1. Introduction

The purpose of this document is to guide the Users through the customer journey. This document will expand upon the functionalities on customer management

A Customer is an entity who needs services from a Financial Institution for their financial and investment needs. For an entity to become a customer, they should be on boarded into the wealth system

2. Prerequisites

S No	Process	Reference Document
1	Legal Entity Maintenance	Journey of Defining Maintenance
2	Service Group Maintenance	Journey of Defining Maintenance
3	Service Unit Maintenance	Journey of Defining Maintenance
4	Role Maintenance	Journey of Defining Maintenance
5	Branch Maintenance	Journey of Defining Maintenance
6	Users Maintenance	Journey of Defining Maintenance

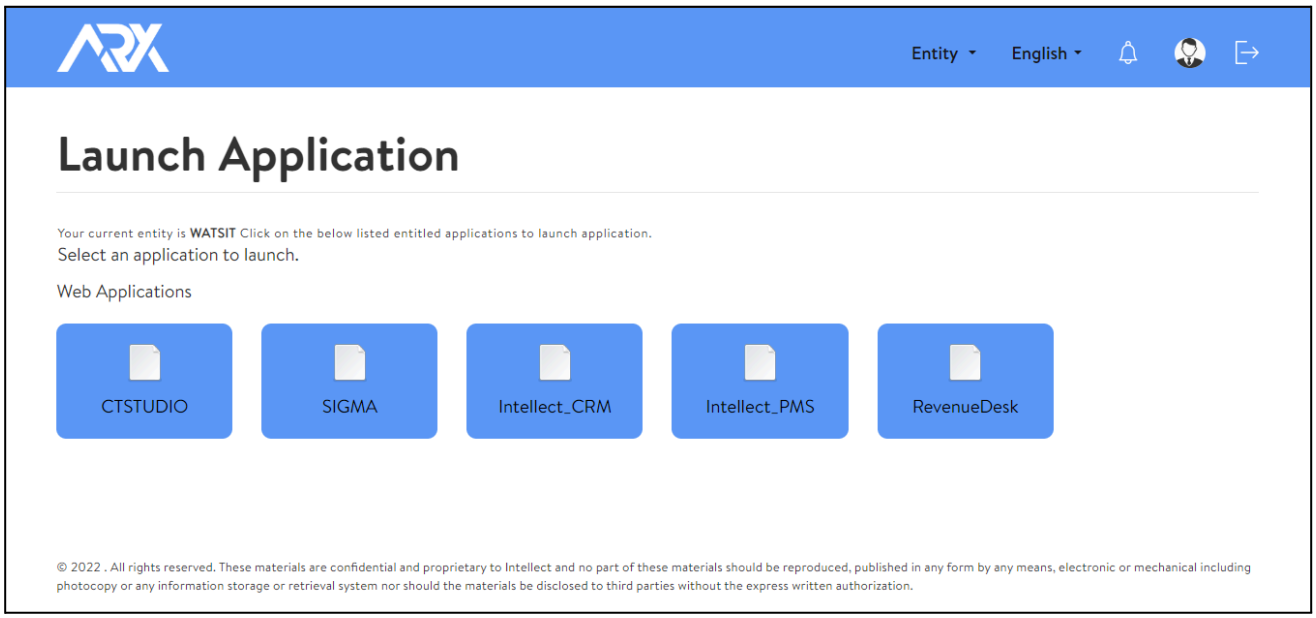
3. Process Description

3.1. Login

1. The User will launch the application and enter the login details

Screen: Application login

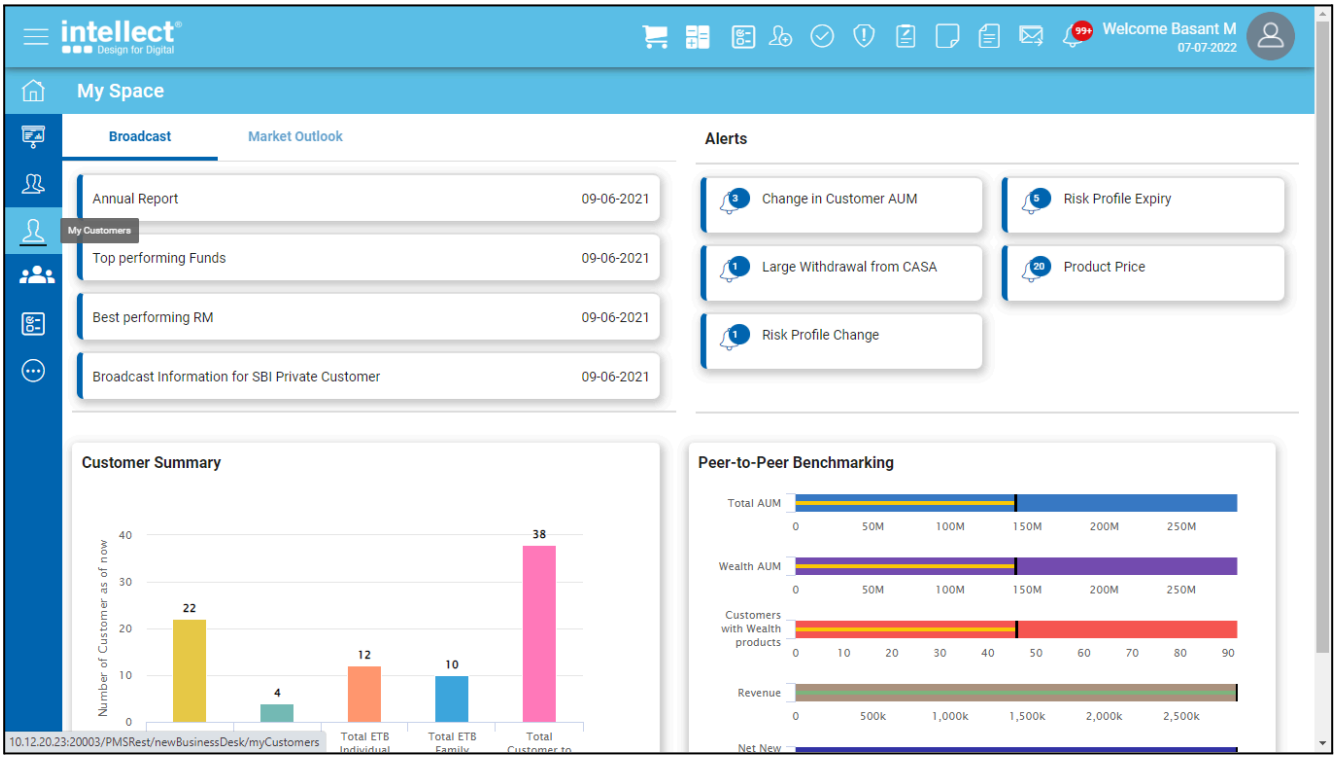
2. The User will then click on the “RM office” icon to launch the PMS application



Screen: Click on RM office

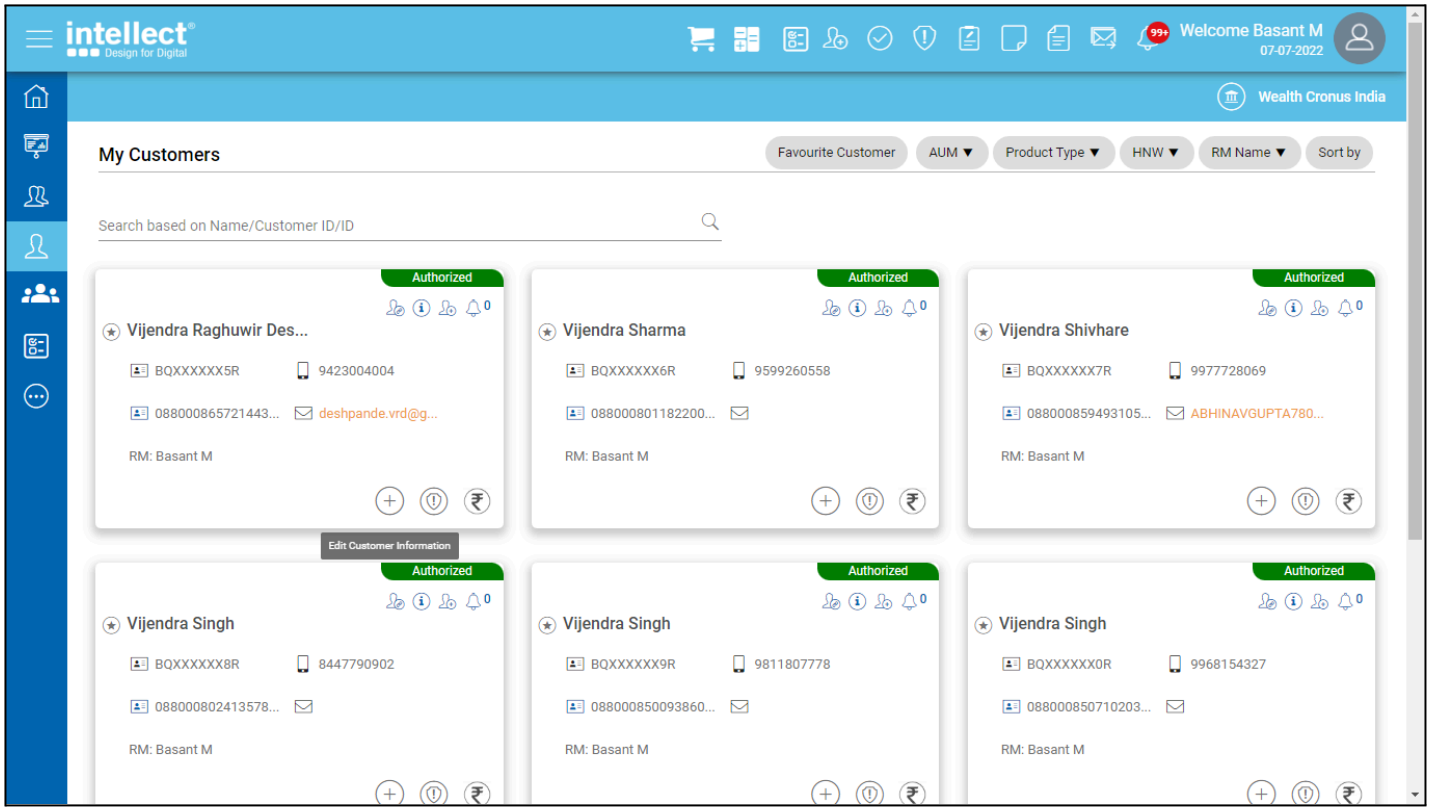
3.2. Customer Edit Profile

1. The user can click on the “My Customers” icon on the left navigation panel on My Space to navigate to the My Customers screen



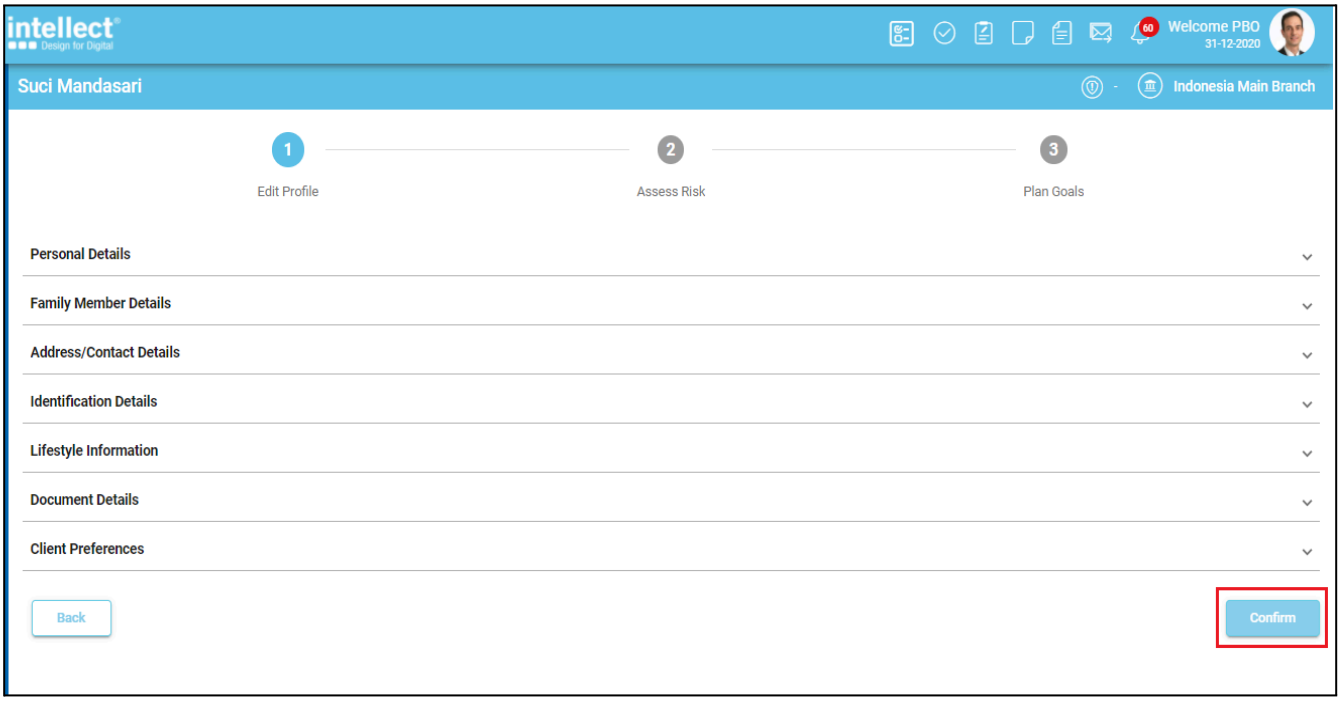
Screen: My Space Screen

2. Once on the My Customers screen, the user can click on "+" on the customer card to edit the customer profile



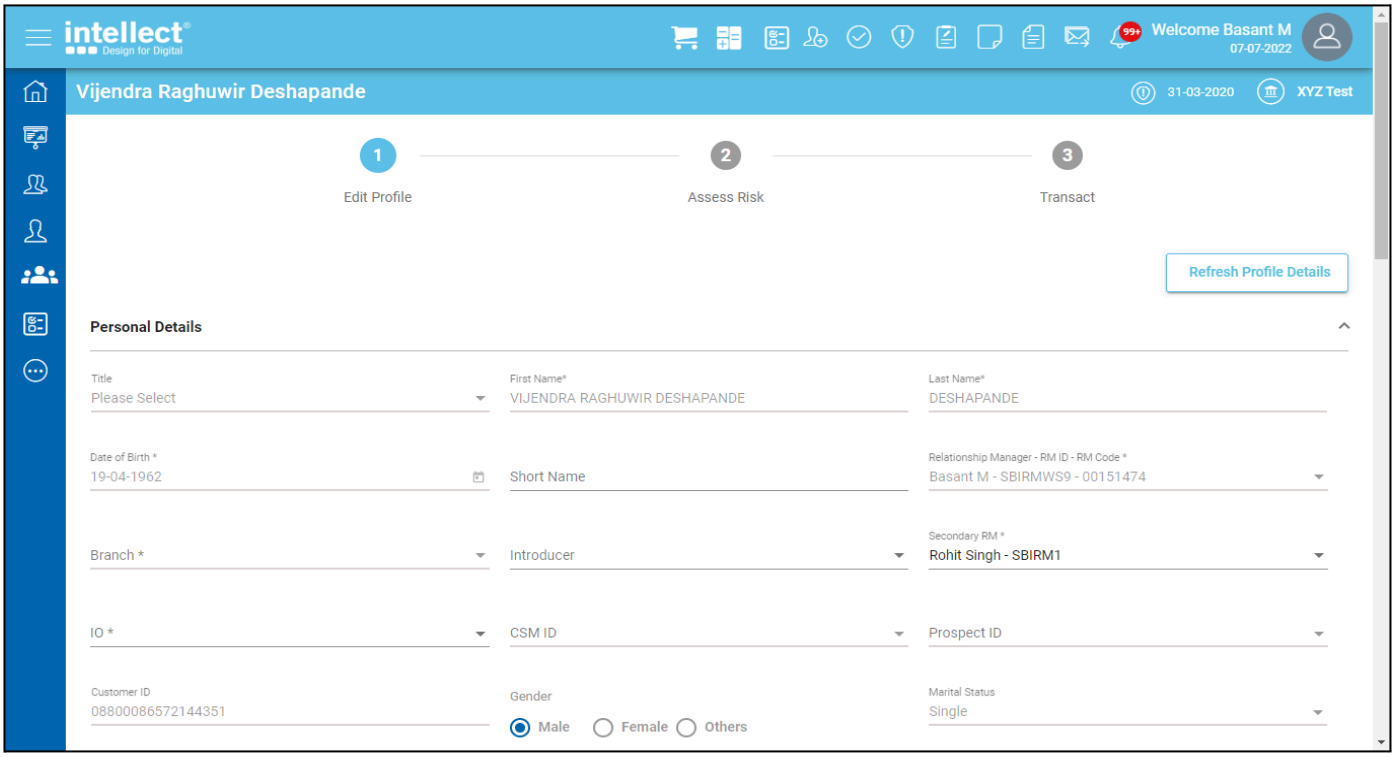
Screen: Customer Card - My Customers Screen

3. The user can choose to modify customer details should they wish to on the Edit Profile screen. The user can modify the following details:
   a) Personal Details-
   b) Family Member Details
   c) Address/Contact Details-
   d) Identification Details
   e) Lifestyle Information
   f) Document Details
   g) Client Preferences

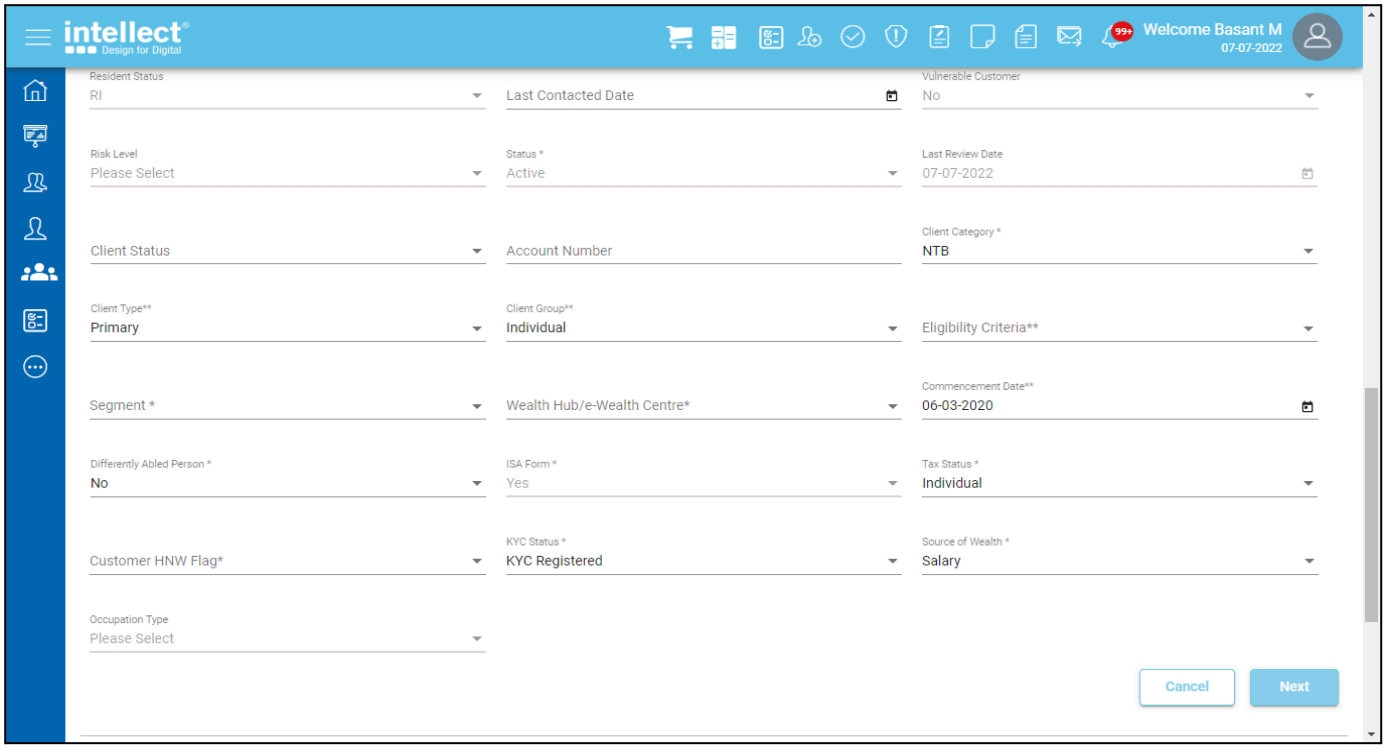


Screen: Edit Profile Screen

- **Personal Details** - The user can view/modify the personal details of the customer
    1. In personal Details the user will modify the fields like Primary RM, client category, client type, client group and eligibility criteria along with the other necessary details like segment, tax status, differently abled etc.
    2. User will click on the IO field; the dropdown will display all the IO currently available in the application. An IO can only access customers that are mapped to him/her. IO will not be able to access customers which are not mapped to him/her



Screen: Customer Profile Details



Screen: Customer Profile Details

3. User will select the desired IO and fill in the other fields. For customers with client type as “Secondary” (non wealth customer), the IO, Primary RM, Secondary RM will be defaulted to “Vacant”
4. User will select the desired Secondary RM and fill in the other fields and save the details in the application. Any RM User can be mapped as the Secondary RM of a customer
5. Fields like client category, client type, client group and eligibility criteria are interlinked and the same is displayed below. The LOV’s are displayed as per the selection done of the below fields

S.No	Client Category	Client Type	Client Group	Eligibility Criteria
1	NTB	Primary	Individual	TRV

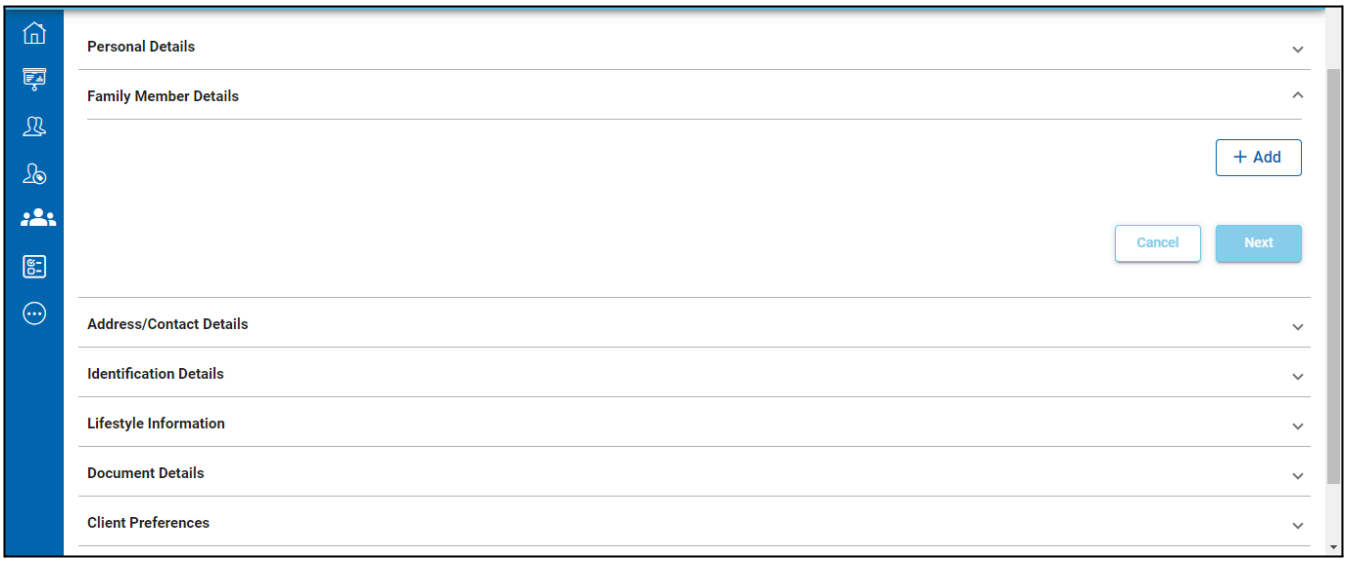
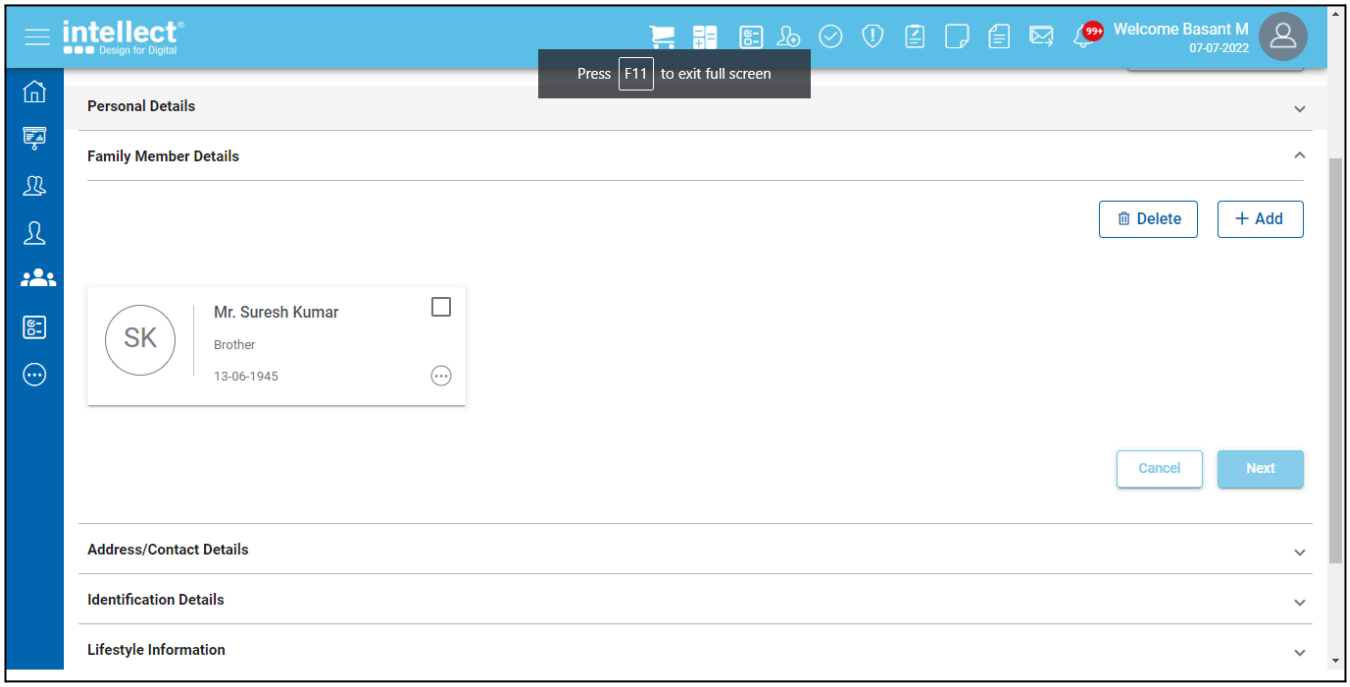
- **Family Member Details** - View/Add/Modify Family member details of the Customer
    1. If existing Family members are already added, the user can view/modify their details
    2. If family members are not already added, the user can click on the "Add" button to add family member details and then click on the "Save" button to save the details
    3. The user can then click on the "Next" button to navigate to the next section

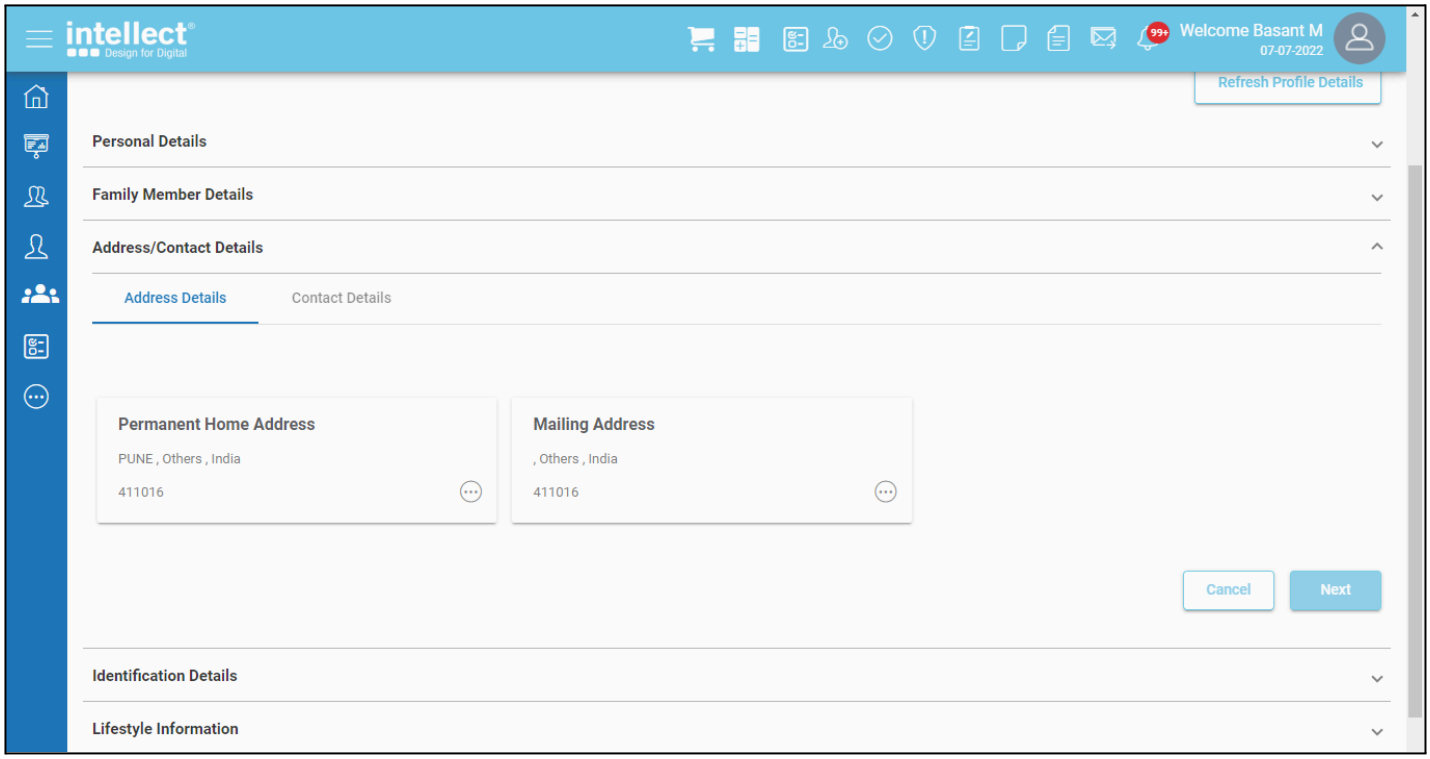


Screen: Family Member Details

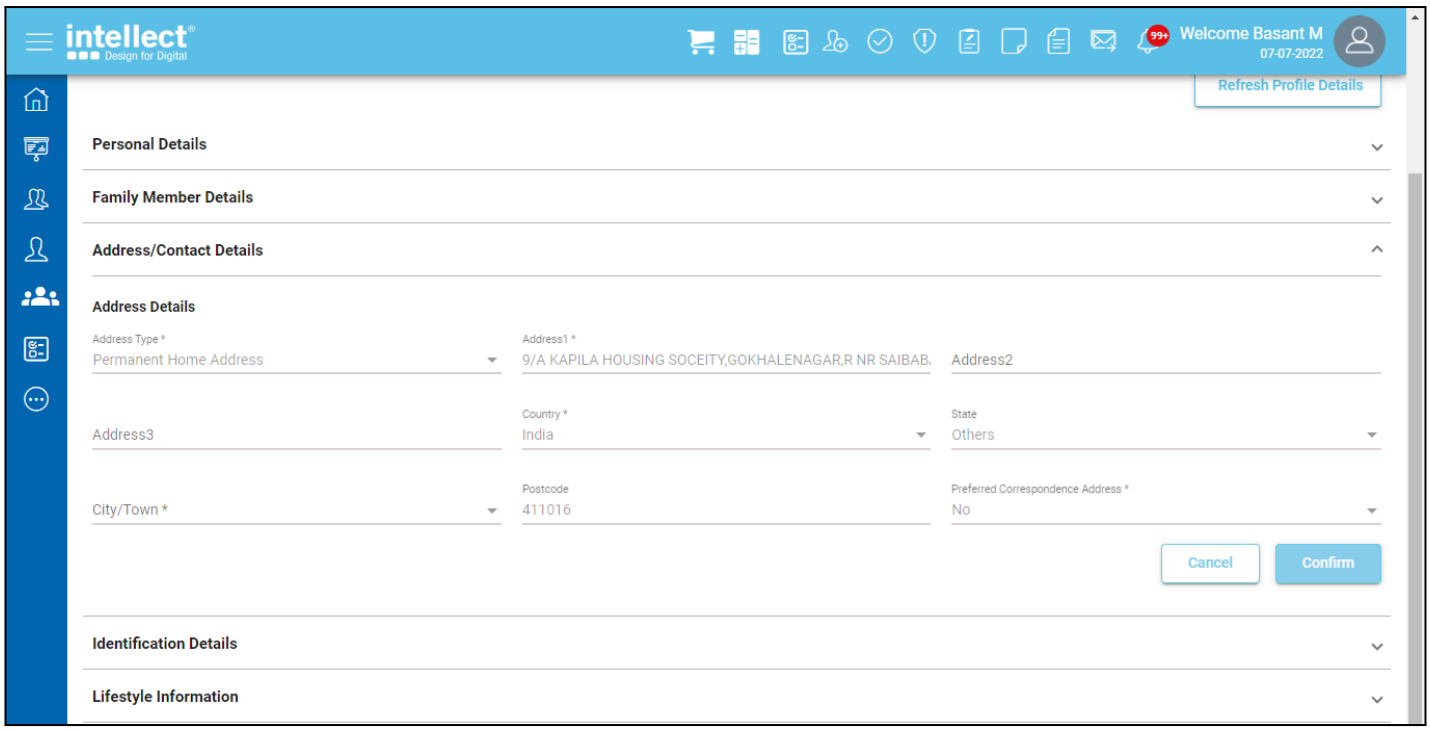


Screen: Add Family Member Details

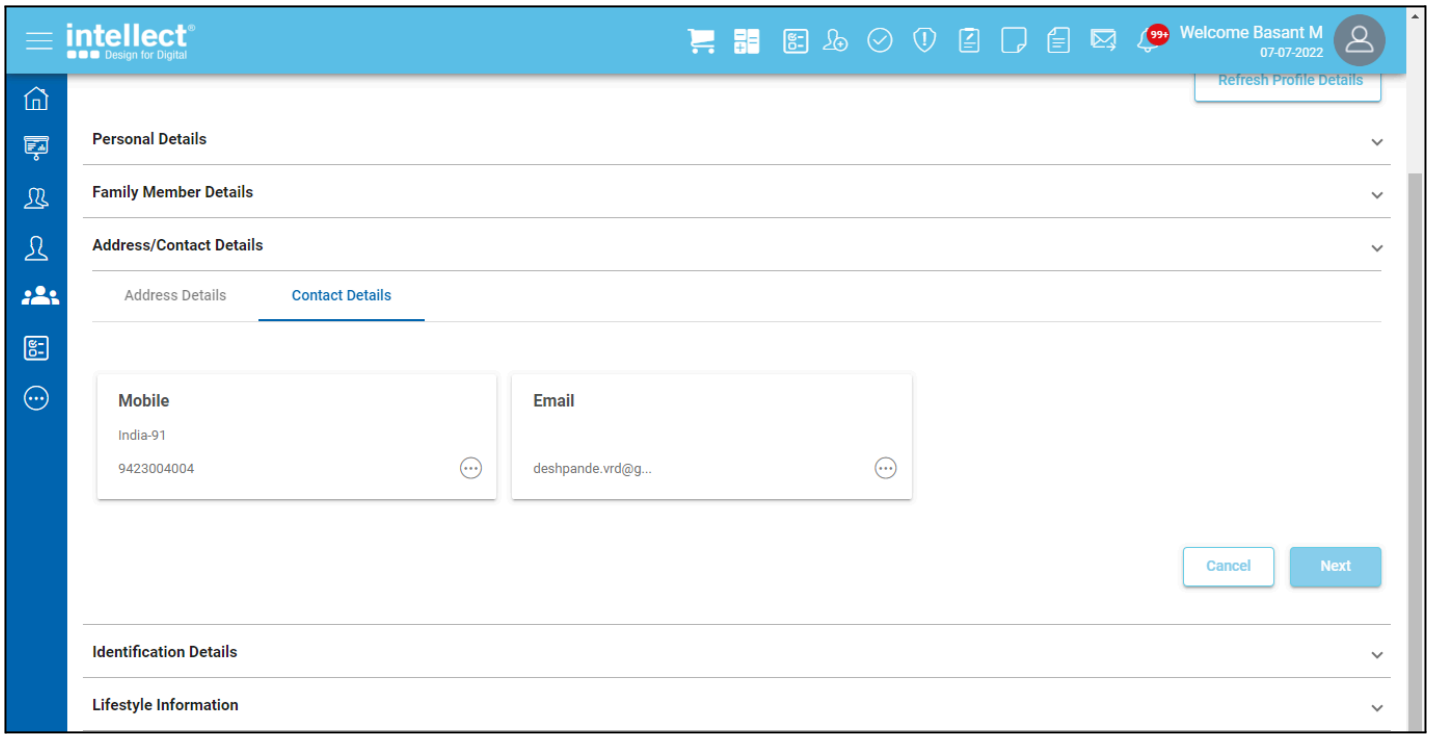
- **Address/Contact Details** - View Address/Contact details of the Customer
    1. The user can view the address/contact details of the customer by clicking on the three dots on the address card in the Address details tab
    2. The user can then click on the “Next” button to navigate to the next section



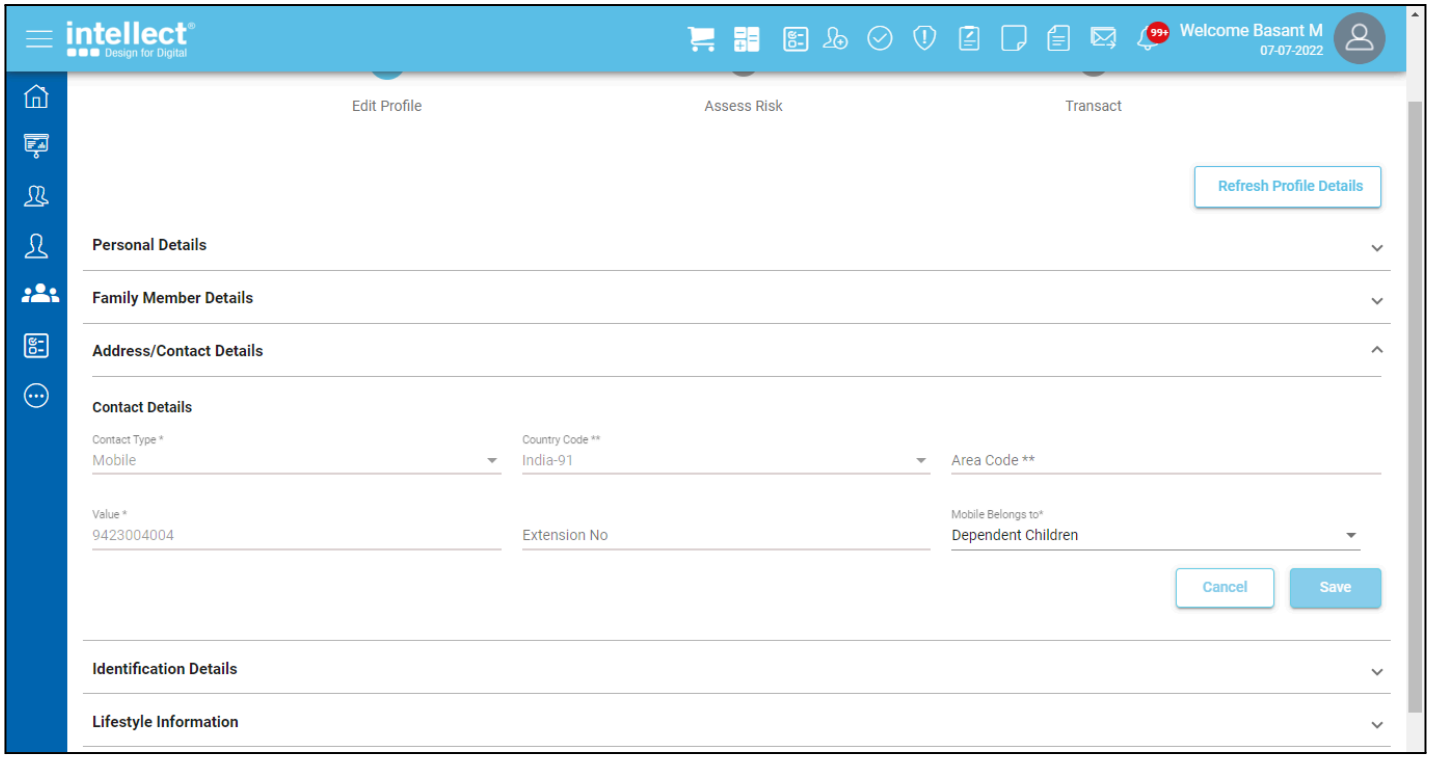
Screen: View Address Details Card



Screen: View Address Details

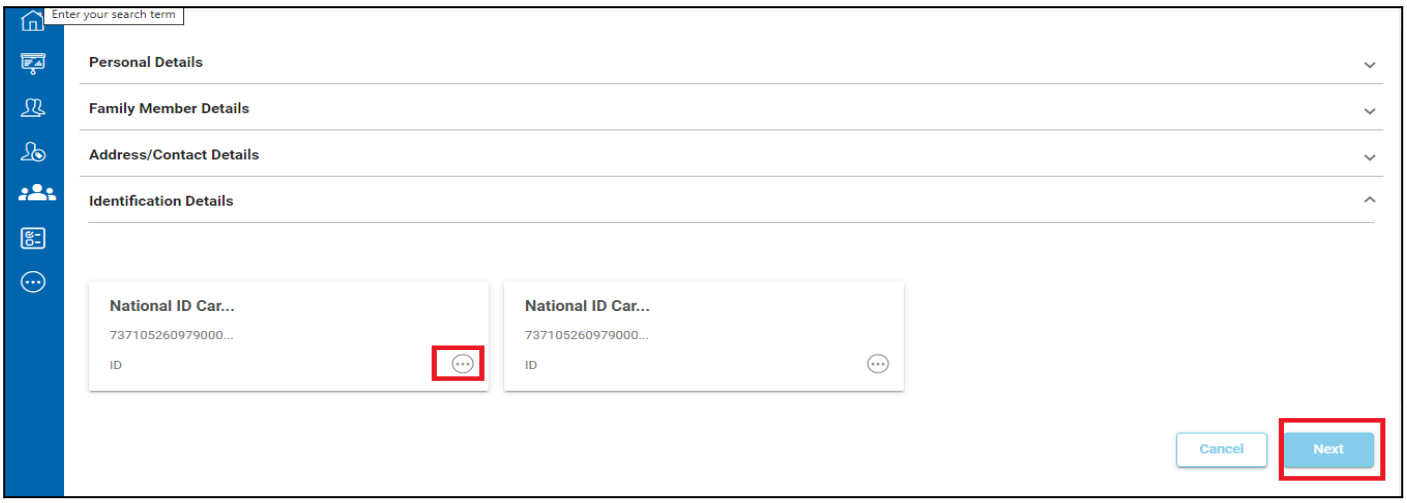


Screen: View Contact Details

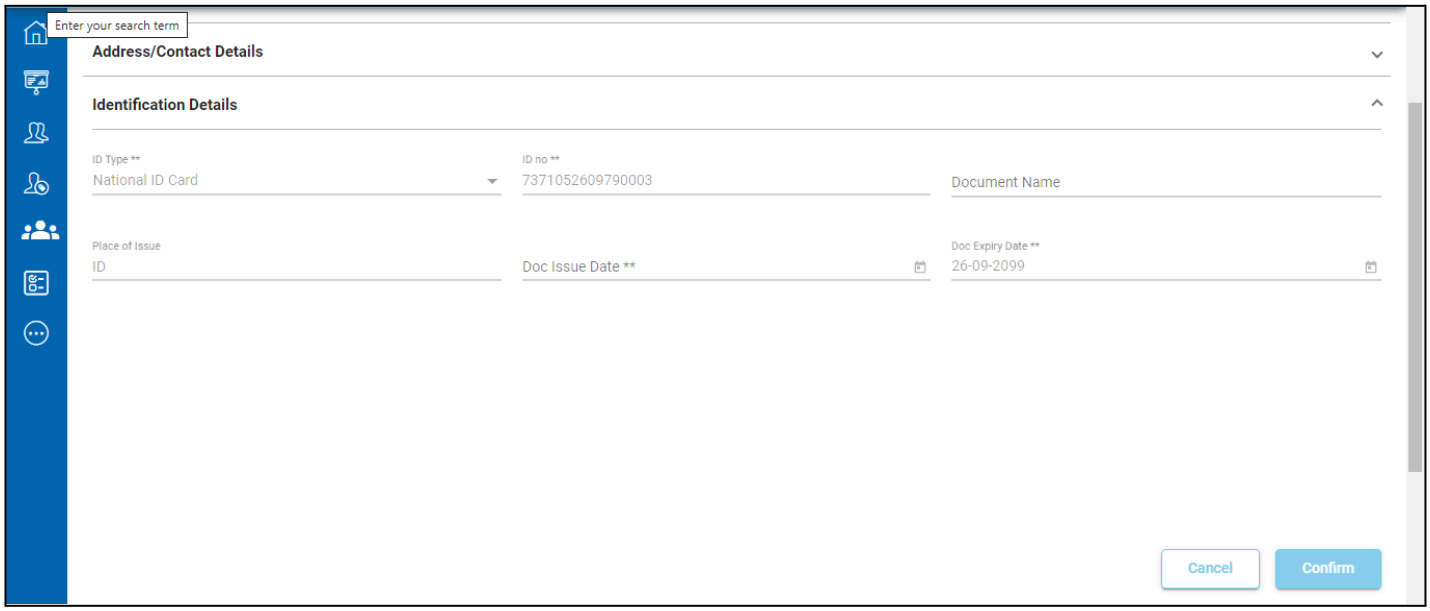


Screen: View Contact Details

- **Identification Details** - View Identification details of the Customer
    1. The user can view Identification details of the Customer in this section by clicking on the three dots. Once the user has seen the details, they can click on the "Confirm" button
    2. The user can then click on the "Next" button to navigate to the next section

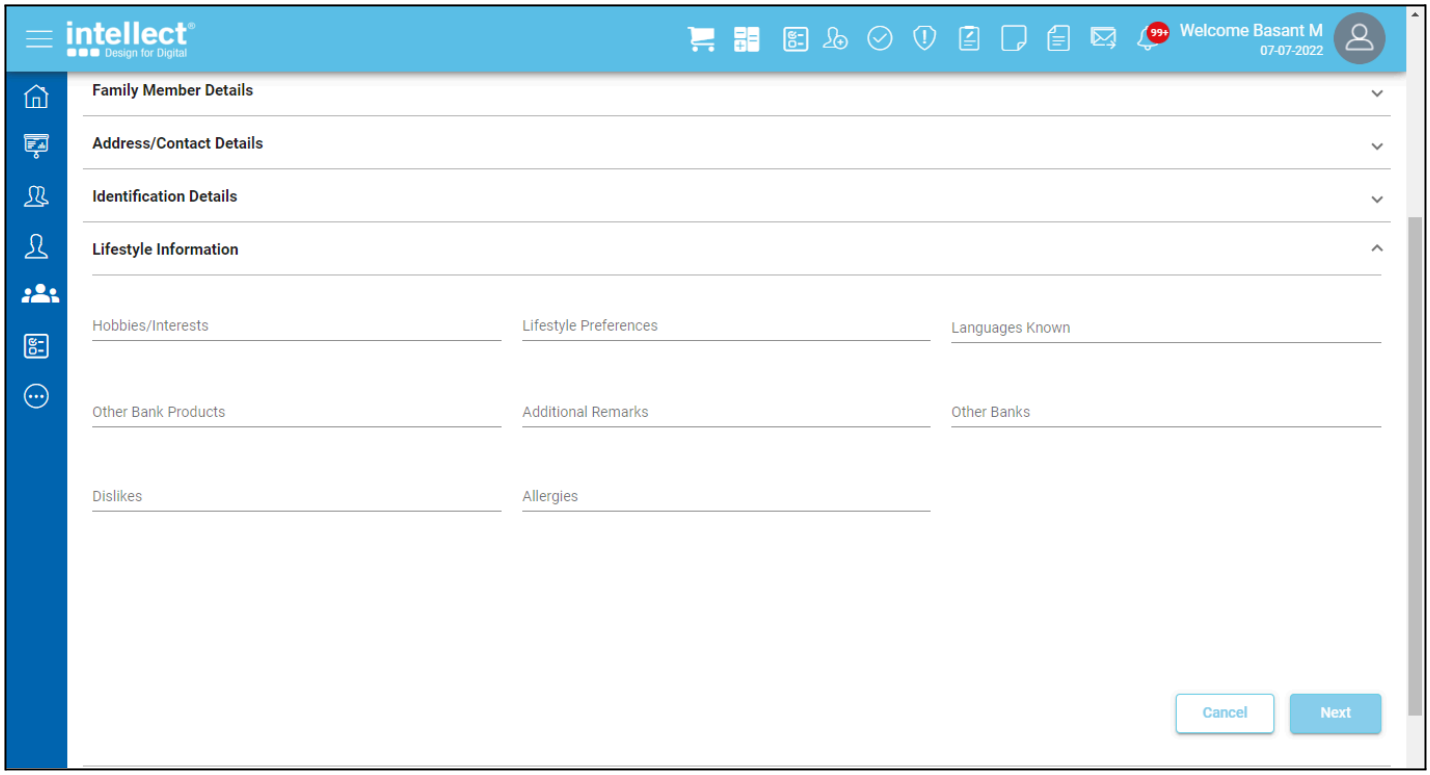


Screen: View Identification Details Card



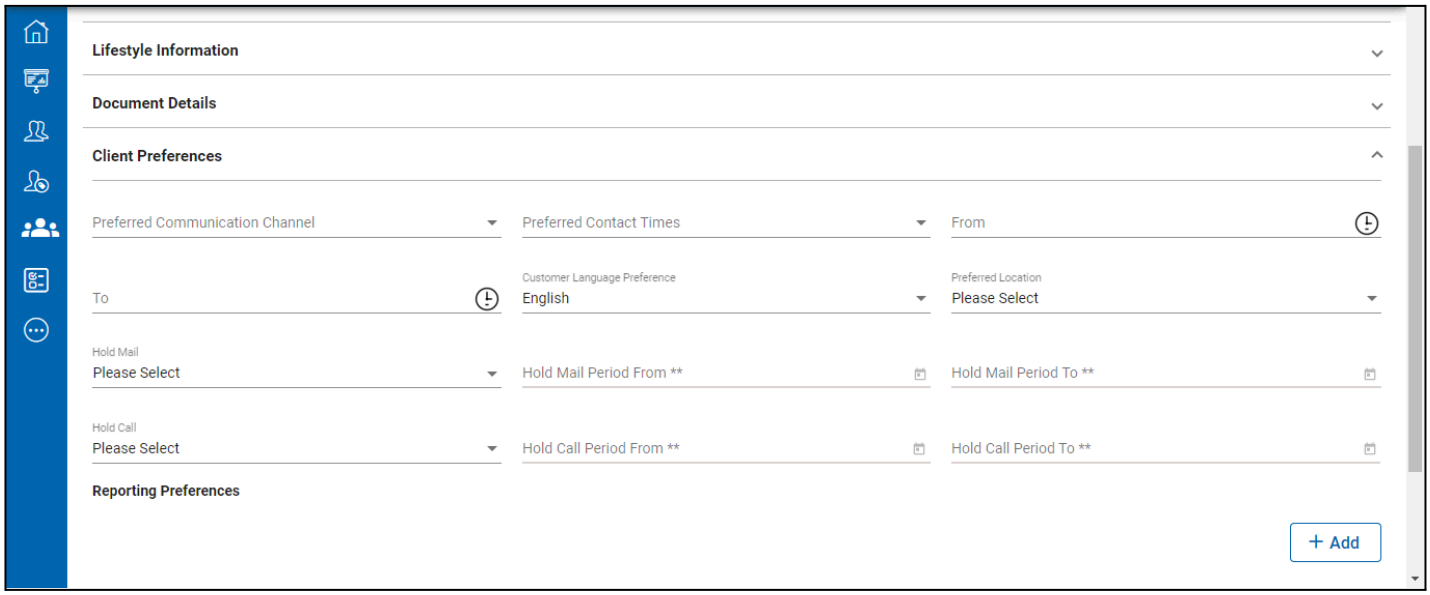
Screen: View Identification Details

- **Lifestyle Information** - View/Update/Modify Lifestyle Information of the Customer
    1. Once the user has viewed/updated/modified the Lifestyle Information, they can click on the "Next" button to navigate to the next section

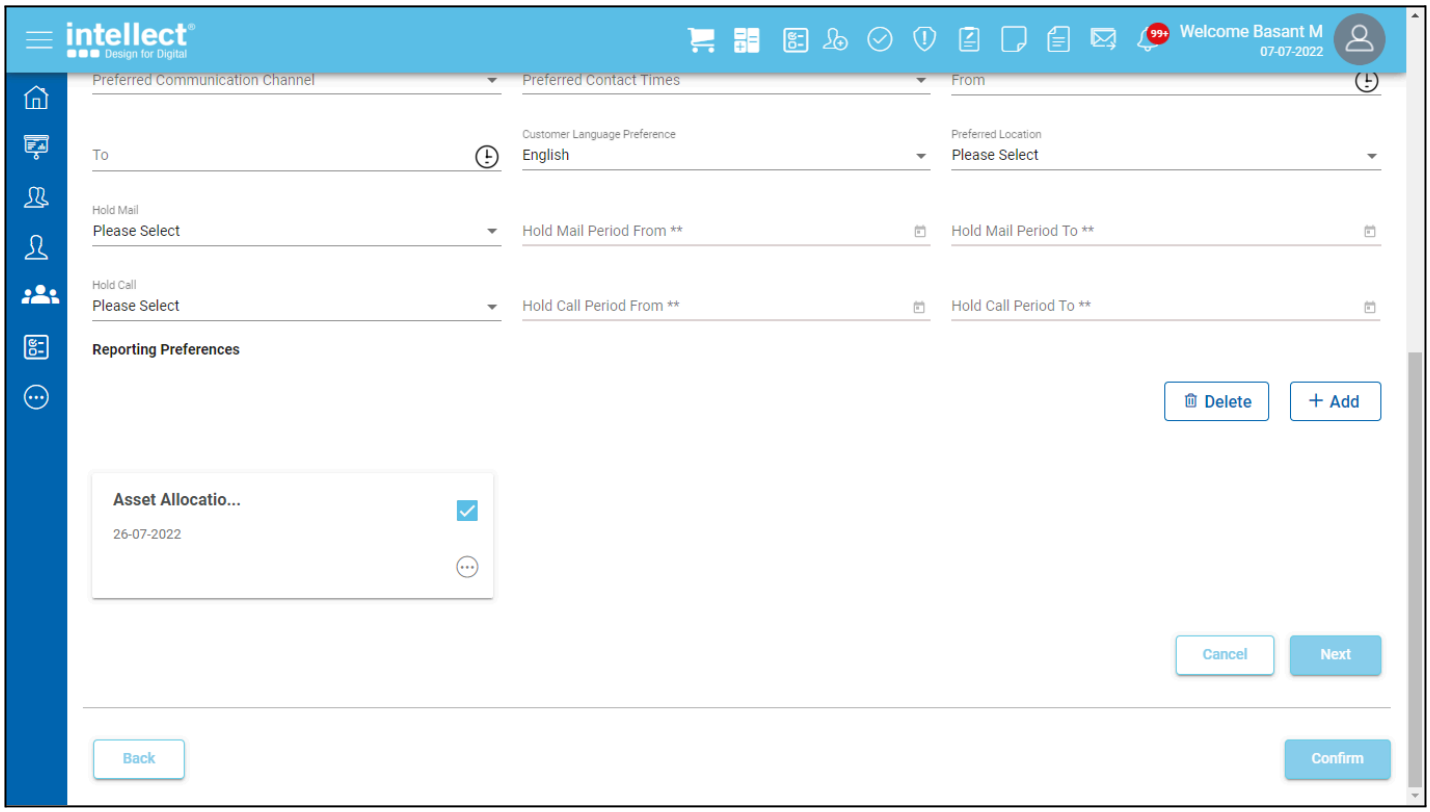


Screen: View/Add/Modify Lifestyle Information

- **Client Preferences** - View/Update/Modify Communication Preferences and Reporting Preferences of the customer
  1. The user can View/Update/Modify communication preferences of the customer in this section
  2. The user can also add/view/modify reporting preferences of the customer
  3. The user can add reporting preferences of the customer by clicking on the "+Add" button and clicking on the "Save" and then "Confirm" button to add the reporting preferences. This reporting preference can now be viewed as a card and modified if needed

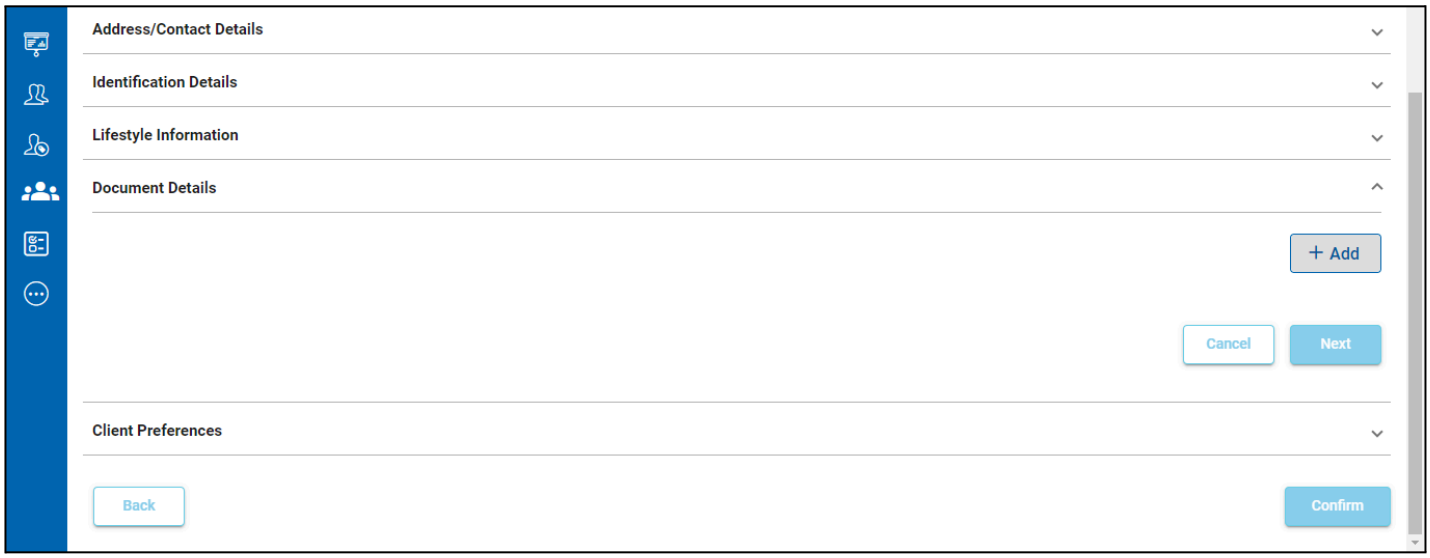


Screen: Add/View/Modify Client Preferences



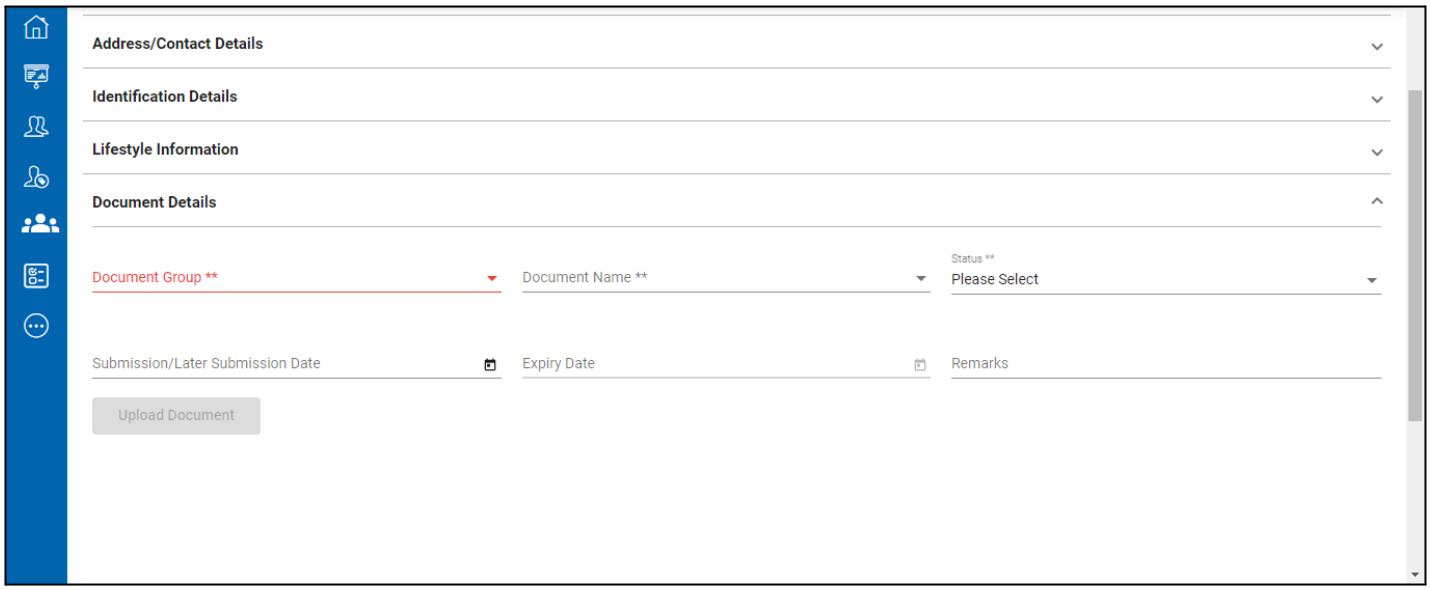
Screen: Add/Delete/Modify Reporting Preferences

- **Document Details** - Add documents related to a customer
  1. The user can upload documents related to the customer by clicking on Add.



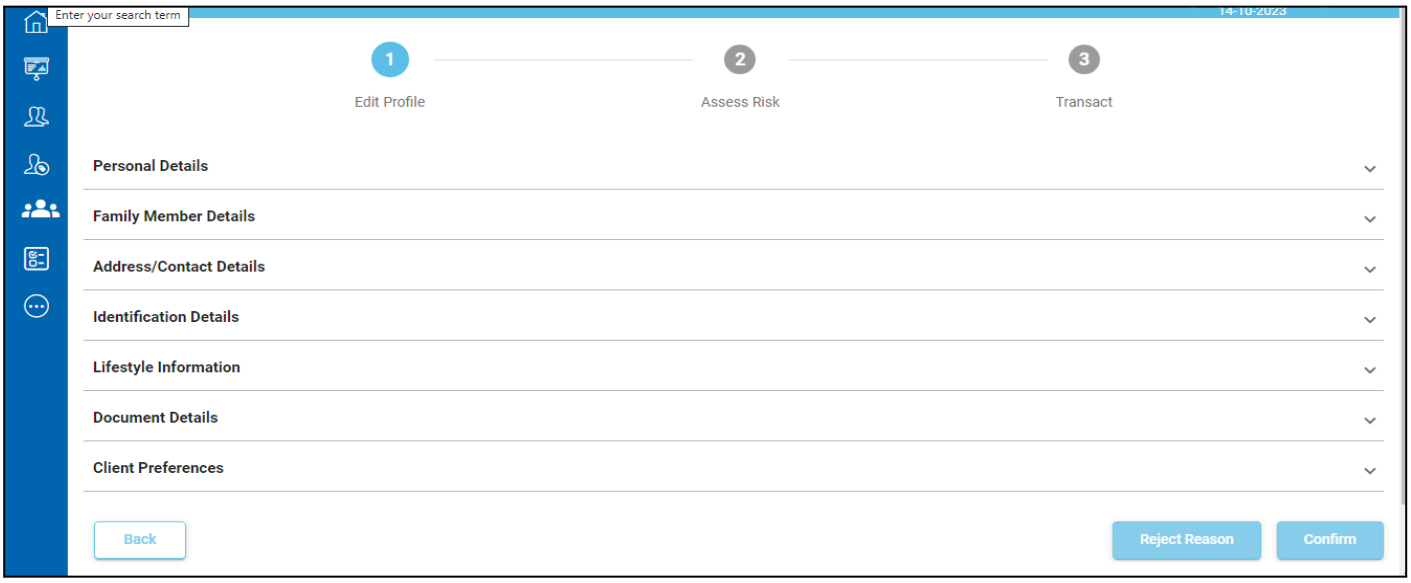
Screen: Add documents

2. After clicking “Add” user will input the details of the document and click on upload.

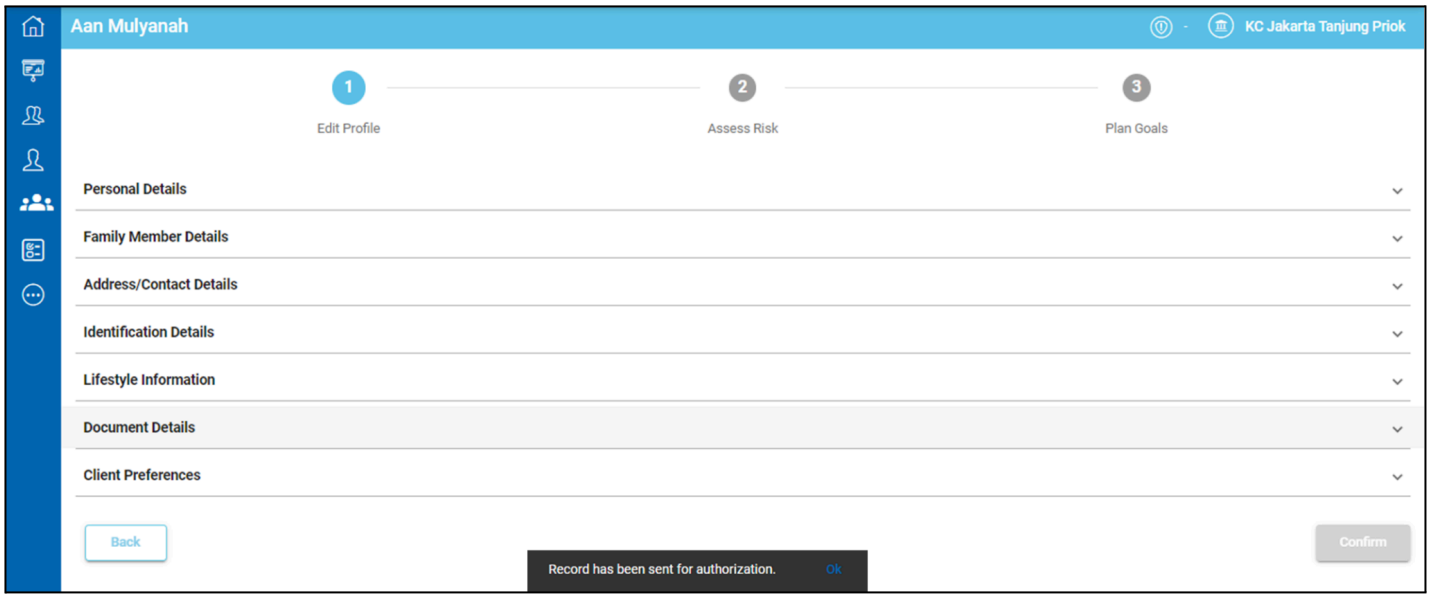


Screen: Upload documents

3. After the user has entered/modified the relevant details in these sections, they can click on the “Confirm” button and the record would be sent for authorization. Users will be redirected to the “My Customer” screen if the risk profiling of customers is not done. If risk profiling already exists for the customer, the user will land on the “Risk Profile” screen
4. If in the past, supervisor has rejected the customer profile record then user can see the rejection reason by clicking on the “Reject Reason” button

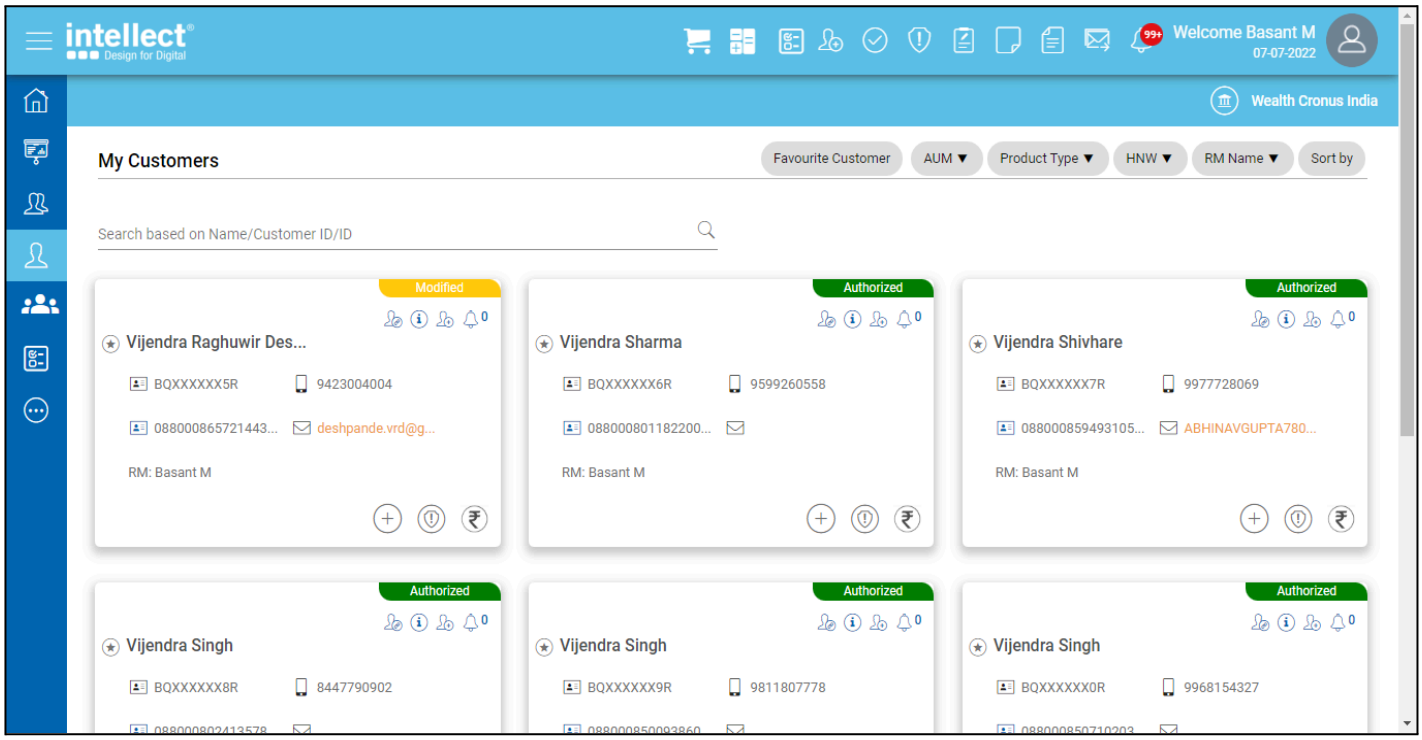


Screen: Confirm Customer Details



Screen: Record sent for authorization

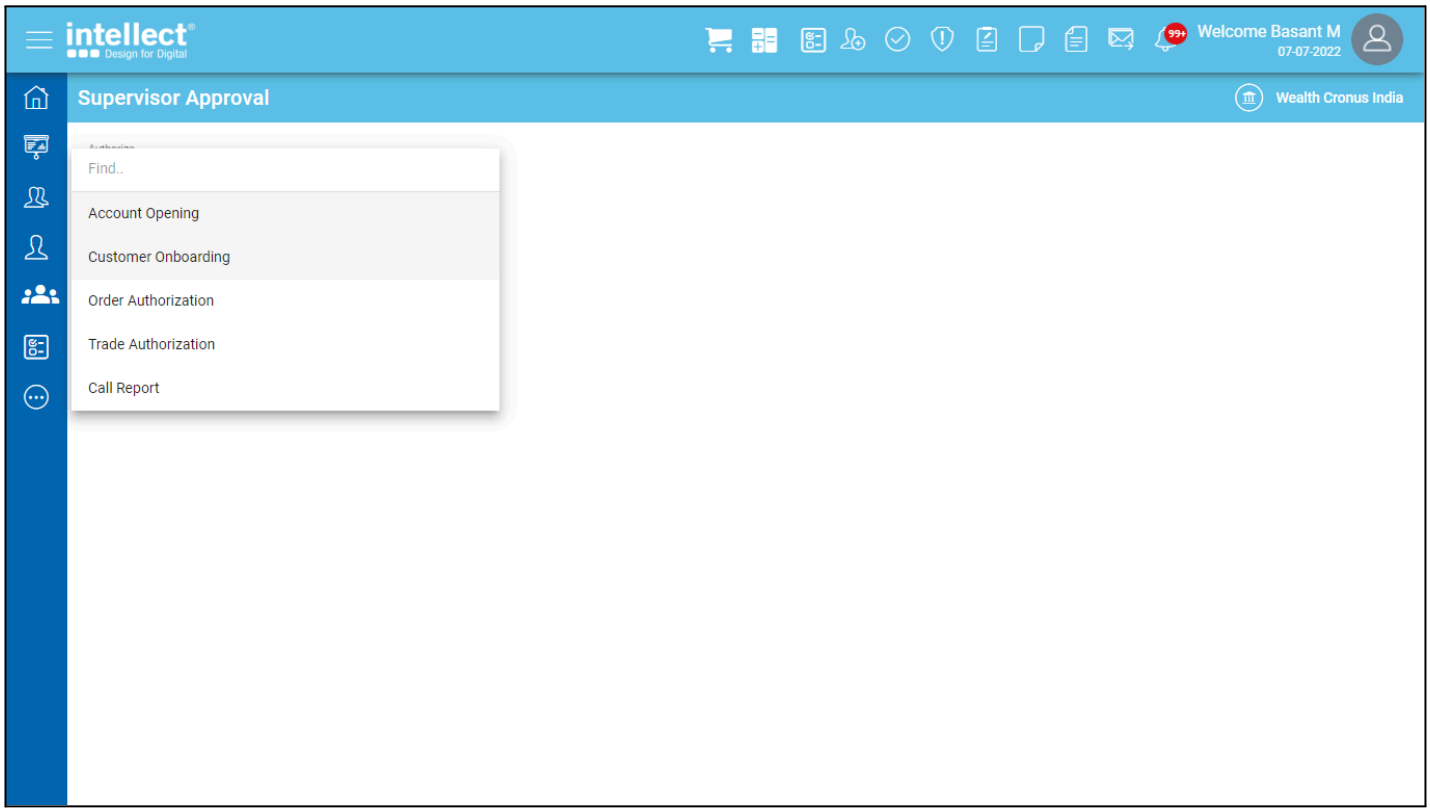
5. Once all the desired details are filled in, User will click on “Confirm” to save the details in the system.
6. On clicking the “Confirm” button, the system will display the below message
7. “Record has been sent for authorization”
8. Till the time the record is authorized, on the customer card in My customers the card will display the status as “Modified”



Screen: Customer Card Status

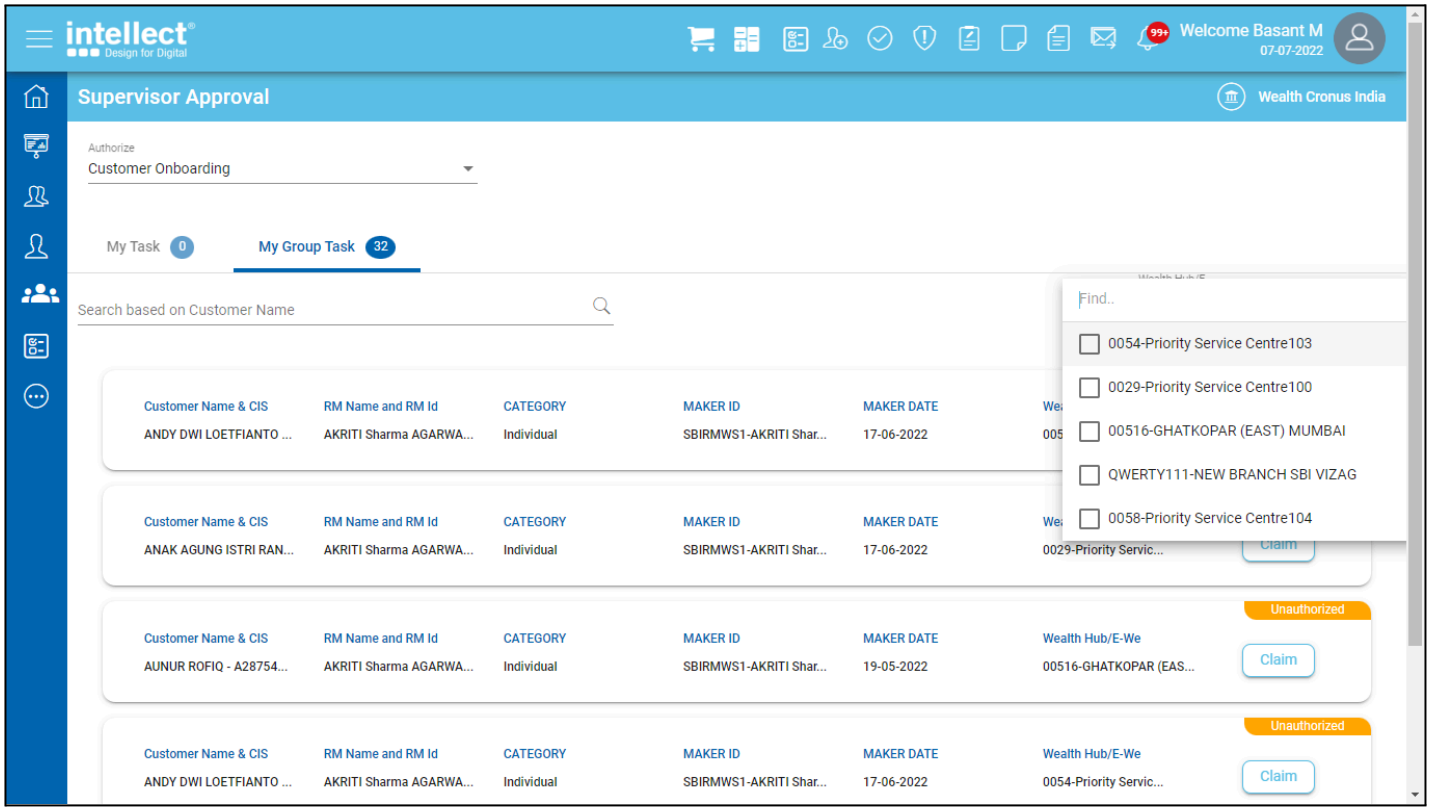
3.3. Supervisor Approval

1. The on boarded customer record can be authorized by any other Checker User except the maker
2. To authorize, the checker has to log into the application and navigate to RM Office
3. Checker will then click on to navigate to the authorization screen
4. Checker will then select "Customer Onboarding" from the Authorize list



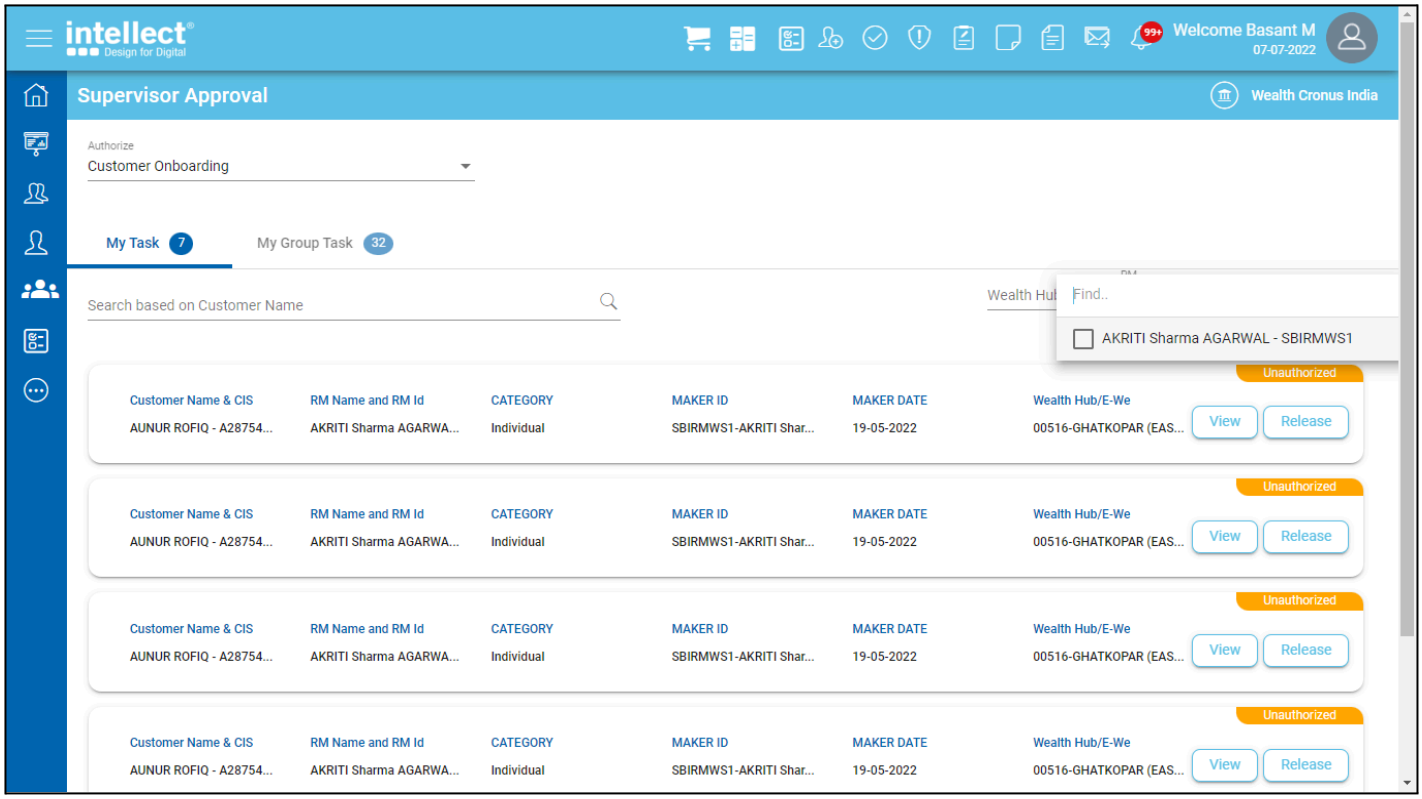
Screen: Checker Authorize menu

5. The authorization screen will load up with 2 sections "My Group Task" and "My Task"
6. The "My Group Task" will display all the records that are currently pending for authorization
7. Checker will have the option to filter all the records as per the RM or wealth hub/e-wealth center
8. The RM filter will display all the customers mapped to the selected RM
9. The wealth hub/e-wealth centre filter will display all the customers mapped to the selected wealth hub/e-wealth centre
10. The checker will also have the option to search for a specific customer by typing in the name
11. The checker can select the desired customer card and click on "Claim"



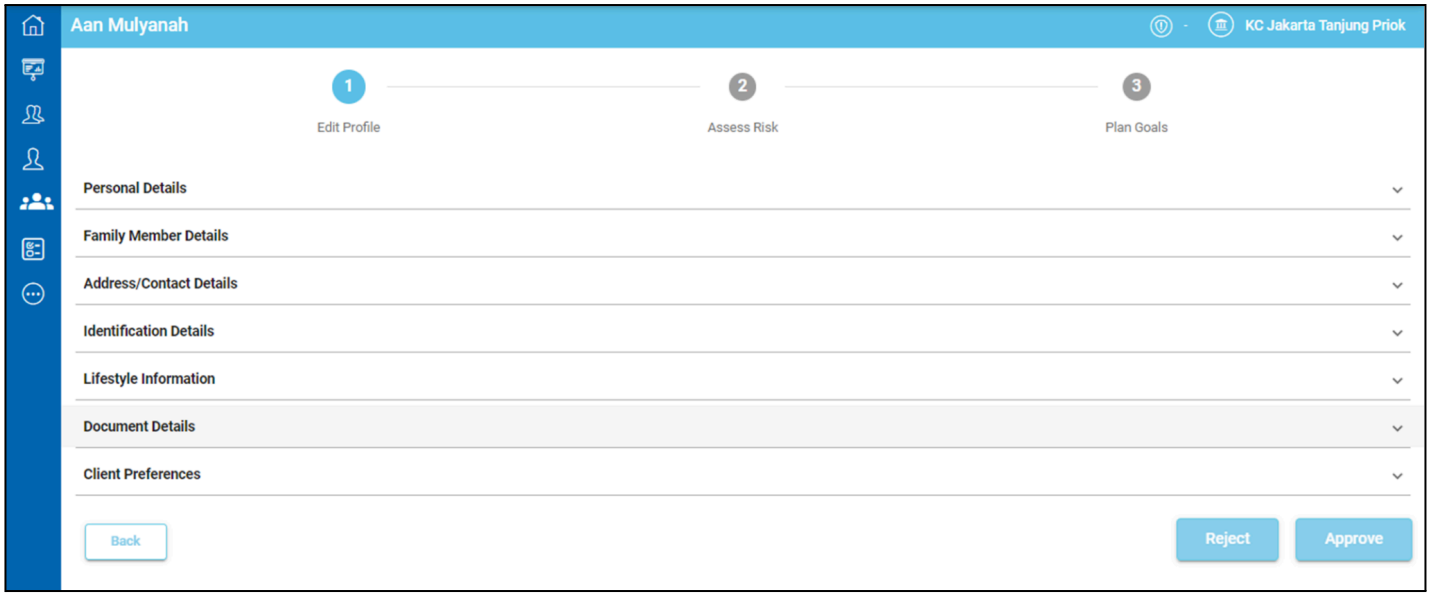
Screen: Authorization – My Group Task

12. The customer card will then move to the “My Task” section
13. Checker will have the same option to filter or search as mentioned above. In the “My Task” section, the checker can search for the desired customer card and click on “View”



Screen: Authorization – My Task

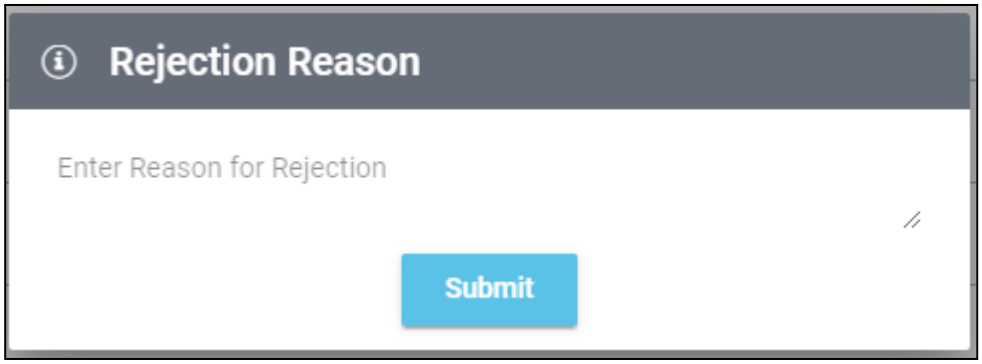
14. The customer profile details will be displayed for the checker to review
15. To authorize the record, the checker can click on “Authorize”
16. To reject, the checker can click on the “Reject” button



Screen: Customer Authorization page

17. System will prompt the supervisor to enter the reject reason

18. Checker can enter the appropriate reject reason and click on Submit



Screen: Checker to enter the reject reason

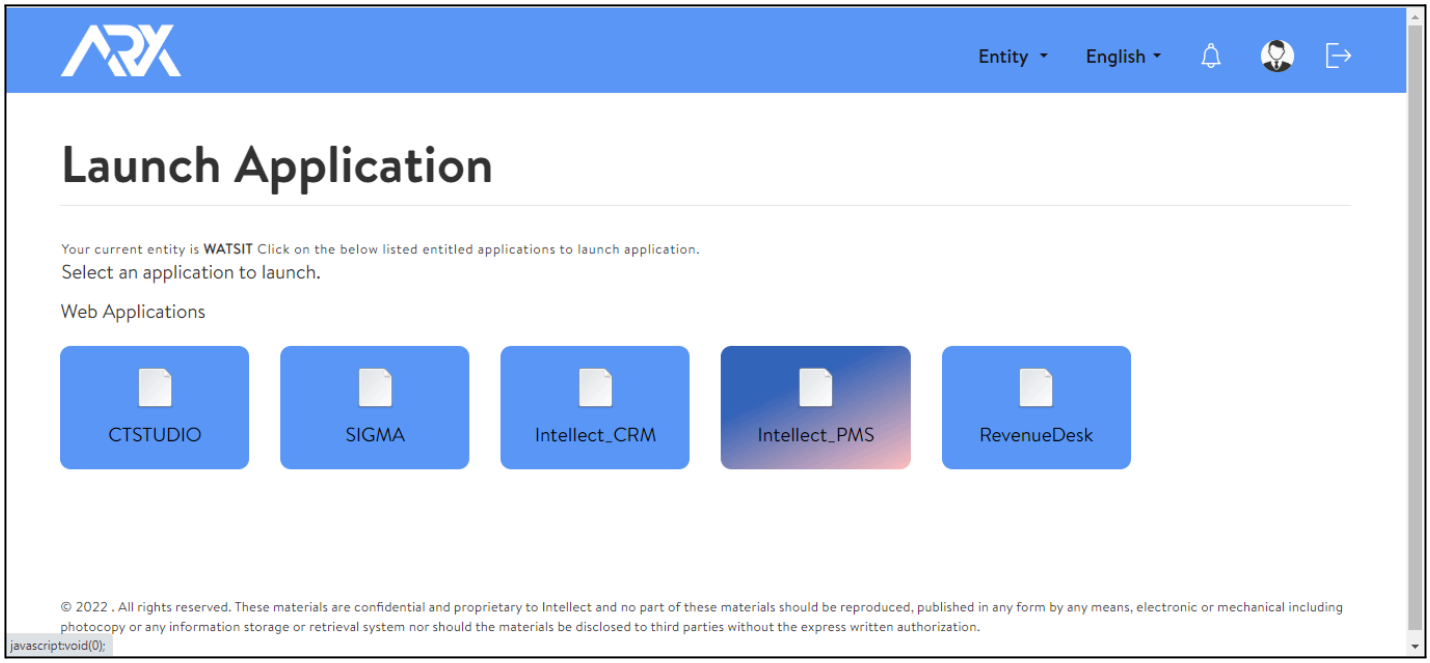
19. To view the reject reason, the checker can navigate to the customer profile details
20. Checker can scroll to the bottom of the screen and click on reject reason
21. A new window will pop up wherein the reject reason will be displayed

Screen: Rejection Reason preview

22. There are validations in customer profile details which are listed below
    i) For a wealth customer, the Client Type is captured as “Primary”
    ii) For a non-wealth customer, the Client Type will be captured as “Secondary”-Default value should be primary as there is only one segment.
    iii) Non-wealth customers are not included in the RM dashboards
    iv) If the Client Type is selected as “Secondary”, the customer RM will be defaulted to “Vacant”, the Wealth Hub will be defaulted as “Not Applicable” and Segment will be defaulted as “Not Applicable”

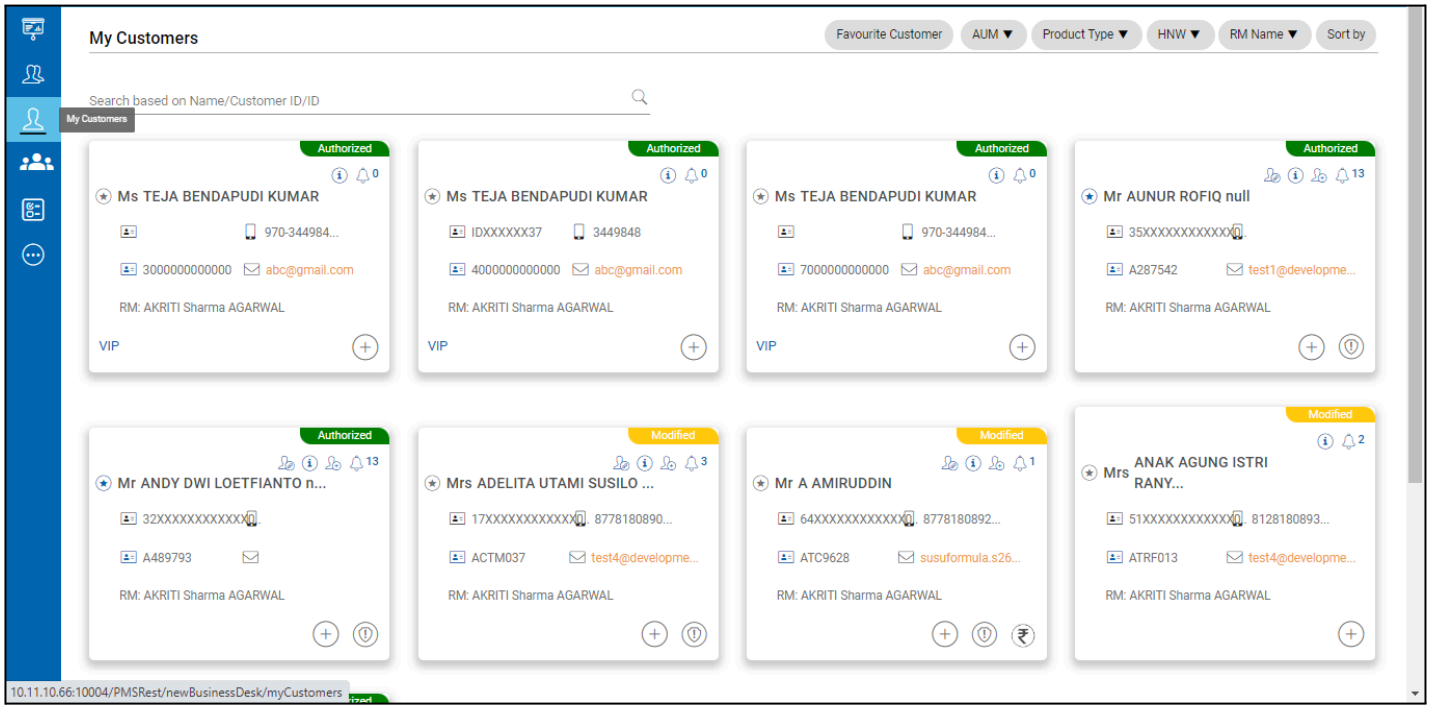
3.4. Accessing Customer card by Secondary RM

1. User will log into the application and navigate to RM Office



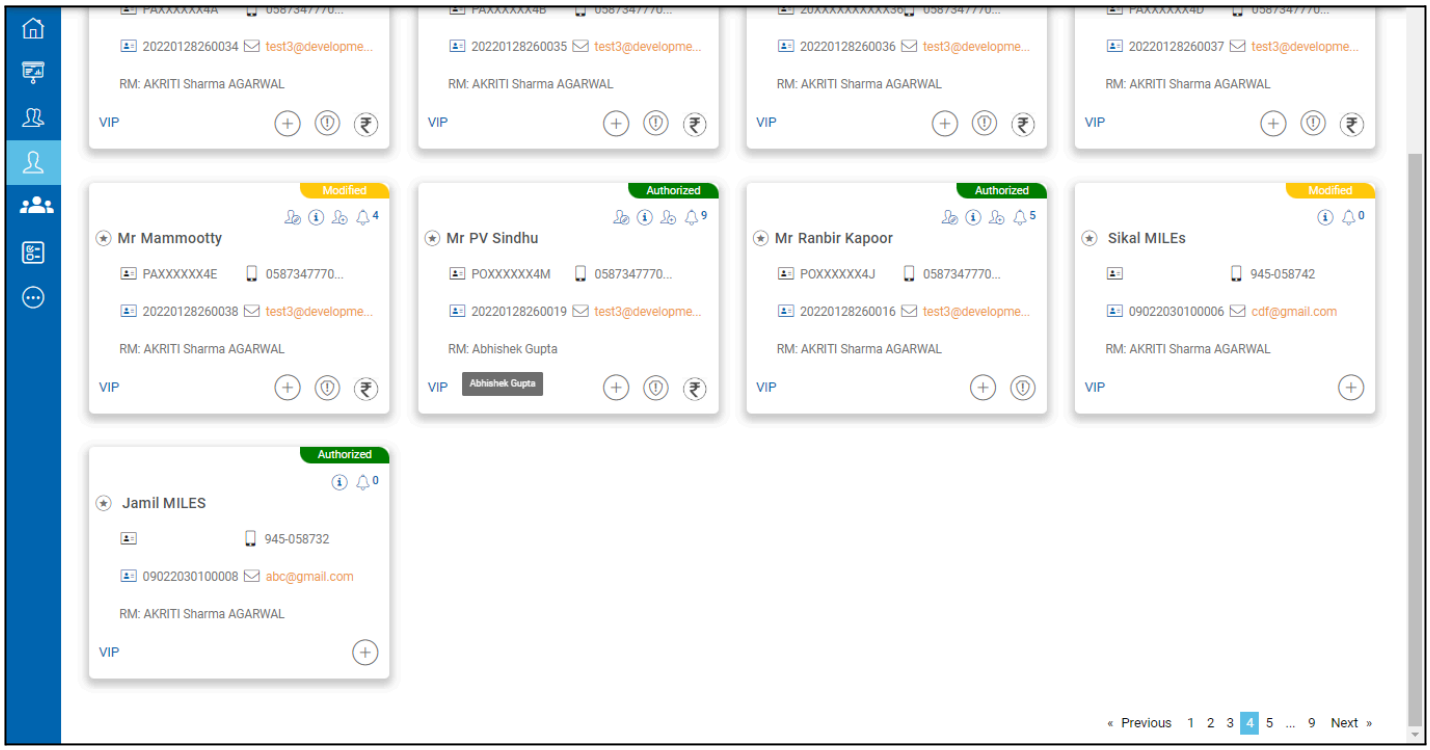
Screen: Navigate to RM office

2. User will then click on icon to navigate to the My customers page



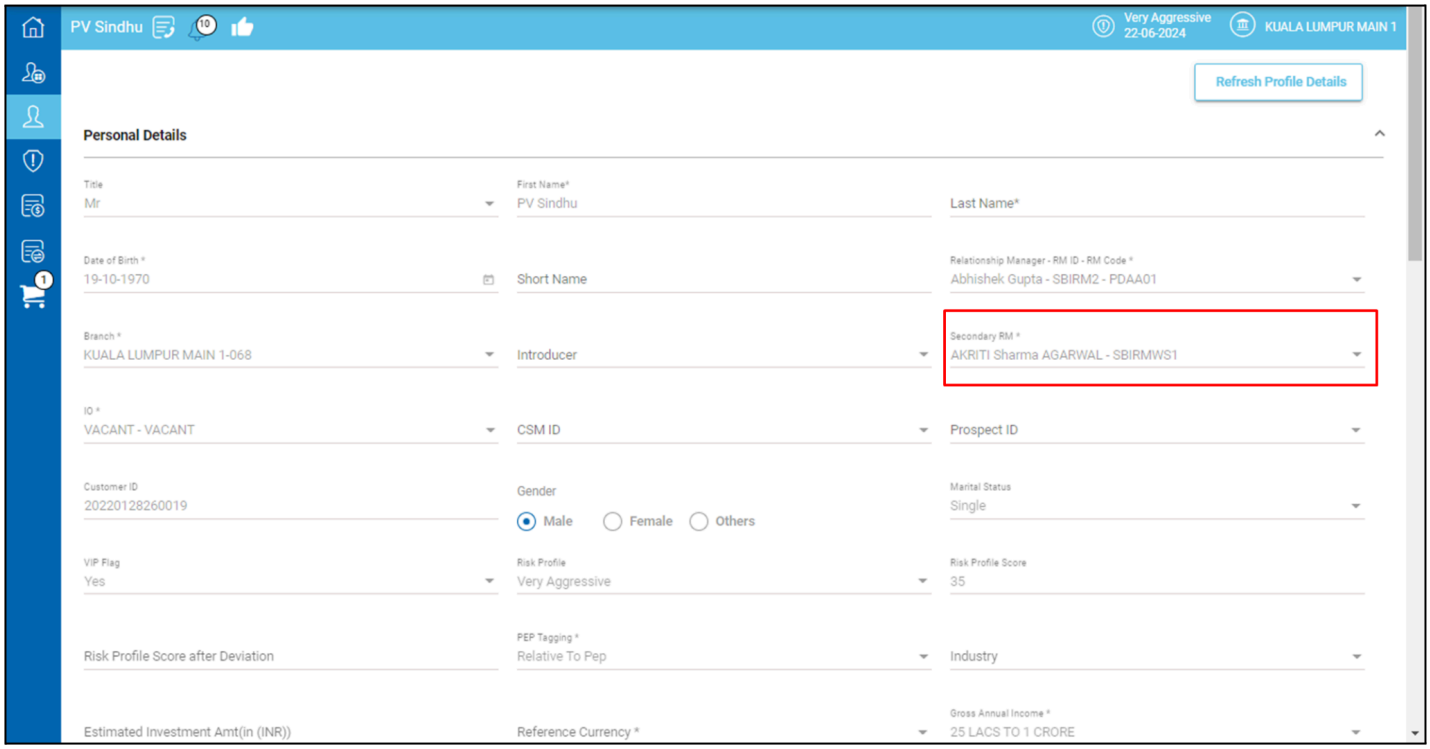
Screen: Navigate to My Customers

3. User will be able to see the customer where he is a Primary RM or a Secondary RM for the customer



Screen: Customer where user is Secondary RM

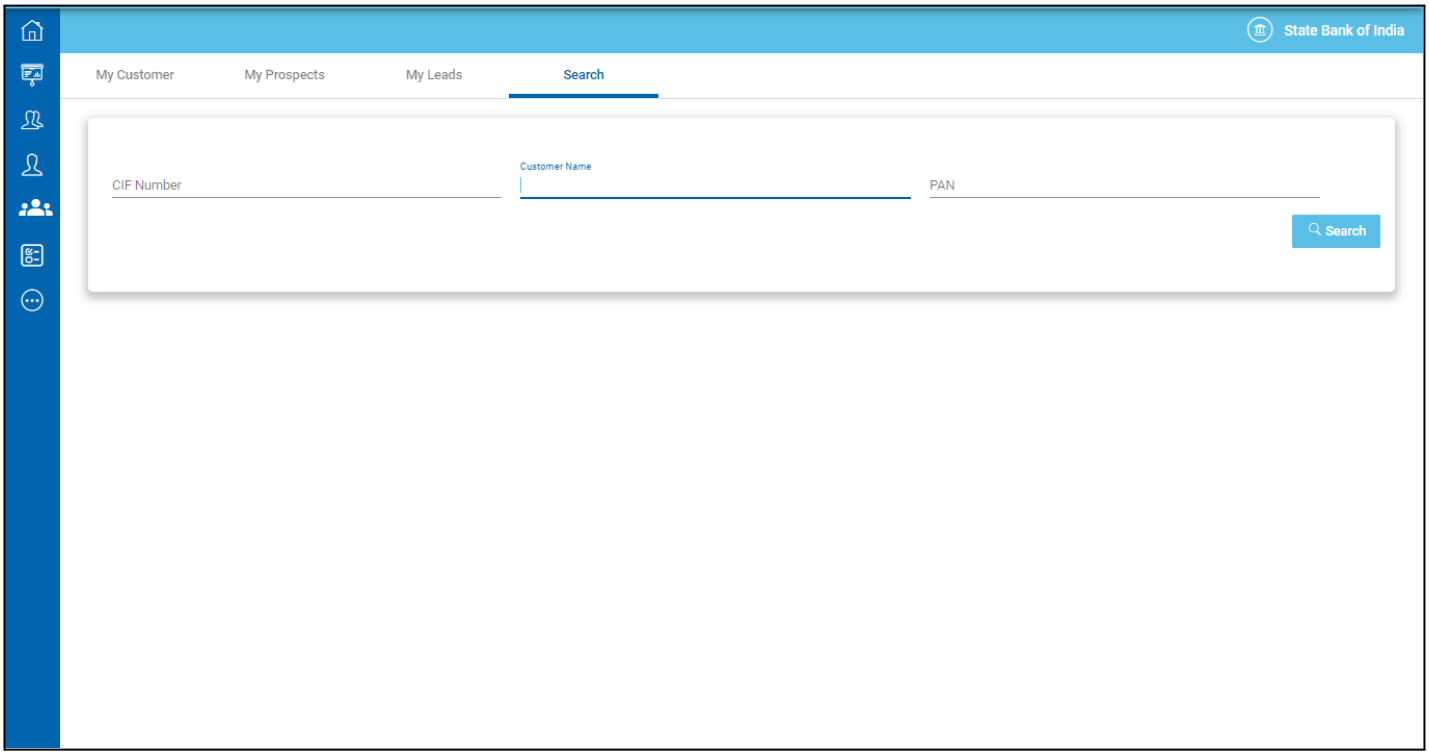
4. User will go to Personal details and Secondary RM information will be displayed.



Screen: Secondary RM mapping to customer

5. User will only be able to access a customer card if he/she is mapped as either the Primary RM or Secondary RM

i) There will be no change in the RM dashboard; the data for the RM dashboard will continue to be populated as per the Primary RM mapping as it exists.
ii) User will be able to access any customer cards from global search as well



Screen: RM can Search the customer

iii) In the customer cards, the RM who is mapped as the secondary can view the customer attributes

3.5. Accessing Customer card by IO

1. IO will log into the application and navigate to RM Office
2. IO will then click on icon to navigate to My Customer page
3. All the customers that are mapped to the IO will be displayed
4. IO can select the desired card and click on the card to navigate to the customer dashboard
5. IO will be able to view the Customer Dashboard, Personal Details, Risk Profile, Holdings and Transaction
6. IO will also be able to view the alerts generated for the customer, See the orders placed for the mapped customers in the order book and file call reports for the mapped customers.

3.6. RM Assignment

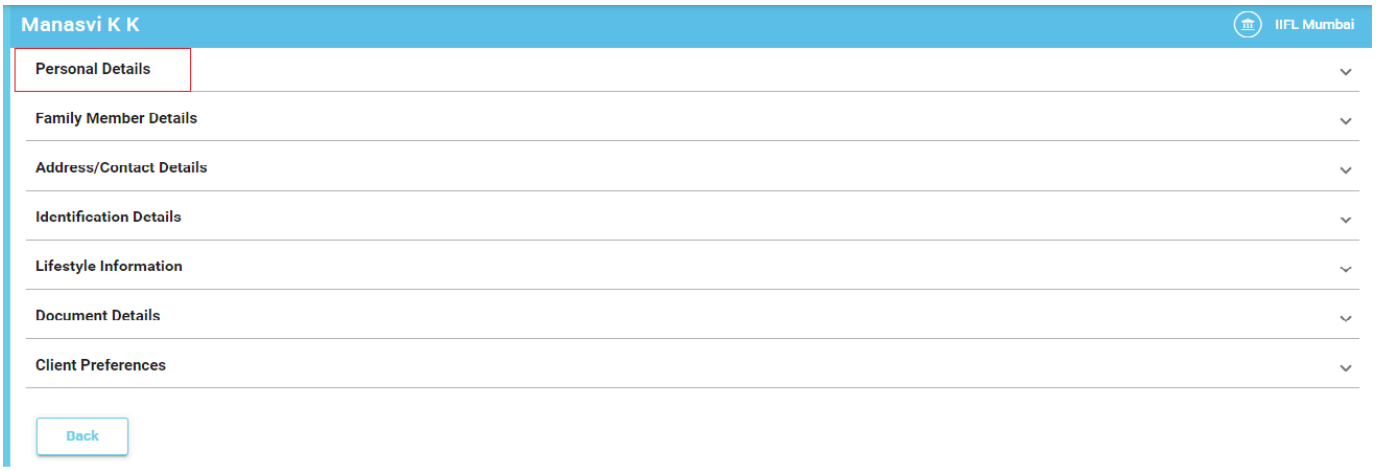
1. Whenever a customer is getting on boarded in the App, there would be a provision to enter a referral code
2. Referral Codes logic is as explained below
    a. Referral Code would be generated outside Intellect system
    a. Referral Code validation would be outside Intellect system
    b. Referral Code could be for an individual (RM) or an organization. Differentiation between the two would be handled outside Intellect system

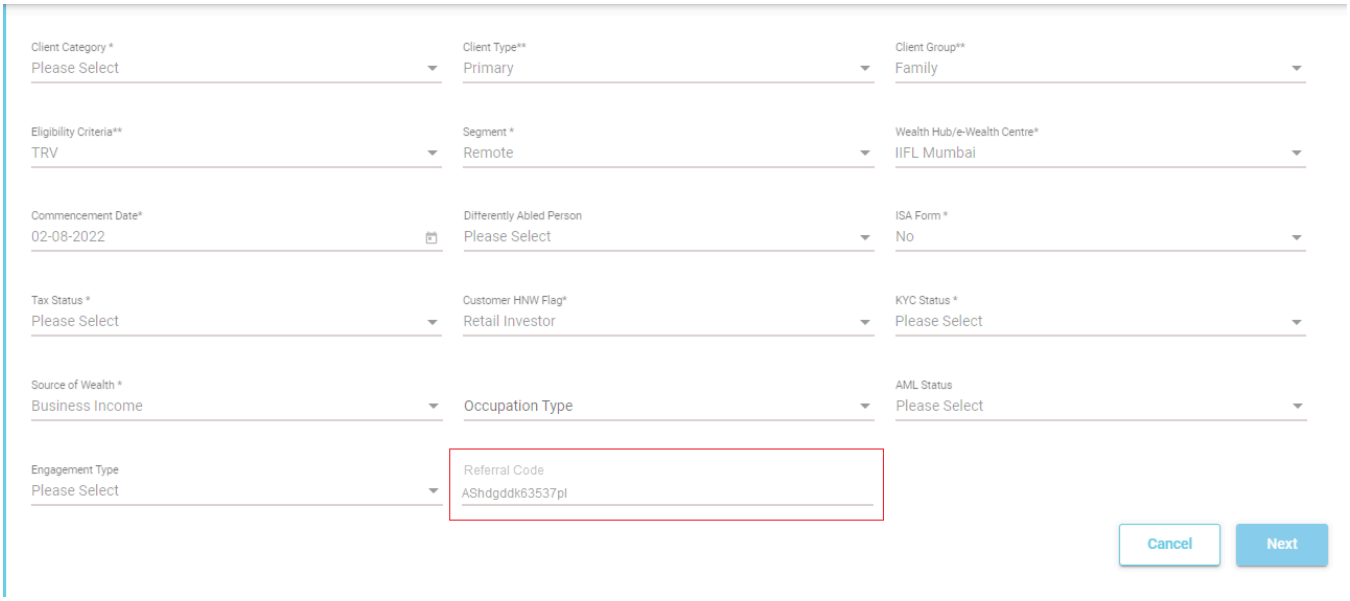
c. Expiry of Referral Code would be handled outside the Intellect system. Ops user will have to update the RMs referral code manually.

d. One RM can have multiple referral codes assigned to him. There would be a provision in the User Master to save the referral code. Maintenance of the referral code for RMs would be done manually by the Ops team. There would be a section “Referral Code” where the user can maintain multiple codes for the RM

f. 2 RMs can't have same referral code mapped to them
g. Customers can enter only one referral code at the time of on boarding and this will be saved in the customer profiling details. There is no other provision to enter the referral code apart from onboarding

2. At the time of onboarding, customers would enter one referral code. If there is no referral code entered by the customer then this field would be blank. This referral code will be stored at customer level.





3. If the system finds a match, then that RM will be assigned to the customer
4. If the referral code sent by app for a customer, does not match with the referral codes of any existing RM or is blank then
5. System will give 3 RM Options to the customer based on the below parameters. RMs will be displayed based on 50 percent weightage to each - time to last assignment and utilization/capacity
    1. Time to last Assignment

    For example if we have three RMs Swati, Suresh and Mahipal. Today is 10th November. Swati's last assignment date was 25th October, Suresh's last assignment date was 5th November and Mahipal's last assignment date was 8th November. So, time to last assignment for Swati, Suresh and Mahipal is 16, 5 and 2 days respectively.

Hence, Swati will be ranked 1, Suresh will be ranked 2 and Mahipal will be ranked 3 respectively

2. Utilization/Capacity

Capacity is the number of customers an RM is serving. So, RM with least number of customers will be ranked 1 and so on
For example, if we have three RMs Swati, Suresh and Mahipal
Swati is serving 100 customers, Mahipal is serving 120 customers and Suresh is serving 100 customers
Hence, Suresh and Swati will be ranked 1st and Mahipal will be ranked 3rd in utilization/capacity

6. For a parameter like Time to Assignment, if two people are sharing the same rank, we are assuming that the rank of the next person will be Previous Rank + 1. For E.g. If the Mahipal and Swati both get the same rank 1 then Suresh will be given rank 3 (not rank 2)
7. Calculation of final rank based on 50% weightages

Parameter	Suresh	Mahipal	Swati
Time to Last Assignment	2	3	1
Utilization	1	3	1
Score based on 50% weightage	=(2*0.5)+(1*0.5) = 1.5	=(2*0.5)+(3*0.5) 2.5	=(1*0.5)+(1*0.5) 1
Final Rank	2	3	1

8. Swati would be the first preference, Suresh would be the second preference and Mahipal would be the third preference. App will get all the 3 RM Names as a response to RM Assignment API. Swati's name wil be sent as default in the API to App
9. The RM selected by the customer would be sent to Intellect by App in the
10. Based on the final rank, if 2 RMs are assigned Rank 3, then the system would recommend in ascending alphabetical order of their names
11. Only "RM" role will be considered for RM Assignment.

4. Field Level details

S No	Category	Field Name	Field Description	Field type	Editable	Data Type	Mandatory	List of Values
1	Personal Details	Title	Displays the title of the customer	Select	Yes	String	No	Refer to the Common List of Values Sheet - Title
2	Personal Details	First Name	Displays the first name of the customer	Display	No	String	Yes	Not Applicable
3	Personal Details	Last Name	Displays the last name of the customer	Display	No	String	Yes	Not Applicable

4	Personal Details	Date of Birth	Displays the date of birth of the customer	Display	No	String	Yes	Not Applicable
5	Personal Details	Short Name	Inputs the short name of the customer	Input	Yes	String	No	Not Applicable
6	Personal Details	Relationship Manager Name & ID	Displays the relationship manager for the customer	Display	No	String	Yes	List of all the relationship managers
7	Personal Details	Branch	Displays the branch of the customer	Display	Yes	String	Yes	List of all the branches from Branch maintenance
8	Personal Details	Introducer	Selects the introducer for the customer	Select	Yes	String	No	List of users
9	Personal Details	Secondary RM	Selects the secondary RM for the customer	Select	Yes	String	No	List of all the relationship managers
10	Personal Details	IO	Selects the investment officer for the customer	Select	Yes	String	No	List of all investment officers
11	Personal Details	CSM ID	Displays the CSM ID	Display	No	String	No	Not Applicable
12	Personal Details	Prospect ID	Displays the prospect ID if the prospect is converted to customer	Display	No	String	No	Not Applicable
13	Personal Details	Customer ID	Displays the unique customer identification number of the customer	Display	No	Numeric	Yes	Not Applicable
14	Personal Details	Gender	Displays the gender of the customer	Display	No	Character	No	1. Male 2. Female 3. Others
15	Personal Details	Marital Status	Displays the marital status of the customer	Display	Yes	Character	No	1. Divorced 2. Living Apart 3. Married 4. Unknown 5. Single 6. Widowed 7. Defacto 8. Never Married
16	Personal Details	VIP Flag	Displays the VIP flag of the customer	Display	Yes	Character	No	1. Yes 2. No

17	Personal Details	Risk Profile	Displays the risk profile of the customer	Display	No	Character	No	List of Risk Profiles
18	Personal Details	Risk Profile Score	Displays the risk profile score of the customer	Display	No	Numeric	No	Not Applicable
19	Personal Details	Risk Profile Score after deviation	Displays the risk profile score of the customer after deviation	Display	No	Numeric	No	Not Applicable
20	Personal Details	PEP Tagging	Displays the Politically Exposed Person tagging for the customer	Select	Yes	Character	No	1. Yes 2. No 3. Relative to Pep
21	Personal Details	Industry	Displays the industry for the customer	Display	No	String	No	Refer to the Common List of Values Sheet
22	Personal Details	Estimated Investment Amt (in INR)	Inputs the estimated investment amount of the customer	Input	Yes	Numeric	No	Not Applicable
23	Personal Details	Reference Currency	Displays the reference currency for the customer	Display	Yes	String	Yes	Refer to the Common List of Values Sheet - Currency
24	Personal Details	Gross Annual Income (INR)	Selects the Annual income of the customer	Select	Yes	String	Yes	Below are the LOV's which are available. 1. No Income 2. 1 - 10 Lakhs 3. 10 - 30 Lakhs 4. 30 -50 Lakhs 5. 50 - 100 Lakhs 6. 1 - 3 Crores 7. 3 - 5 Crores 8. 5 - 10 Crores 9. 10 Crores Above.

25	Personal Details	Designation (Others Description)	Inputs the Designation Description if Others is selected for Designation	NA	Yes	String	No	Below are the LOV's available 1. CXO/Founder 2. Senior management personnel 3. Mid management personnel 4. Entry management personnel
26	Personal Details	Occupation	Selects the occupation of the customer	Display	No	String	Yes	Refer to the Common List of Values Sheet - Occupation
27	Personal Details	Employment Type	Displays the type of employment for the customer	Display	Yes	String	No	Refer to the Common List of Values Sheet - Employment Type
28	Personal Details	Organisation	Displays the employer name of the customer	Input	Yes	String	No	Not Applicable
29	Personal Details	Education Institute	Inputs the name of the Education Institute	Input	Yes	String	No	Not Applicable
30	Personal Details	Nationality	Displays the nationality of the customer	Display	No	String	Yes	Refer to the Common List of Values Sheet - Nationality
31	Personal Details	Birth Country	Displays the birth country of the customer	Display	No	String	Yes	Refer to the Common List of Values Sheet - Country
32	Personal Details	FATCA Indica	Displays the FATCA indicator of the customer	Display	No	Character	Yes	1. Yes 2. No
33	Personal Details	Place of Birth	Select the place of the birth of the customer	Display	No	String	Yes	Refer to the Common List of Values Sheet - City
34	Personal Details	Country of Residence	Displays the country of residence for the customer	Display	No	Character	No	Refer to the Common List of Values Sheet - Country
35	Personal Details	Resident Status	Displays the resident status for the customer	Select	Yes	Character	No	1. Resident 2. Non Resident 3. RNOR 4. ROR 5. FC

36	Personal Details	Last Contacted Date	Inputs the last contacted date by the RM for the customer	Input	Yes	String	No	Not Applicable
37	Personal Details	Vulnerable Customer	Displays the Vulnerable Status (Yes/No) of the customer	Select	Yes	Character	No	1. Yes 2. No
38	Personal Details	Risk Level	Displays the risk level of the customer	Display	No	Character	No	List of Applicable Risk Levels
39	Personal Details	Status	Displays the status of the customer in Core Banking	Display	No	Character	Yes	1. Active 2. Inactive
40	Personal Details	Last Review Date	Displays the last review date of the customer	Display	No	String	No	Not Applicable
41	Personal Details	Client Status	Selects the status of customer in Wealth System	Select	Yes	String	No	1. Active 2. Inactive
42	Personal Details	Account Number	Inputs the cash account no of customer	Input	Yes	Numeric	No	Not Applicable
43	Personal Details	Client Category	This is the first level classification which will capture the category of the customer. This will be a single select field.	Select	Yes	String	Yes	1.NTW 2.ETW 3.To be Mapped
44	Personal Details	Client Type	This is the second level classification where RM will capture the customer type. This will be a single select field.	Select	Yes	String	Conditional	1. Primary 2. Secondary
45	Personal Details	Client Group	This is the third level classification where RM will capture the customer group.	Select	Yes	String	Conditional	1. Individual 2. Family

46	Personal Details	Eligibility Criteria	This is the fourth level of classification and captures the criteria for onboarding the customer. This will be a single select field.	Select	Yes	String	Conditional	1. Salary 2. Home Loan 3. Rank Based 4. VIP 5. Retiree 6. TRV 7. CUG 8. Auto Upgrade
47	Personal Details	Segment	Selects the segment of the customer	Select	Yes	String	Yes	1. Remote 2. Traditional
48	Personal Details	Wealth Hub/Ewealth Centre	Selects the wealth hub or e-Wealth Centre to which the customer belongs to	Select	Yes	String	Yes	List of branches from branch maintenance for which the branch classification is "Wealth Hub" or "e-Wealth Centre"
49	Personal Details	Commencement Date	Inputs the date from which the customer becomes a wealth customer	Display	No	Date	Yes	Not Applicable
50	Personal Details	Differently abled person	Selects if the customer is differently abled or not	Select	Yes	String	No	1. Yes 2. No
51	Personal Details	ISA Form	Displays if the ISA Form has been filled by the customer	Display	No	String	Yes	1. Yes 2. No
52	Personal Details	Tax Status	Selects the tax status of the customer. Based on the 4th character of the PAN ID Number, the applicable list of values will be displayed	Display	No	String	Yes	Refer to sheet Tax Status
53	Personal Details	Customer HNW Flag	Selects whether the customer is HNI or not	Select	Yes	String	Yes	1.High Net Worth (Hnw) 2.Retail Investor 3.Upper High Net Worth (Uhnw)

54	Personal Details	KYC Status	Selects the KYC status for the customer	Display	No	String	Yes	Refer to the Common List of Values Sheet - KYC Status
55	Personal Details	Source of Wealth	Selects the source of Wealth for the customer	Display	No	String	Yes	1. Business Income 2. Gift 3. Ancestral Property 4. Rental income 5. Prize Money 6. Royalty 7. Others 8. Salary
