1. Introduction

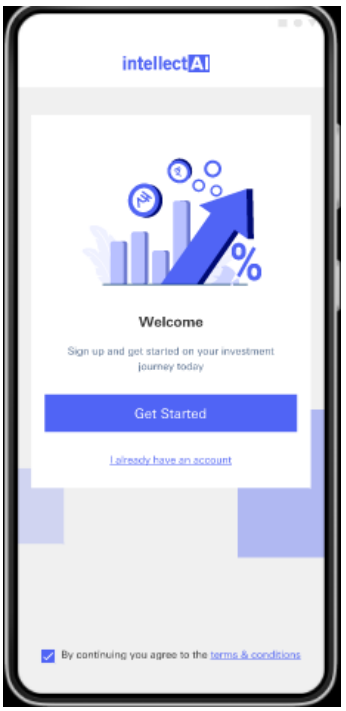
This document covers the signup, KYC and the Wealth account opening process of the customer on the Intellect mobile app. Users can sign up and complete the KYC along with account opening or skip the KYC process and move to the dashboard.

2. Prerequisites

Not Applicable

3. Mobile App Home Page

1. The user will install the Application from the Play Store into the mobile and will launch the Application.
2. Once the application is launched, the user has to click on the “Get Started” Button after agreeing to the terms and conditions on the Home page which will redirect the user to the Register Page. If the user already has an account they can click on “I already have an account” and Login.



Screen: Mobile App Home page

4. Register Screen

If the user has clicked on Get started then register screen will be displayed as below

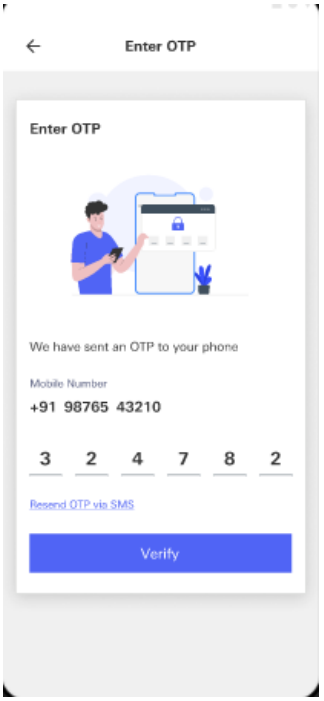
4.1. Mobile Verification

1. The user needs to provide a 10-digit valid mobile number and click on the "Send OTP" button. Then the user will be redirected to the "Enter OTP" Screen.

Screen: Get started 1.1

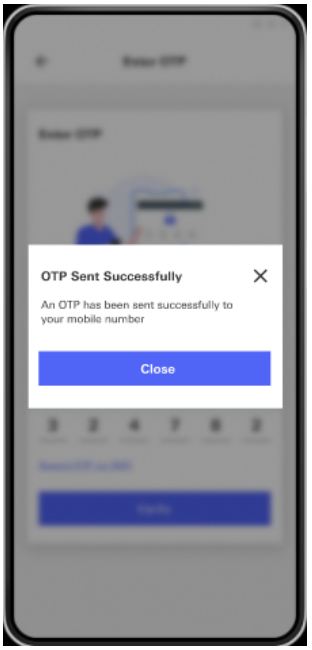
2. The user will provide the valid OTP received on the given mobile number and click on the

“Verify” button.



Screen: Mobile OTP

3. When the user doesn't receive the OTP then the user needs to click on the “Resend OTP via SMS” link, and the user will receive a new OTP to the provided Mobile number. On the Mobile Screen, the user will see the “OTP Sent Successfully” popup message. After closing the pop up user will enter the new OTP and click on verify
4. Once the mobile number is validated system will do a dedupe check, If the dedupe check is passed then a prospect id will be created in the system.

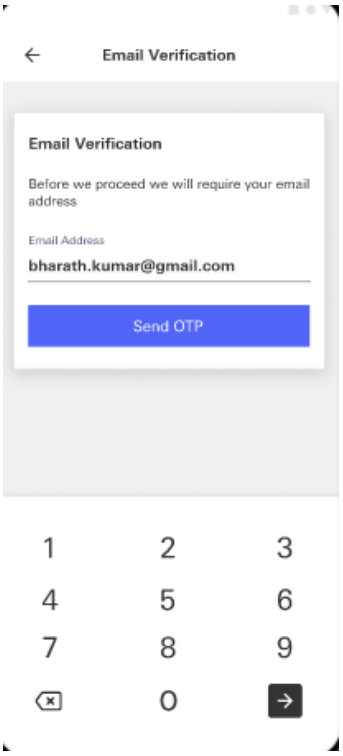


Screen: Resend OTP

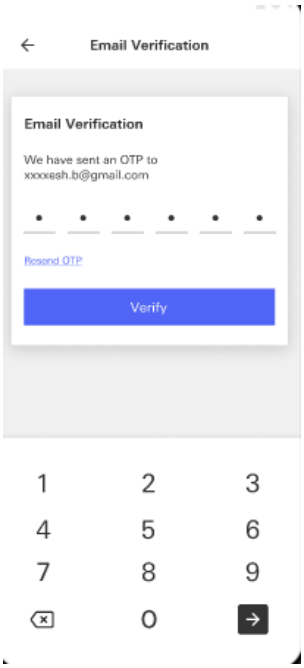
4.2. Email Verification

1. Once the User's mobile number has been verified the user will be redirected to the Email

Verification Screen. The user has to provide a valid Email ID and click on the “Send OTP” button.

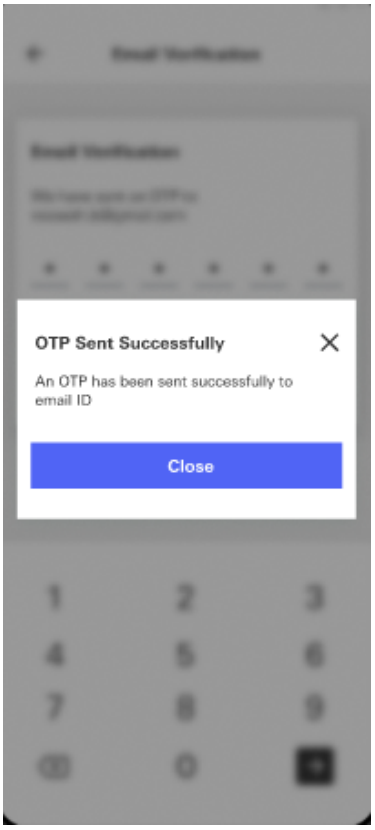


2. The user has to provide the valid OTP number received on the given Email ID.



Screen: Email Verification

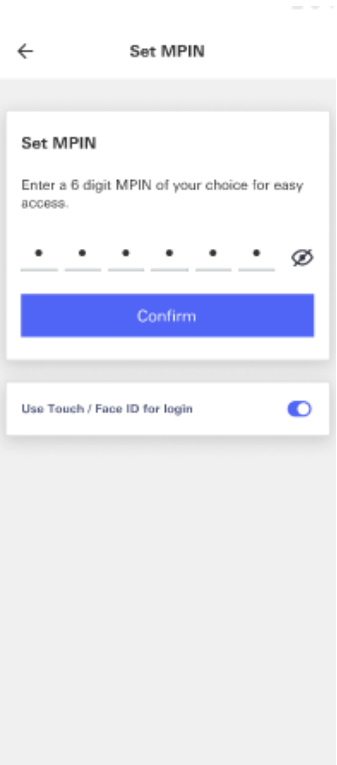
3. When a user doesn't receive the OTP then the user needs to click on the “Resend OTP" link, and the user will receive a new OTP to the provided Email ID. On the Mobile Screen, you will see the “OTP Sent Successfully” popup message. After closing the pop-up the user will enter the new OTP and click on verify.



Screen: Resend OTP to the Email ID

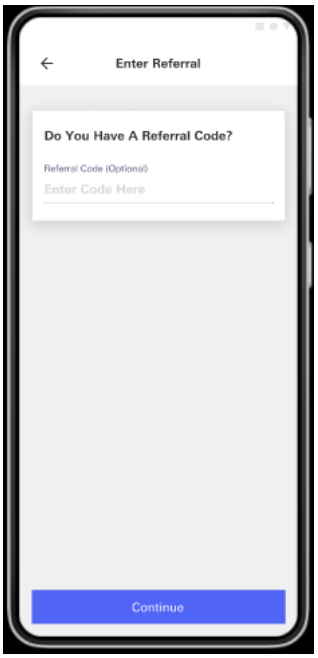
4.3. Set MPIN

1. Once the Email ID has been verified, the user will be redirected to the “Set MPIN” screen. The user must provide the 6-digit MPIN number and click the “Confirm” button.
2. Use Touch / Face ID for Login: Enabling this link will allow users to log into the application through Finger Lock or Face ID instead of MPIN.

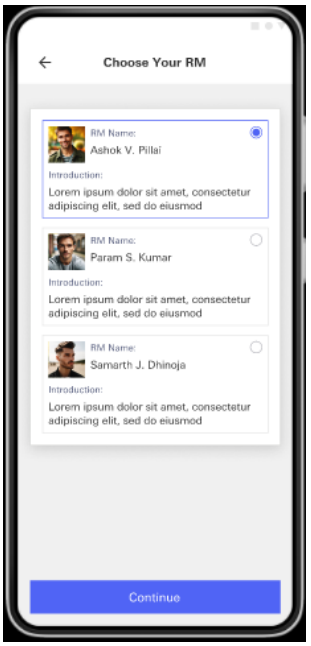


Screen: Set MPIN

3. Once the MPIN is entered then APP will display the option to enter an optional Referral code to map the RM. If the referral code is not entered then user will receive recommendation basis the RM assignment Logic.

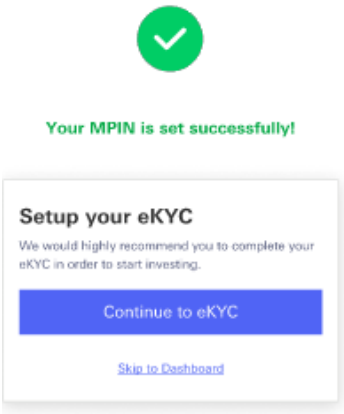


Screen: Enter Referral code



Screen: RM recommendation

4. The Setup e-kyc screen will be displayed.



Screen: MPIN Success Screen

5. Once the user has successfully set the MPIN, on the screen the user will have two options
   5.1. Continue to complete e-KYC
   5.2. Skip to Dashboard link where the user can review existing products

5. Skip to Dashboard

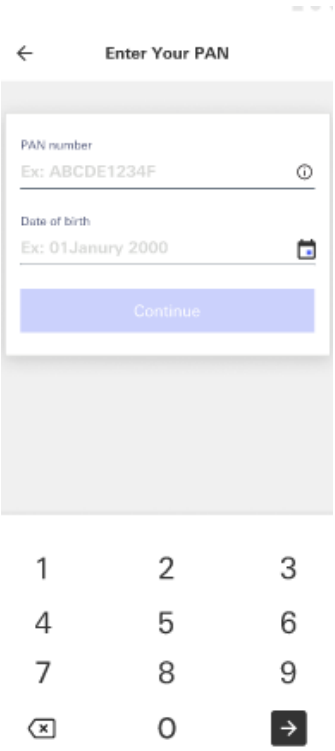
This is covered as a part of the DIY Journey of Customer Dashboard document

6. Set up your E KYC

For the eKYC process, the user has to click on the "Continue to eKYC button" which will be redirected to the "Enter Your Pan" screen.

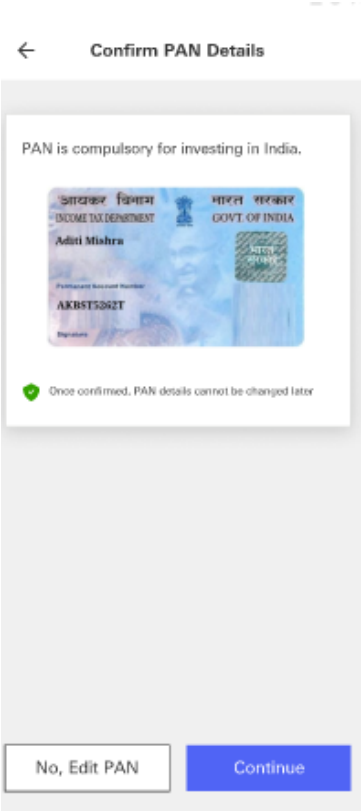
6.1. Enter your PAN

1. The user has to provide a valid PAN number and Date of Birth selected from the Calendar. The user has to click on the Continue button which will be redirected to the "Confirm PAN Details" Screen



Screen: Enter Your PAN Screen

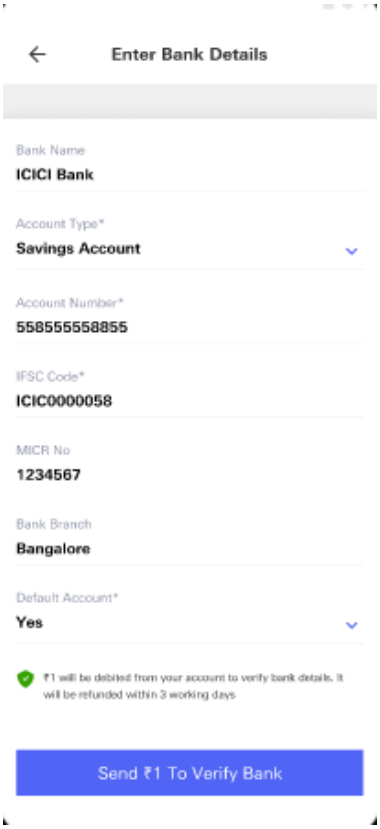
2. The user can see the entered PAN details on this screen. Also, the user can edit the PAN details by clicking on the "No, Edit PAN" button which will again redirect the user to the "Enter Your PAN" screen.
3. Once the Pan is confirmed then a KYC check will be done whether the customer is KYC compliant or not



Screen: Confirm PAN Details

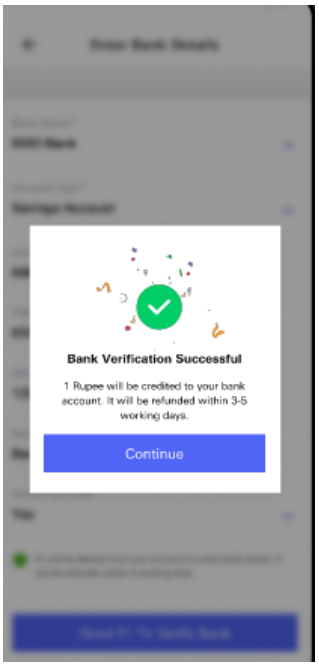
6.2. Enter Bank Details

1. Clicking on the “Continue” on the Confirm PAN Details screen will redirect the user to the “Enter Bank Details” screen.
2. On this screen, the user has to provide the Mandatory details like Bank Name, Account Type, Account Number, IFSC code, and Default Account and click on the “Send ₹ 1 To Verify Bank” button. A penny drop validation will happen in the entered bank details for verification



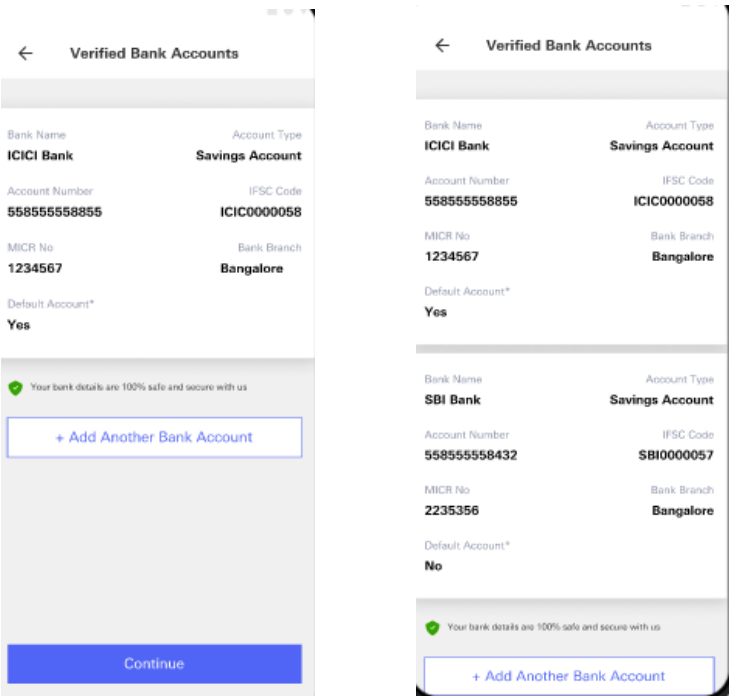
Screen: Enter Bank Details

3. The user will see the Successful message when the Bank account is verified via a penny drop. Clicking on the “Continue” button will redirect to the “Verified Bank Accounts” screen.



Screen: Enter Bank Details

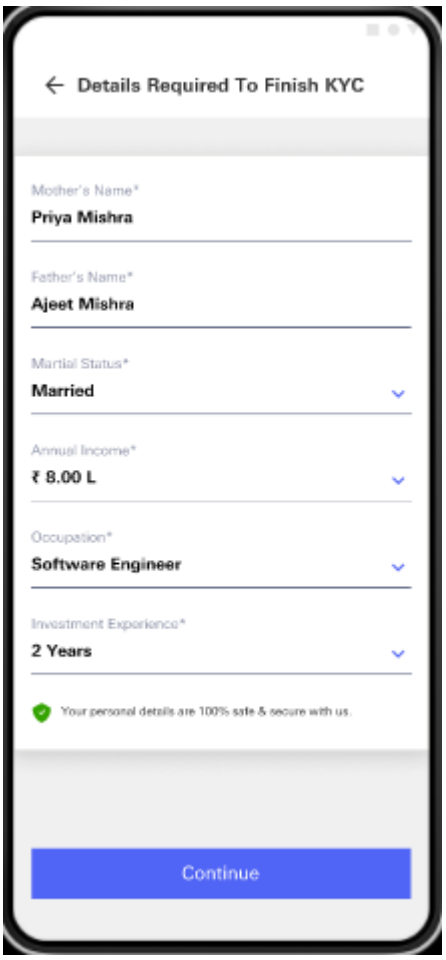
4. On this screen, the user can add another bank account by clicking on the “Add another Bank Account” button which will again redirect to the “Enter Bank Details” screen.
5. The user can add a maximum of five bank accounts. Clicking on the ‘Continue” button will redirect the user to the “Details Required to Finish KYC” screen.

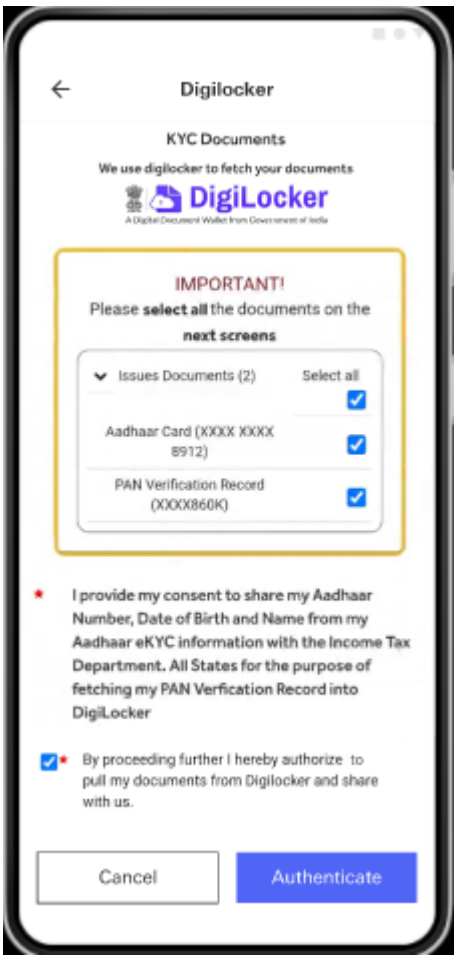


Screen: Verified Bank Accounts

6.3. KYC Details

1. On this screen, the user has to provide the mandated fields like Mother’s Name, Father’s Name, Marital Status, Annual income, Occupation, Investment Experience
2. After providing the details, the user has to click on the “Continue” button which will redirect to the “KYC Documents Authenticate” screen.
3. Clicking on the “Cancel” button the user will be redirected back to the “Details Required to Finish KYC” screen

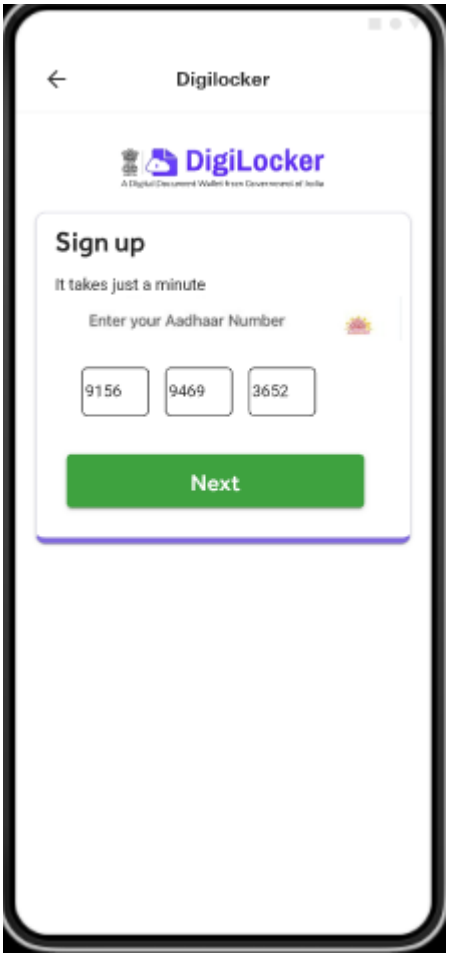




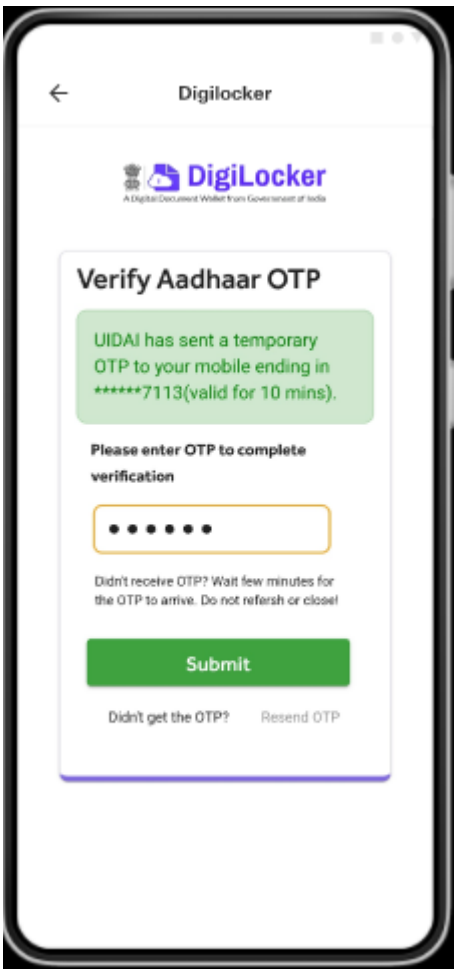
Screen: Details Required To Finish KYC

Screen: KYC Documents Authentication

4. Clicking on the "Authenticate" button, the user will be redirected to the DigiLocker Sign-up screen where the user has to provide a valid Aadhaar number.
5. The user has to click on the "Next" button which will redirect to the "Verify Aadhaar OTP" screen.
6. The user has to provide the OTP received on the Aadhaar-linked mobile number and click on the "Submit" button to complete the Aadhaar Verification.

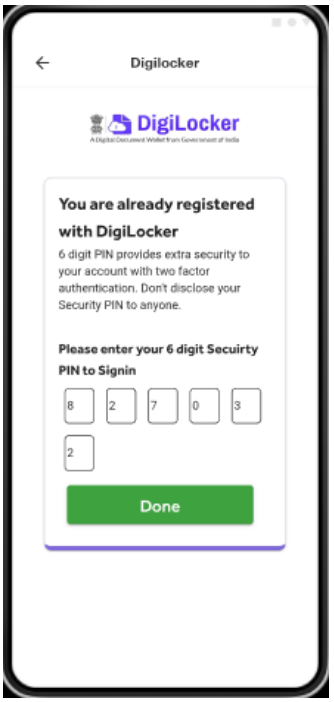


Screen: DigiLocker Signup



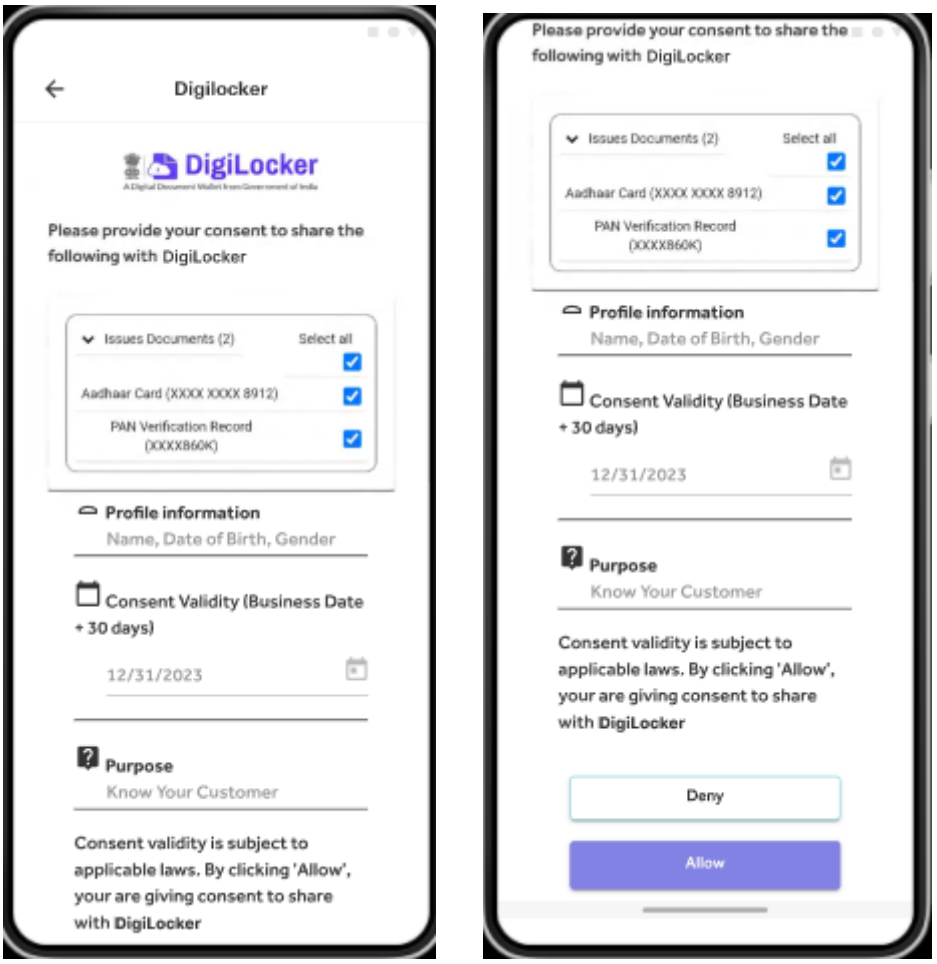
Screen: DigiLocker Aadhaar Verification

7. After the verification, the user must provide the 6-digit Security PIN to Sign into DigiLocker and click the "Done" button. If the user doesn't have a DigiLocker account then the user will be prompted to create an account.



Screen: DigiLocker Security PIN

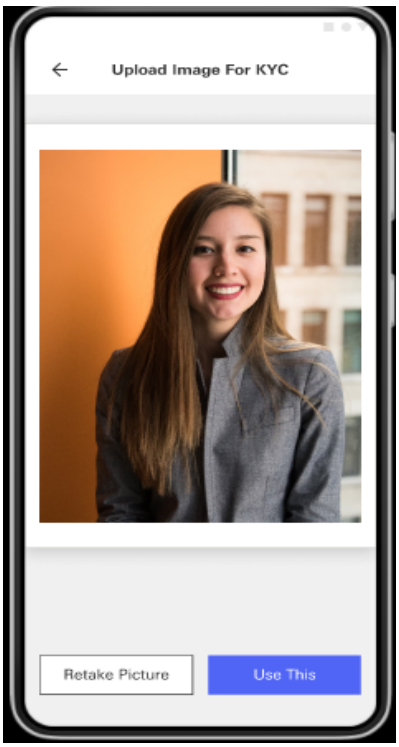
8. Once clicked on the “Done” button, the user will be redirected to the “DigiLocker Consent” Screen.
9. The user has to select the check boxes next to the documents, and click on the “Allow” button.

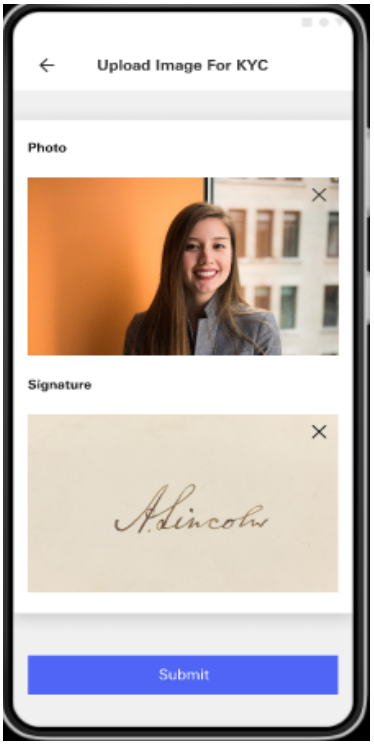


Screen: DigiLocker Consent

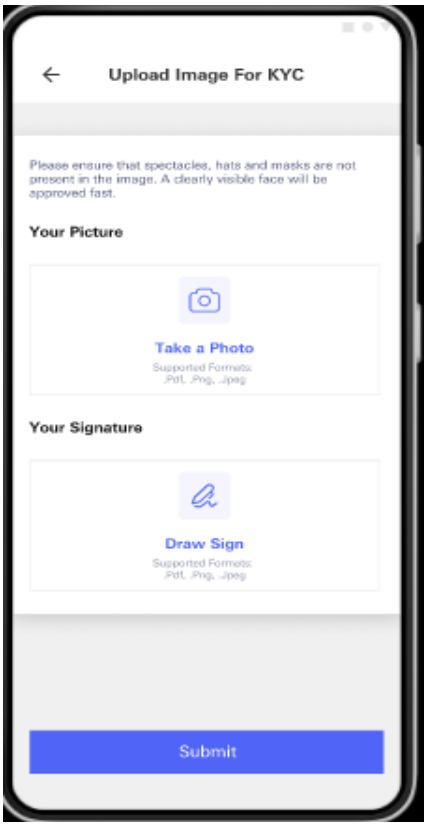
6.4. Upload Image and Signature

1. The user will be redirected to the “Upload Image for KYC” screen from the DigiLocker Consent screen. Here the user has to upload the Picture and Signature.
2. Your Picture: Clicking on the “Take Photo” section, the user can capture the photo through a mobile camera
3. Your Signature: The user can draw the “Signature” by clicking on the “Draw Sign” section
4. User will have to check the PEP and FATCA declaration post signature is captured





Screen: Upload Image for KYC

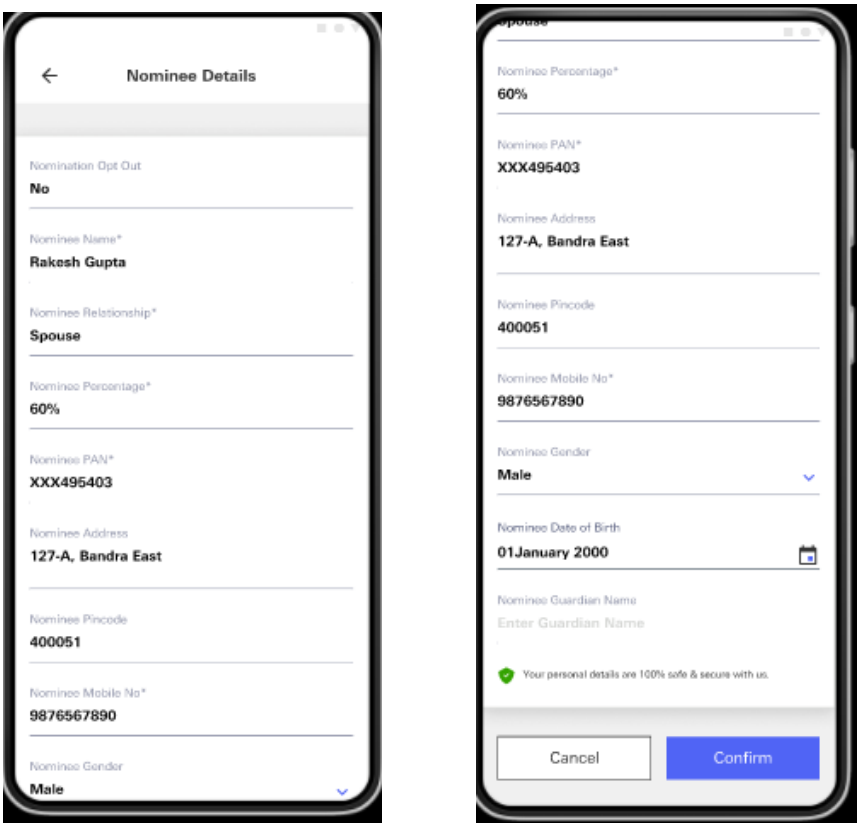


Screen: Draw Sign and Declaration

5. After capturing the Picture and Signature, clicking on the “Submit” button will redirect the user to the “Nominee Details” screen

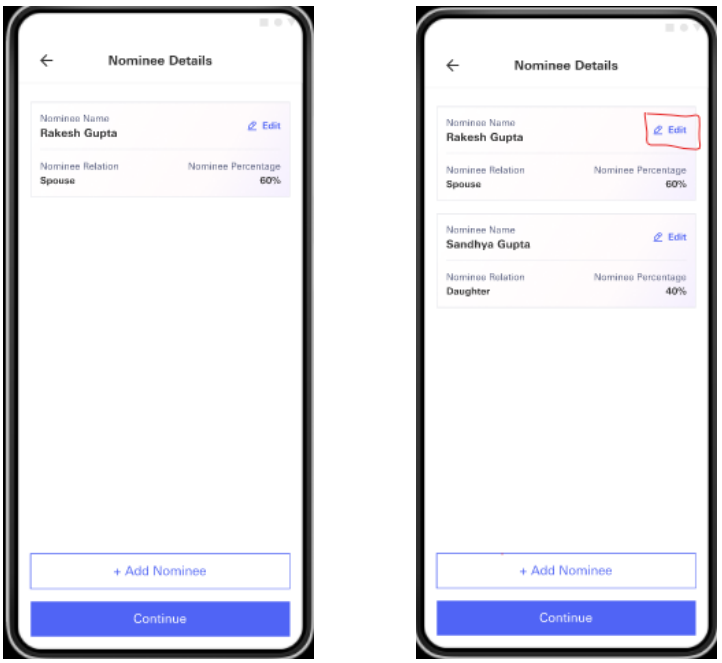
6.5. Nominee Details

1. The user has to fill in the mandatory fields on the “Nominee Details” screen and click on the “Confirm” button which will redirect to the “Nominee List” screen.
2. If the Nomination Opt out is selected as Yes then Nominee details need not to be input by the user



Screen: Nominee Details

3. The user can see the added nominee details on the Nominee List screen and can edit the details by clicking on the Edit button. Also, user can add new nominee details by clicking on the “Add Nominee” button. Once the user clicks on the Continue button the user will be redirected to the “Aadhaar e-Sign” Screen.



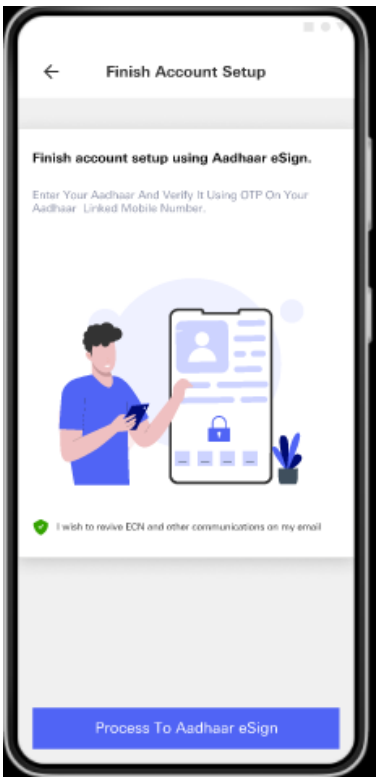
Screen: Nominee List

4. The user can see the Nominee percentage validation message if the percentage is not equal to 100 and cannot proceed further until it matches with 100 percentages.

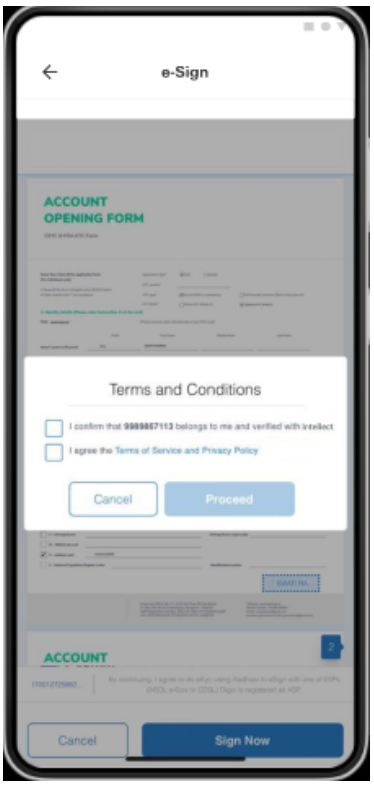
Screen: Nominee Percentage Validation

6.6. E-Sign

1. User will land on Finish Account Setup screen. The user has to click on the “Process to Aadhaar eSign” button which will redirect to the “e-Sign” Screen.
2. The document is created based on the details entered by the user and an e-sign screen will be displayed. The user has to select the checkboxes on the “Terms and Conditions” popup and click on the “Proceed” button to confirm the e-sign of the document.



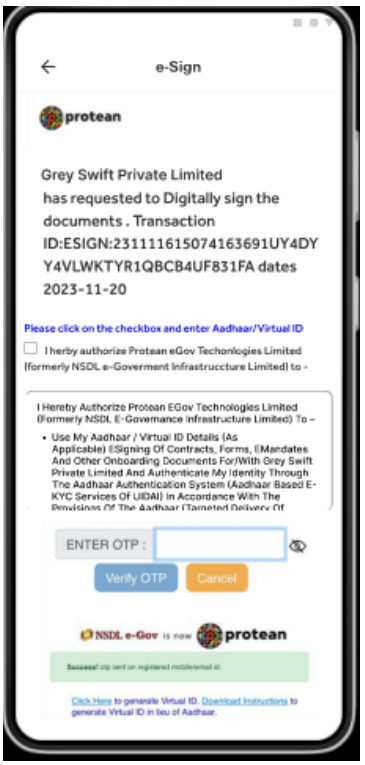
Screen: Aadhaar eSign



Screen: e-Sign

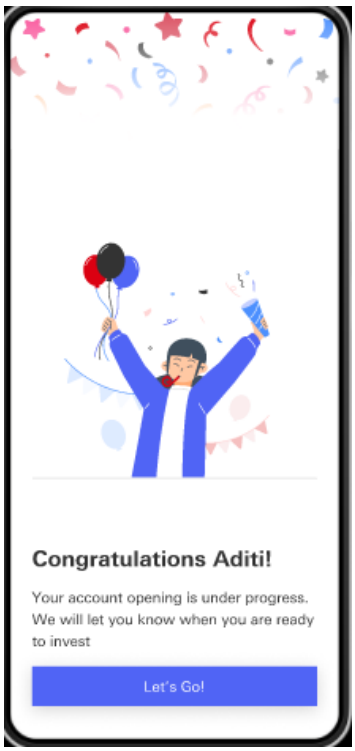
3. For E-sign, the user will be redirected to the NSDL screen where the user has to select the Declaration check box where the Aadhaar number needs to be entered and then has to click on the “Send OTP” button.
4. The user has to enter the OTP number received on the Aadhaar-linked mobile number and click on the “Verify OTP” button

Screen: Enter Aadhaar



Screen: Enter OTP

5. Once the OTP has been verified, the user Account Opening process will be completed and can see the success screen.
6. An email will be triggered to the user with AOF form.



Screen: Account Opening Success

7. When the user clicks on the "Let's Go!" button, the user will be redirected to the Application Home page. This marks the completion of the Onboarding and KYC journey. In the system customer will be created with a CIF id. Internally system will create a Base and an Investment

account.
