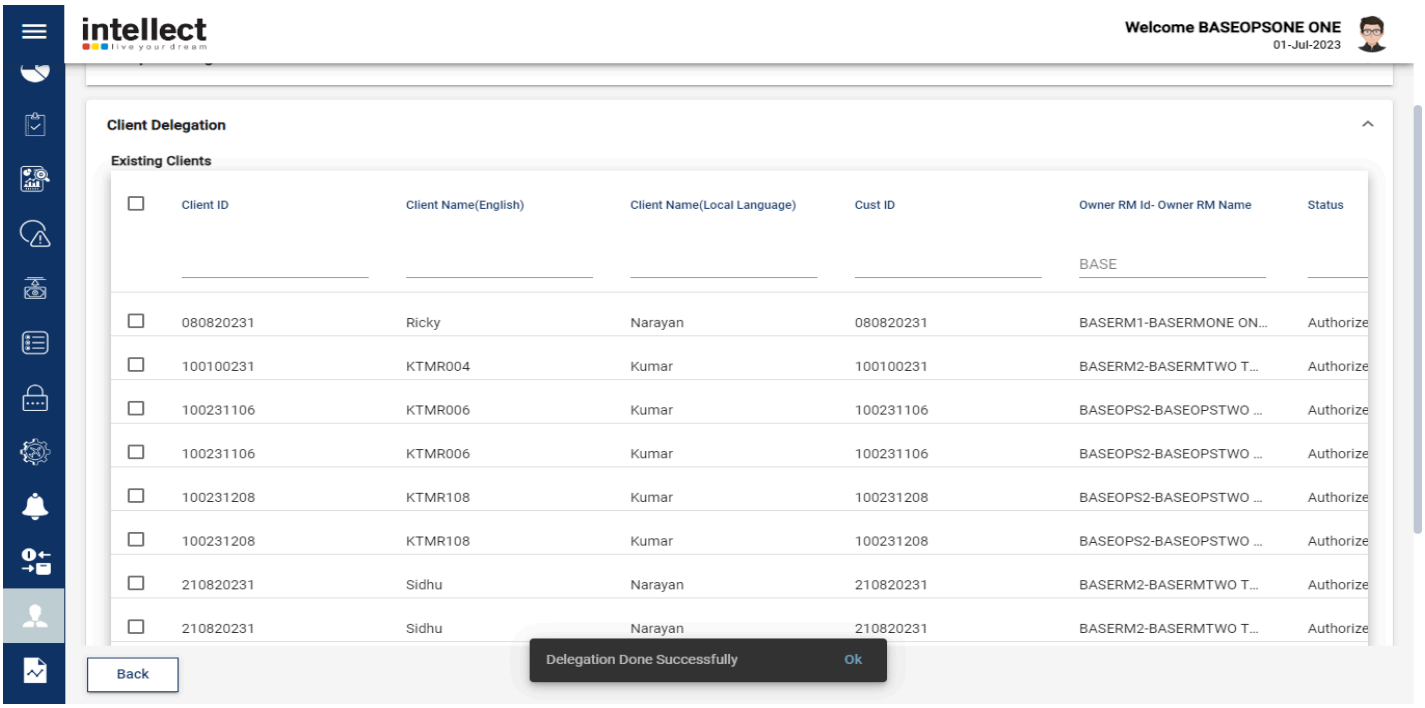
Screen: Selected Clients List Section

5. Having dropped the desired Client(s) into the Selected Clients List section, the Operation User Maker can then fill the details in the Delegation Details section, and click on the “Reassignment Reason” button to capture the reason for Delegation



Screen: Delegation Details and Capture Reason

6. The Operation User Maker can then click on the “Save” button to complete the Delegation process



Screen: Save
